Proposed Items for Review

1. New legislation titled the Ontario Fair Hydro Act, 2017

Approvals required prior to LRC

Ontario

LEGISLATION AND REGULATIONS COMMITTEE:
MINISTRY APPROVAL FORM

	Committee and date	Cabinet Date
Policy	Cabinet approval received March 1	
TB/MBC	TB/MBC approval received March 9	

Deputy Minister _____ Date _____

Minister _____ Date _____

s. 1 Proposal and Context

- On March 2, 2017, the government announced Ontario's Fair Hydro Plan (OFHP), intended to lower bills on average by 25% for a typical residential consumer, starting in the summer of 2017. About half a million small businesses and farms are also expected to benefit.

- Any rate increases for residential consumers over four years would be held to the rate of inflation.

- These measures include the 8% rebate introduced in January and builds on previously announced initiatives to deliver broad-based rate relief on electricity bills.

- The OFHP also announced enhancements to a number of existing programs targeted at more vulnerable electricity consumers, including funding some or all of the costs of these programs from the tax base rather than the electricity ratebase.

- OFHP is part of a significant system restructuring that will address long-standing policy challenges and ensure greater fairness.

- To implement OFHP, the Ministry has prepared the Fair Hydro Act, 2017 in close collaboration with key ministries (i.e., Treasury Board, Finance, Attorney General, Cabinet Office), agencies (i.e., OEB, IESO, OPG) and third party financial advisors and local distribution companies (LDCs).
  - The proposed Fair Hydro Act, 2017 would be an omnibus bill with 2

schedules: the Ontario Fair Hydro Plan Act, 2017 and amendments to the Ontario Energy Board Act, 1998 and Electricity Act, 1998.

- The proposed OFHP legislation, supporting regulations and amendments to existing legislation (e.g., Electricity Act and Ontario Energy Board Act) will, if passed, enable implementation of the following key components of the Plan:

A. Refinancing the Global Adjustment (GA) – The proposed legislation outlines how costs would be fairly allocated among eligible consumers over time.

B. Helping Vulnerable Electricity Consumers – The proposed legislation broadens the Rural or Remote Rate Protection Program (RRRP) by creating a new distribution rate protection component,

expands the Ontario Electricity Support Program (OESP) and establishes a new On-Reserve First Nations Delivery Credit. The legislation also allows for these programs to be funded (partially for RRRP) through the tax-base.

A. GA Refinancing

- The purpose of the proposed legislation is to support the Government of Ontario's commitment to ensure that the costs of investments in clean energy initiatives are allocated fairly among present and future generations of consumers.

- Refinancing the Global Adjustment (GA) would be achieved through the proposed stand-alone legislation, regulations and amendments

to existing legislation and regulations.

- Costs to be allocated include clean and renewable generation facilities, conservation, demand management, energy efficiency programs.

- The supporting legislation defines the mechanisms and framework that would achieve the refinancing of the GA.

These mechanisms are described below.

B. Social Programs

- The proposed Ontario Fair Hydro Plan would help vulnerable electricity consumers by enhancing electricity support programs and shifting program costs onto the tax-base:
  - Enable Rural or Remote Electricity Rate Protection

(RRRP) costs to be funded through provincial revenues;

- Enhance Rate Protection through creation of new tax-base funded Distribution Rate Protection (DRP);
- Enable Ontario Electricity Support Program (OESP) costs to be moved to tax base;
- Create a new First Nation On-Reserve Delivery Credit, funded through provincial revenues

s. 2 Approach and Intended Outcomes

A. GA Refinancing

- The Fair Hydro Act, 2017 attempts to balance several key factors including financeability, accounting requirements and legal considerations.

- Following an extensive consultation process with internal and external experts, the proposed legislation strikes a balance between these three factors by:
  - Supporting financeability through a number of features, including enabling a provincial guarantee and provisions intended to provide certainty to investors in order to reduce borrowing

costs and attract a wide investor base;

- Addressing the necessary accounting requirements through mechanisms to record funding, interest and the transfer of regulatory assets to avoid a fiscal impact to the province; and
- Mitigating legal risk by developing a methodology that attempts to fairly aligns costs and benefits.

- The purpose of the proposed legislation is to support the Government of Ontario's commitment to ensure that the costs of clean energy initiatives are allocated fairly among present and future generations of consumers.
  - Costs to be allocated include clean and renewable generation facilities, conservation, demand management, energy efficiency programs.

- The proposed legislation would outline:
  - Roles and responsibilities for the OEB, IESO, OPG and the Province;
  - A detailed Preamble, Purpose and Definitions;
  - Details with respect to cost allocation, rate reduction methodology, implementation and financing;
  - Scope of provincial undertaking and enabling the Province to provide

guarantees and indemnities to back stop that undertaking; and

- Amendments to other acts.

- The associated amendments to existing legislation and regulations include:
  - Electricity Act, 1998: amendments to provide OPG with the authority to establish a special purpose vehicle (SPV) for the investment asset and Ontario Energy Board Act, 1998:

amendments to allow for OEB to set rates recognizing GA refinancing.

Preamble and Purpose

- The preamble of the proposed legislation establishes the rationale for the allocation of "clean energy costs" over time. That is, the development of a clean, modern and reliable electricity system has increased costs for ratepayers.

- The purpose of the proposed legislation is to support the Government of Ontario's commitment to ensure that the costs of these investments are allocated fairly among present and future generations of consumers.
    - Costs to be allocated include clean and renewable generation facilities, conservation, demand management, energy efficiency programs.

- The supporting legislation defines the mechanisms and framework that would achieve the refinancing of the Global Adjustment. Note: These mechanisms are described below.

- The legislation also restricts the OEB, Minister of Energy and the Crown from reducing, impairing or ending Clean Energy Adjustments in the future:

- The Lieutenant Governor in Council may authorize the Ministers of Finance and Energy to enter into guarantees and indemnities related to the Act.

- The proposed legislation aligns eligibility with the Ontario Rebate for Electricity Consumers Act, 2016.

Fair Adjustment

- Sets out the mechanism for the Ontario Energy Board (OEB) to determine the "relief", including the initial decrease in rates to achieve the 25% decrease, for a typical residential consumer, and to achieve comparable bill reductions for other eligible consumers, for the period July 1, 2017 to April 30, 2018.
  - Under the legislation, the OEB must determine the amount within 15 business days of the legislation receiving Royal Assent.

- The Fair Adjustment also allows the LGIC to make regulations prescribing electricity rates after April 30, 2018.

Clean Energy Adjustment

- The Clean Energy Adjustment is the mechanism to recover the under-collection of GA from eligible consumers during the recovery period.

- The proposed Act outlines:
  - The process for determining the total Clean Energy Adjustment amount;
  - The obligation on individual ratepayers for the repayment of the amount; and
  - The inability to offset or bypass re-collection of the amount.

Fair Allocation Amount

- The Fair Allocation Amount is a calculation and allocation of clean energy costs and clean energy benefits over time.
  - The Minister of Energy is to calculate the Fair Allocation Amount and provide the amount to the Financial Services Manager. Subsequent calculations may be undertaken by other agents as prescribed by the Minister.
  - It is expected that the calculation would lead to

decreased rates in the near term with upward pressure on rates in the long term.

- Under the legislation the calculation of the Fair Allocation Amount is guided by the principles and purposes of the Act including the proportional allocation of clean energy costs and benefits.

Financial Services Manager

- The legislation appoints OPG as the Financial Services Manager.

Financing Plan

- The Fair Allocation Amount is a calculation and allocation of clean energy costs and clean energy benefits over time.
  - The Minister of Energy is to calculate the Fair Allocation Amount and provide the amount to the Financial Services Manager.

Subsequent calculations may be undertaken by other agents as prescribed by the Minister.

- It is expected that the calculation would lead to decreased rates in the near term with upward pressure on rates in the long term.

- Under the legislation the calculation of the Fair Allocation Amount is guided by the principles and purposes of the Act including the

proportional allocation of clean energy costs and benefits.

Regulatory Asset

- IESO will have a funding deferral resulting from the reduction in amounts collected during the first four years.

- The legislation enables IESO to record the under-collection of GA in a variance account, and deems the rights associated with this under-

collected amount to be a Regulatory Asset.

- OEB would determine rates to allow IESO to recover under-collection recorded in its variance account in the event the Regulatory Asset is not sold.

- IESO is authorized to sell all or a portion to the OPG Special Purpose Vehicle (SPV)/Trust.

Investment Asset

- The sale of the regulatory asset from IESO to the OPG Special Purpose Vehicle (SPV)/Trust creates an "Investment Asset".
    - The legislation establishes property rights for the Investment Asset such as the right to collect principal and interest and financing costs in the form of the clean energy adjustment from eligible consumers.

- The Investment Asset may in turn be sold to other investors or group of investors.

- Through the legislation, the Board, Minister and Crown undertake not to hinder the charging and remittance or collection of clean energy adjustments.
  - The Province, through the Minister of Finance and the Minister of Energy may agree to guarantee performance, any debts and

obligations and backstop its undertaking.

Amendments to Other Acts

- The legislation stipulates required amendments to existing legislation such as:
  - The Electricity Act, 1998 – to expand the objects of IESO and OPG to enable them to perform their rights and obligations in the proposed Act

- The Ontario Energy Board Act, 1998 – to address license conditions and the determination of regulated payments.

B. Social Programs

- The proposed legislation provides the authority to implement two new rate mitigation programs and expands upon two existing programs.

- To date, a number of electricity support programs are funded through the electricity rate-base. There is opportunity to provide support to a more targeted subset of customers who are disproportionately affected by increased electricity costs and to shift these costs to the tax base.

- The proposed legislation is intended to provide rate relief and assistance for:

- **High Distribution Cost Customers**: Some customers in rural areas where the cost to distribute electricity is high can experience difficulty in reducing their electricity bill through conservation, particularly when reliant on electric heating.
- **Low-Income Customers**: Rising electricity costs make up a disproportionally large amount of the household

expenditures for low-income households.

- **First Nation On-Reserve Customers**: On-Reserve First Nations customers experience challenges with energy affordability and are seeking to address historical grievances associated with electricity system infrastructure.

Proposed Changes to the Ontario Energy Board Act, 1998 ("OEBA" or "Act")

- The Ontario Energy Board Act, 1998 would be amended to facilitate the roll out, expansion or change in funding of the following programs.

i. Rural or Remote Rate Protection (RRRP)

- RRRP is an existing program currently funded by ratepayers through the regulatory line of the electricity bill. Currently

costs $1.58/month for a 750kWh consumer.

- Part of the program helps fund the costs of Hydro One customers classified into the "R2" residential rate class. There are approximately 330,000 R2 customers across the Province. These customers have some of the highest distribution costs in the Province. For R2 customers the enhanced RRRP, or Distribution Rate Protection (DRP), is provided in addition

to the RRRP the customers are already eligible for under the existing RRRP.

- Section 79 would be amended to provide the government the ability to fund a portion of the Rural or Remote Rate Protection Program through the tax base by prescribing certain classes of consumers who will be funded through a legislative appropriation.
  - This includes the ability to pass regulations respecting

the making of rules for the compensation of distributors with the money appropriated flowing from the legislature through the IESO to the various LDCs who would then provide the rate relief directly on consumers' bills.

- Should the legislation pass, Energy proposes to amend O. Reg 442/04 to enable provincial funding to compensate Hydro One for provision of RRRP to its R2 customers.

ii. Expanded RRRP - Distribution Rate Protection

- While the RRRP helps mitigate some of the higher distribution costs for Hydro One R2 customers, there is an opportunity to provide further relief to consumers in relatively high-distribution cost outlier LDCs. This relief would be financed from the tax base.

- Mitigation would be provided by harmonizing distribution rates for prescribed LDCs, as set by the Ontario Energy Board. The mechanism for determining this rate would be set out in regulation.

- The new section 79.3 of the Act would enable Distribution Rate Protection, which satisfies the commitment to expand RRRP.
  - The section includes the power to pass regulations

prescribing LDCs, the classes of consumers or consumers designated as distribution rate protected consumers, the maximum amount of the monthly base distribution charge, limitation periods, and the type of information required by the Board and Ministry to implement and administer the program, including financial transactions.

iii. Ontario Electricity Support Program (OESP)

- Section 79.2 would be repealed and replaced in order to provide the government with the ability to shift funding for the OESP (once existing rate-based pooled funding has been depleted) from the rate base to the tax base, and the ability to share information with MCSS to coordinate OESP and social assistance programs. The Ministry has already completed

a regulatory amendment that, effective May 1, 2017:

- Increases the existing OESP credit scales by an additional 50%; and
- Expands the categories of OESP credits.
- Provides for OESP to be funded from the tax-base once the IESO's OESP variance account has been depleted.

- The legislative amendments would provide authority to

make regulations to replace existing O. Reg. 314/15 to implement these changes.

- The total fiscal impacts to the province from the newly enhanced OESP will amount to: $140 million in 2017-18, $261 million in 2018-19, $325 million in 2019-20 and $375 million in 2020-21.

- Schedule 2 amends the OESP provisions by prescribing the

ability to fund the program from the tax base.

- The section also provides that the Ontario Energy Board or any other entity prescribed in legislation would be responsible for administering the program.
- In addition, the licenses of LDCs, the IESO, unit-sub meter providers or electricity retailers are deemed to include anything which is necessary to administer and implement the program as

may be set out in regulations or by the Board.

- The section also requires that the Ontario Energy Board continue funding the program using the amounts previously accumulated in the IESO's OESP variance account which is the difference between funds collected through the regulatory charge and expended on OESP to date, until these amounts are

depleted and the program shifts to the tax-base.

- The section provides for broad regulation making power and includes the provision for the creation of different classes of rate assisted consumers and establishing rules for the calculation of the rate assistance to be provided.
- New provisions also provide the necessary authority to allow the OEB and the Ministry of

Community and Social Services (MCSS) to share data on customers in the future to support increased participation in the OESP program among social assistance clients.

- Note: the intended approach involves proclaiming s.79.2 into force on a future date to be named by proclamation. This would allow time for the funds accumulated in the IESO's OESP variance account to be

more fully expended prior to the repeal and replacement of s.79.2.

- However, the MCSS data sharing provisions, along with ss. Amendments to s. 79.2.1, the new sections 79.3 and 79.4, would come into force upon Royal Assent.
- The OESP charge has been removed from electricity bills, however a surplus account has been accumulated which the OEB

will continue to use until depleted.

iv. First Nations On-Reserve Delivery Credit

- On June 27, 2016, following discussions on Hydro One shares and rates at COO's All Chiefs Conference, the Minister of Energy issued a letter directing the OEB to prepare a report providing "*advice on options for an*

appropriate electricity rate (or rate assistance) for on-reserve First Nations electricity consumers".

- The program is premised around the findings in the OEB report on a First Nations Delivery Rate Assistance. The proposed program features include:
  - Eliminating the delivery charge, or monthly service charge for those customers served by LDCs that do not

have a delivery charge, from the bills of prescribed on-reserve customers. Regulations would then prescribe those on reserve consumers which are eligible for the on reserve credit.

- Continue to provide eligibility to OESP while not disturbing eligibility for the Low Income Energy Assistance Program (LEAP) currently funded by distributors outside of these

amendments to the OEBA; and

- The program would be carried out by the 11 affected LDCs serving on-reserve consumers identified by the OEB in its report, including; Algoma Power Inc., Attawapiskat Power Corporation, Bluewater Power Distribution Corporation, Cat Lake Power Utility Ltd., Cornwall Electric Distribution, Hydro One Networks Inc. Hydro One

Remote Communities Inc., PUC Distribution Inc., and Thunder Bay Hydro Electricity Distribution.

- The program is anticipated to have a fiscal impact on Government of $20 million, as estimated by the Ontario Energy Board, to implement.

- The new section 79.4 of the Act would establish the First Nation On-Reserve Delivery Credit. The section provides

that for all prescribed consumers, living on-reserve, the entirety of their delivery line items will be removed from their bill as a delivery credit.

- The program would be entirely funded through the tax base.
- The section includes the power to make regulations prescribing further program details such as eligibility and funding parameters.

Fair Hydro Act, 2017

COMPENDIUM

The proposed Bill, the *Fair Hydro Act, 2017*, if enacted, would enact the *Ontario Fair Hydro Plan Act, 2017* and amend various Acts according to the provisions of Schedules 1 and 2 set out in greater detail below.

Schedule 1
Ontario Fair Hydro Plan Act, 2017

Schedule 1 enacts the *Ontario Fair Hydro Plan Act, 2017*. The Act establishes a framework under which the costs and benefits associated with the "clean energy initiative" are to be allocated among present and future consumers of electricity. The "clean energy initiative" describes the policies of the

Government of Ontario related to fostering the development of a clean, modern and reliable electricity system.

Part I of the Act sets out the purposes of the Act and includes protections and assurances related to investor interests.

Under Part II of the Act, the Ontario Energy Board is required to determine reduced electricity rates that would

achieve a 25% reduction in monthly invoice amounts from July 1, 2017 to April 30, 2018 for a hypothetical "regulated rate consumer" who meets prescribed criteria. The methodology to be applied by the Ontario Energy Board to determine electricity rates after April 30, 2018 would be prescribed by regulations.

Part III of the Act requires "specified consumers" to pay an amount in respect of the "clean energy adjustment". The clean

energy adjustment is determined by the Financial Services Manager in accordance with rules set out in the Act and the regulations. Part III also specifies the roles and responsibilities of electricity vendors and the Independent Electricity System Operator ("IESO") with respect to the collection and remittance of amounts in respect of the clean energy adjustment.

Part IV of the Act requires the Minister of Energy to calculate a "fair allocation amount" by taking specified steps in accordance with principles and assumptions set out in the Act. The purpose of calculating the fair allocation amount is to measure and allocate the estimated clean energy costs and estimated clean energy benefits fairly among specified consumers.

Also under Part IV, Ontario Power Generation Inc. is appointed as the Financial Services Manager. The Financial Services Manager is required to prepare a written "Financing Plan" to evaluate whether potential funding obligations should be incurred to acquire and finance investment assets (under Part V). Constraints are placed on incurring funding obligations that would result in amounts becoming payable in respect of

the clean energy adjustment from July 1, 2017 to April 30, 2021. In accordance with the Financing Plan, the Financial Services Manager may establish financing entities that may incur funding obligations.

Part V of the Act requires the IESO to determine the "IESO deferral" in accordance with the regulations and to establish and maintain a variance account in which it records the IESO deferral for each month. The

balance in the variance account becomes a "regulatory asset", which the IESO has the right to recover from specified consumers through rates set by the Ontario Energy Board. The IESO is authorized to transfer a specified portion of the regulatory asset to a financing entity. The transfer results in the financing entity acquiring a corresponding "investment interest". The Act sets out various rules respecting the

validity and priority of such a transfer.

In Part VI, the Act provides various rules in respect of the "investment asset" created by the transfer under Part V of a specified portion of the regulatory asset. Part VI provides that the investment asset constitutes a current and irrevocable property right and interest, consisting collectively of various specified rights and interests of investment interest

owners. The Act also includes rules respecting the validity and priority of transfers of investment interests and the granting of a security interest in an investment interest by an investment interest owner.

Part VII deals with various administrative and miscellaneous matters, including regulation-making authority of the Lieutenant Governor in Council.

Part VIII includes consequential amendments to the *Electricity Act, 1998* and the *Ontario Energy Board Act, 1999* to address various matters relating to the enactment of the new Act.

Schedule 2
Amendments to the Ontario Energy Board Act, 1998

Schedule 2 amends the *Ontario Energy Board Act, 1998*.

Section 79 of the Act is amended so that the rate protection provided to certain classes of rural or remote rate protected (RRRP) consumers may be funded out of money appropriated by the Legislature, rather than by consumers. Consumers would still be required to fund the remaining portion of RRRP not funded through appropriations.

Section 79.2 of the Act, which governs the Ontario Electricity

Support Program (OESP), is repealed and replaced on a date to be named by proclamation of the LGIC. Once s.79.2 is proclaimed, the program would be continued, but will be funded out of money appropriated by the Legislature after the variance account maintained by the IESO is exhausted, rather than by consumers. There are provisions relating to the sharing, use and disclosure of information relating to the administration of the OESP.

New provisions are created in the Act to establish programs to provide rate protection to certain distribution rate-protected residential consumers and a delivery credit to on-reserve consumers.

The Schedule also contains various amendments of a technical and administrative nature to support the implementation and oversight of these programs including

provisions related to auditing, record-keeping, inspections and inquiries, offences and penalties.

The Schedule contains regulation-making authority in order to specify the details required to implement the various government-funded.

Ministry of the Attorney General

PRIVILEGED AND CONFIDENTIAL

Memorandum To: The Honourable Glen Murray
Chair of the Legislation and Regulations Committee

From: Carolyn Calwell
Director, Legal
Services Branch

Date: May 5, 2017

Re: Ontario's Fair Hydro Plan
An Act to enact the Ontario Fair Hydro Act, 2017 and to make amendments to the Electricity Act, 1998 and the Ontario Energy Board Act, 1998

I have examined the draft of the above-referenced item being submitted to Legislation and Regulations Committee on May 10, 2017 and have compared that draft with the policy approved by Cabinet on March 1, 2017.

As a result of this comparison, I am able to advise you that the draft corresponds to the approved policy with the exception of the variances identified on the attached chart.

Carolyn Calwell
Director

Ontario's Fair Hydro Plan
An Act to enact the Ontario Fair Hydro Act, 2017 and to make amendments to the Electricity Act, 1998 and the Ontario Energy Board Act, 1998

Minute Item	Approved Policy/Policy Sought to be Approved	Proposed Variance	Degree of Variance	Rationale/Commentary
1.A	Total projected bill increases will be kept in line with Consumer Price Index (CPI) **until the end of**	Bill increases will be prescribed by regulation for the period May 1, 2018 **to**	Low	June 30, 2021 aligns with public communications that rate increases will be held to inflation over the next four years. This regulation making authority would enable the

	2021.	**June 30, 2021**.		government to keep bill increases in line with CPI.
1.A	Cap bill increases due to repayments at around 10% of the total bill.	Bill increases will not be capped.	High	Consultation with stakeholders and external advisors revealed that a legislated cap would undermine investors' certainty in recovering their investment. However, the debt rating will be impaired if modelling suggests

				that rates could increase more than 10%, providing a cap in practical terms.

Internal Draft: April ~~2,~~5, 2017

IESO correct.

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities [IESO: what is meant by future quantities? These contracts have a contract capacity but no real indication of energy output.] set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the ~~long-term~~ construction and development of facilities for the purpose of ~~generating~~long-term operation and generation of electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets [IESO: is this factually correct? Is highlighted portion necessary?]; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. **[IESO: this is only true for Power Purchase Agreements (i.e. contracts for differences). There are also gas contracts and hydroelectric contracts with payment mechanics that are not contracts for differences.]** The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. **[IESO: as discussed at the meeting, the funding shortfall for the IESO that will need to be recovered from OPG trust is the difference between the new rate mitigation RPP price and what RPP would have been without rate mitigation. To be confirmed whether RPP forecasting variance is included or not in funding shortfall to be included in regulatory asset; and related IESO financing costs.]** In order for IESO to cover such a funding shortfall for a period, IESO will

need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods. [IESO: consider how to manage risk if financing entity cannot purchase]

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part [IESO: IESO supports characterization of property right as right to collect, rather than obligation of unknown future Ratepayers; see further comments below under Article 6]. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

> "Absolute Assignee" means ~~a~~, in respect of a Regulatory Asset, a [IESO: suggestion accommodates series of regulatory assets] person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset~~.~~ [IESO: does the term include a secured party].
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.
>
> "Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Treasury Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the

Administrative Agent on behalf of, the Regulatory Asset Owner under the Treasury Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Regulatory Asset Owner or incurred by the Regulatory Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Treasury Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Invoicing Agent, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Treasury Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Treasury Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owner.

"Alternative Invoicing Agent" means a person appointed under Section 4(8) to assume the invoicing and other activities of any Electricity Distributor under Article 4, as agent for and on behalf of the Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group.

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the sum of all Transition Charge Collections for the Reference Period.[2]

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [third] Business Day immediately preceding the first day of the Reference Period.]

---

[1] A key question will be how the overall costs will be spread across the rate base. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Invoicing Agent) in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of a residence **[IESO: LDCs should not be confined to residences. The eligible class of consumers is broader than residential.]** located in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Treasury Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or

establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Treasury Plan.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies) incurred by the Regulatory Asset Owner [IESO: note that Financing Entity may not be owner prior to incurrence debt] under the Treasury Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation. [IESO: Qualification of an obligation as a "Funding Obligation" should not be conditional upon compliance of the obligation with the Treasury Plan. This introduces unnecessary investor risk.]

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period. **[IESO: the funding shortfall for the IESO that will need to be recovered from OPG trust is the difference between the new rate mitigation RPP price and what RPP would have been without rate mitigation; it will not be solely referable to the "Power Contracts". To be confirmed whether RPP forecasting variance is included or not in funding shortfall to be included in regulatory asset; and related IESO financing costs.]**

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment ~~attributable to the Power Contracts~~ in accordance with the Fair Allocation Plan. **[IESO: it is likely sufficient to relate this only to the Fair Allocation Plan, given how that is defined, without tying the deferred GA to the Power Contracts, as currently defined.]**

"Generator" means a generator of electricity that is subject to this Act.

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last

day of the immediately preceding Reference Period. **[IESO: definition not necessary. Funding Shortfall definition should not be based on this defined term nor IESO Power Contract Net Payment nor GA Power Contract Contribution for Reference Period. Definitions are not necessary to determine Funding Shortfall, which is not derived from amounts payable to specific contracts, but rather the difference between what is invoiced to LDCs and amounts collected by LDCs from the eligible class of consumers. The original definition of Funding Shortfall and the incorporated terms are relevant to the Fair Allocation Plan and determining the policy of spreading recovery of the deferred amounts fairly over time.]**

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period. **[IESO: depending on how recovery is to be implemented, this could be converted into an input into the OEB's RPP price setting process. The charge, or perhaps a volumetric recovery rate, may still be relevant for those eligible consumers who are not RPP consumers.]**

"Pledge" means a lien, mortgage, charge, right of set-off [IESO: not applicable, delete] or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom [or for whose benefit] a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of

electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3] **[IESO: this definition only includes PPAs, which are contracts for differences. The contracts the Ministry wants to reference would also include gas and hydro contracts that are not contracts for differences. We are not certain all the detail around basis of payment is necessary; consider whether highlighted portion is appropriate.]**

"Province" means Her Majesty the Queen in right of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in Ontario] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected, directly or indirectly and whether a customer of an LDC or not, to the transmission and distribution system assets located in Ontario and who are taking electric delivery service within Ontario, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets [IESO: "electric generation services" are not purchased from transmission or distribution owners/operators] and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4] **[IESO: for factual accuracy, the IESO does not own transmission assets. It controls the IESO controlled grid. Should be corrected to say owned by electricity Distributors or transmitters, or operated by the IESO]**

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period. **[IESO: will all eligible consumers actually receive an Electricity Invoice? We understand some of the eligible class of consumers are not LDC customers – e.g., suite-metered customers.]**

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Regulated Asset Owner by applying the net proceeds obtained by the Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1). [IESO: consider whether one regulatory asset or a series of regulatory assets, and given that there will be a series of sales]

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the an Electricity Distributor deposits Transition Charge Collections; (b) for IESO, any bank

---

[3] Should this contemplate the possibility of additional or amended power contracts?

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

account into which IESO deposits Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means, in respect of a Regulatory Asset, collectively, (a) IESO, to the extent that it has retained any ownership ~~interest in,~~[IESO: consider use of a broader term, not tied to the property analysis, for e.g., "has rights in respect of"; also, consider whether provision need be made for retention of a co-ownership interest. Consider **redrafting as "IESO, until there has been a Disposition of the Regulatory Asset by the IESO"? The current phrasing may suggest even after a sale the IESO may retain an interest.**] interest in,] to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act.

"Settlement Date" means the [last Business Day of any month].

"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Transition Charge" means, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the Actual Finance Amount for the Reference Period, plus (c) the Collected Amount Adjustment.

"Undertaking of the Province" means the undertaking of the Province given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other]. **[IESO: we understand this definition to be the amounts the IESO has not recovered from LDCs due to this rate mitigation program. Is this equivalent to "Funding Shortfall"?]**

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge attributed to it and specified as such [IESO: may want to retain flexibility as to how the amount is recovered; consider leaving to be addressed by regulation] in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Invoicing Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer and recorded in an Electricity Invoice shall [, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge,] constitute indebtedness of the Ratepayer to the Regulatory Asset Owner. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the

---

[5] See footnote 1, above.

amount so allocated as a payment of related Transition Charges shall be deeded to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred in compliance with the Treasury Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Treasury Plan or as a result of amendments to the Treasury Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was properly incurred in accordance with the Treasury Plan. In no case shall a Funding Obligation incurred under the Treasury Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Invoicing Agent shall, as an agent of the Regulatory Asset Owner, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Invoicing Agent to the Ratepayer in respect of such Reference Period. **[IESO: if the amounts that need to be recovered over a reference period are combined into the RPP price (and prices to be paid by other eligible Class B consumers who are not RPP), then special invoicing provisions are not necessary. Instead what would be necessary is a process where the amount needed to be recovered over the reference period would be determined by [OPG?/Ministry?;] and provided to OEB as an input into the RPP price setting process. The places in article 4 where IESO is in square brackets are not roles for the IESO. We do not have a basis for determining what needs to be recovered, over what period or by whom.]**

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][6] or if applicable the [Alternative Collection Agent][7] shall calculate the Period Transition Charge applicable to the Reference Period. [IESO: this may be a more appropriate obligation for the OEB to undertake, albeit with necessary input from the IESO, LDCs, Financing Entity. As a general observation, it is the IESO's view that details concerning Invoicing of Transition Charges (Article 4) and Collections and Remittances (Article 5) are complex and as much detail as possible should be left to be addressed through regulations, OEB license conditions/codes, IESO market rules/manuals, etc.]

---

[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today- ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[7] Should this be a designated government official, rather than an agent appointed by investors?

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group. [IESO: see comment above]

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Invoicing Agent of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area. [IESO: see comment above]

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by [IESO] and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, bill and invoice the Transition Charges.

(7) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Invoicing Agent** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Invoicing Agent to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Invoicing Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Invoicing Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Invoicing Agent to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Invoicing Agent or any [Alternative Collection Agent] to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent. [IESO: consider whether the rights of the regulatory asset owner ought not also to be conferred after a realization event upon the Pledgee]

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner [IESO: consider "shall be held in trust", rather than "shall be deemed to be held in trust"].

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake ~~[diligent efforts]~~reasonable to accept and collect Electricity Distributor Remittances.

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner. [IESO: consider "shall be held in trust", rather than "shall be deemed to be held in trust"].

(6) **IESO Remittances** – On each [Settlement Date], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in Ontario or invoices or collects electricity distribution rates in Ontario[8], then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collect of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent, any owner of electricity distribution system assets in Ontario or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure. **[IESO: we don't think this is the intent but the highlighted text suggests IESO could be liable for failure of LDCs to pay invoiced amounts. IESO can seek to enforce payment obligation of LDC but IESO is not principally liable. We assume this is meant to indicate if the IESO fails to invoice or remit the amounts.]**

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to an over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owner. **[IESO: the concept of Replacement Event as regards the IESO is problematic. Instead consider successor to IESO having same obligations]**

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense~~0~~) by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO,

---

[8] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.] **[IESO: Consider treating set-off against the IESO as a deemed collection]**

(13) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in Ontario or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]

(14) Regulations – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) Composition – The Regulatory Asset shall constitute a property right and interest of the Regulatory Asset Owner in the following:

a. the present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

b. the present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and invoice the Transition Charges in accordance with Article 4;

c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

e. all Transition Charge Collections;

f. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

g. all Related Rights; and

h. all proceeds of or derived from the foregoing.

The Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

[IESO: Consideration should be given to defining the "Regulatory Asset" in terms of a franchise, right or licence conferred upon the IESO or the Financing Entity. This can be seen in both the Duke and the LIPA transactions.

LIPA

> *"The 2016B Restructuring Property is a property right consisting generally of the irrevocable right to impose, bill and collect 2016B Restructuring Charges from Customers, the right to adjust those 2016B Restructuring Charges and the right to all revenues, collections, claims, payments, money or proceeds of or arising from the 2016B Restructuring Charges and the property, rights and interests created under Financing Order No.4."*

Duke

> *"The nuclear asset-recovery property includes the right to impose, bill, collect and receive, through the nuclear asset-recovery charges payable by customers who receive electric transmission or distribution service from DEF or its successors or assignees under rate schedules approved by the Florida Commission or under special contracts, including the State and other governmental entities, an amount sufficient to pay principal and interest and other amounts in connection with the bonds. ...*
>
> *The Financing Act provides that the right to collect Payments based on the nuclear asset-recovery charge is a present property right that may be pledged, assigned or sold in connection with the issuance of the bonds.*
>
> *The nuclear asset-recovery property is not a receivable, and the principal collateral securing the bonds is not a pool of receivables."*

The following is the cautionary language in the Duke prospectus, even with the revised property interest language (there is similar language in the LIPA prospectus):

> *DEF will represent in the sale agreement, and the Financing Act, provides that the nuclear asset-recovery property sold pursuant to such sale agreement constitutes a present property right on the date that it is first transferred to us in connection with the issuance of the bonds. Nevertheless, no assurance can be given that, in the event of a bankruptcy of DEF a court would not rule that the applicable nuclear asset-recovery property comes into existence only as customers use electricity.*

If a court were to accept the argument that the applicable nuclear asset-recovery property comes into existence only as customers use electricity, no assurance can be given that a security interest in favor of the bondholders would attach to the nuclear asset-recovery charges in respect of electricity consumed after the commencement of the bankruptcy case or that the nuclear asset-recovery property has been sold to us. If it were determined that the nuclear asset-recovery property had not been sold to us, and the security interest in favor of the bondholders did not attach to the applicable nuclear asset-recovery charges in respect of electricity consumed after the commencement of the bankruptcy case, then we would have an unsecured claim against DEF. If so, there would be delays and/or reductions in payments on the bonds. Whether or not a court determined that nuclear asset-recovery property had been sold to us pursuant to a sale agreement, no assurances can be given that a court would not rule that any nuclear asset-recovery charges relating to electricity consumed after the commencement of the bankruptcy could not be transferred to us or the indenture trustee.]

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset Owner made under the Treasury Plan shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition [, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.] [IESO: References to the Treasury Plan should be directory only, and a failure to comply with the Treasury Plan should not invalidate any incurrence of debt, transfer or grant of security.] Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of revenues or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.

(3) **Deemed Perfection and Priority of Dispositions** – At the time a Disposition is made, the absolute assignment of the property rights and interest in the Regulatory Asset subject to the Disposition shall be deemed [IESO: Consider here and elsewhere avoiding the use of the term "deemed"] to have been and shall be perfected [IESO: unless the Regulatory Asset is an account, perfection of an

absolute transfer is not relevant] , vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall have priority over any liens in favour of such other persons. [IESO: the IESO's proposed statutory language attempted to buttress this disposition by providing for a contemporaneous divesting and vesting of statutory rights. This was intended to have the effect of divorcing the effectiveness of the disposition from the property analysis]

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge[[IESO: is the intent that the security interest arise by agreement (in which case is it intended that the PPSA applies) or does it arise by operation of statute, in which case the PPSA would not apply, PPSA Section 4(1)(a))] , provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation. [IESO: References to the Treasury Plan should be directory only, and a failure to comply with the Treasury Plan should not invalidate any incurrence of debt, transfer or grant of security.]

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in accordance with the Treasury Plan [IESO: References to the Treasury Plan should be directory only, and a failure to comply with the Treasury Plan should not invalidate any incurrence of debt, transfer or grant of security] shall be deemed to have been and shall be perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner [IESO: Should address competing claims to the asset as opposed to the regulatory asset owner], irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and [the security interest in] such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act.~~,~~ [IESO: note that registration of a financing statement is not excluded in (4):may want to consider registration of a financing statement under the PPSA as it is a simple act and may lessen the artificiality of the security interest] A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in revenues or other proceeds arising from the Transition Charge that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such revenues or other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge for informational purposes only under the [PPSA]. [IESO: see above]

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article ~~5~~.5 [IESO: Consider default rights of Pledgee]

(7) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner [IESO: consider in the co-ownership scenario whether an absolute assignee should be required to obtain the cooperation of the IESO], and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms [IESO: Is it necessary to provide that an agreement among named parties is binding upon those parties, or is it the intend to extend the binding effect to non-parties].

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[9]:

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the

---

[9] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][10].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.

(3) **Attribution Methodology** – The Fair Allocation Plan shall specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. [may have regard to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*

(4) **[Confirmation][Review] of the Fair Allocation Plan** – [OEB?] **[IESO: subject to accountant review.]**

Article 8 – The Treasury Plan

(1) **Power to Prepare and Implement the Treasury Plan** – The Administrative Agent shall prepare and propose the adoption of a Treasury Plan that is consistent with the principles, parameters, requirements and conditions set forth in Schedule 3, together with and subject to such conditions and requirements as may be specified in a further written order of the Minister of Energy or in accordance with the Regulation. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Treasury Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Treasury Plan.

(2) **Required Terms and Conditions of the Treasury Plan** – The Treasury Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation

---

[10] Consider if a quantitative limit needs to be included in the legislation.

Plan. The Treasury Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule C.

(3) **Power to Review and Approve the Treasury Plan** – The Minister of Energy may by written order designate one or more persons to review and, if considered necessary, require and prescribe amendments of the Treasury Plan and may specify conditions and requirements in respect of such review and prescriptions as may be specified in such written order.

(4) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. [IESO: References to the Treasury Plan should be directory only, and a failure to comply with the Treasury Plan should not invalidate any incurrence of debt, transfer or grant of security]. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Treasury Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Treasury Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(5) **Obligation to Apply IESO Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[11]

(6) **Non-Recourse** – The Treasury Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Invoicing Agent, and Alternative Collection Agent, the Administrative Agent, the OEB or the Province, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount [IESO: Not sure that follow this carve-out; consider impact on obligations incurred under regulatory asset purchase agreements]. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

---

[11] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

(7) **Incurrences are Binding** – Despite any failure to adhere to the Treasury Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure. [IESO: consider whether this can be expanded to cover conveyances of property and grants of security]

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Province, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part.

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of the actual incremental costs incurred by such person of providing administrative or servicing services.]

Article 10 – Undertaking of the Province

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Province may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly. The Province undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Province.

(2) **Undertaking and Agreement** – The Province undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Province will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Province, including in marketing materials and other documentation authorized

for use by the Administrative in connection with any Funding Obligation may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Treasury Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Treasury Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of Ontario.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Treasury Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Treasury Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment

and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Treasury Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Treasury Plan

Section [X] – Procedure to Adopt a Treasury Plan

(1) **Submission of Treasury Plan** – The person(s) designated by written order of the Minister of Energy under Section 8(1) shall prepare a Treasury Plan and submit it to the Minister of Energy and any person designed by the Minister of Energy under Section 8(2) to review such Treasury Plan [within the time period specified in such written order]/[within [•] days of such written order]. Such person(s) shall implement any changes proposed under Section [X](3) and submit the revised Treasury Plan to the **[OEB]** for approval within [within the time period specified in such written order]/[within [•] days of such written order].

(2) **Content of Treasury Plan** – Any Treasury Plan shall have regard to the following specifications:

a. A description of how the incurrence of Funding Obligations by present and future Designated Ratepayers will be on a basis that is consistent with their respective allocations of costs and benefits as contemplated in the Fair Allocation Plan;

b. The form, amount and timing of Funding Obligations under the Treasury Plan; and

c. the entities involved in the incurrence of Funding Obligations and execution of the Treasury Plan.

(3) **Review of Treasury Plan**– The Minister of Energy, or the person(s) designated by written order of the Minister of Energy under Section 8(2), shall review the Treasury Plan submitted in accordance with Section [X](1) and propose any changes to such Treasury Plan that are necessary or desirable to align the Treasury Plan with the requirements set out the [Minister's Order].

(4) **Approval of Treasury Plan** – The **[OEB]** shall have the power to and shall approve or disapprove of the Treasury Plan based solely on whether the Treasury Plan includes the specifications contemplated under Section [X](2) and whether those specifications [accord with] the assumptions, conditions, requirements and standards set out in the Treasury Plan and the order(s) of the Minister of Energy issued under Section 8(1) and 8(2). If the **[OEB]** fails to approve or disapprove any Treasury Plan within [30] days of [receiving such Treasury Plan],[12] the Treasury Plan is deemed to have been approved.

---

[12] Consider whether the Minister's order should set out timelines for each of steps contemplates by this Section [X], or whether these time periods should be hard-coded into the legislation.

Section [X] – Creation of the [OPG Financing Entity]

(1) **Creation of the [OPG Financing Entity]** – The person(s) designated by written order of the Minister of Energy under Section 8(1) to implement a Treasury Plan may [create] one or many entities, each known as a "OPG Financing Entity" having regard to the following principles:

a. No part of the revenue or assets of a OPG Financing Entity shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. OPG Financing Entity shall be authorized to:

i. issue bonds contemplated by a Treasury Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Treasury Plan and for administrative services;

iii. pledge the Regulatory Asset to secure bonds contemplated by a Treasury Plan.

c. So long as any bonds contemplated under a Treasury Plan are outstanding, OPG Financing Entity shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity.

d. OPG Financing Entity shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Treasury Plan. [IESO: Consider whether the Treasury Plan can be directory only, non-compliance should not go to validity or enforceability].

e. OPG Financing Entity shall cause the proceeds of any bond issuance contemplated under a Treasury Plan to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Treasury Plan. [IESO: Consider whether the Treasury Plan can be directory only, non-compliance should not go to ability to pay interest]

f. So long as the Regulatory Asset is pledged to secure bonds issued under a Treasury Act, the OPG Financing Entity must apply revenues from the collection of Transition Charges only to repay bonds and other costs as provided for in a Treasury Plan.

[IESO: Consider whether it is helpful to investors if some aspects of the SPV requirements applicable to the OPG Financing Entity can be incorporated into the statute]

(2) **Governance of [OPG Financing Entity]** – A person or persons that effect the creation of OPG Financing Entity shall design the governance of OPG Financing Entity having regard to the following principles:

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

IESO comments

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities [IESO: what is meant by future quantities? These contracts have a contract capacity but no real indication of energy output.] set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the construction and development of facilities for the purpose of long-term operation and generation of electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets [IESO: is this factually correct? Is highlighted portion necessary?]; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. **[IESO: this is only true for Power Purchase Agreements (i.e. contracts for differences). There are also gas contracts and hydroelectric contracts with payment mechanics that are not contracts for differences.]** The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. **[IESO: as discussed at the meeting, the funding shortfall for the IESO that will need to be**

recovered from OPG trust is the difference between the new rate mitigation RPP price and what RPP would have been without rate mitigation. To be confirmed whether RPP forecasting variance is included or not in funding shortfall to be included in regulatory asset; and related IESO financing costs.] In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods. [IESO: consider how to manage risk if financing entity cannot purchase]

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part [IESO: IESO supports characterization of property right as right to collect, rather than obligation of unknown future Ratepayers; see further comments below under Article 6]. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

> "Absolute Assignee" means, in respect of a Regulatory Asset, a [IESO: suggestion accommodates series of regulatory assets] person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset [IESO: does the term include a secured party].
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.

"Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Treasury Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, the Regulatory Asset Owner under the Treasury Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Regulatory Asset Owner or incurred by the Regulatory Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Treasury Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Invoicing Agent, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Treasury Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Treasury Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owner.

"Alternative Invoicing Agent" means a person appointed under Section 4(8) to assume the invoicing and other activities of any Electricity Distributor under Article 4, as agent for and on behalf of the Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group.

---

[1] A key question will be how the overall costs will be spread across the rate base. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the sum of all Transition Charge Collections for the Reference Period.[2]

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [third] Business Day immediately preceding the first day of the Reference Period.]

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Invoicing Agent) in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of a residence **[IESO: LDCs should not be confined to residences. The eligible class of consumers is broader than residential.]** located in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

---

relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Treasury Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Treasury Plan.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies) incurred by the Regulatory Asset Owner [IESO: note that Financing Entity may not be owner prior to incurrence debt] under the Treasury Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation. [IESO: Qualification of an obligation as a "Funding Obligation" should not be conditional upon compliance of the obligation with the Treasury Plan. This introduces unnecessary investor risk.]

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period. **[IESO: the funding shortfall for the IESO that will need to be recovered from OPG trust is the difference between the new rate mitigation RPP price and what RPP would have been without rate mitigation; it will not be**

solely referable to the "Power Contracts". To be confirmed whether RPP forecasting variance is included or not in funding shortfall to be included in regulatory asset; and related IESO financing costs.]

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment in accordance with the Fair Allocation Plan. **[IESO: it is likely sufficient to relate this only to the Fair Allocation Plan, given how that is defined, without tying the deferred GA to the Power Contracts, as currently defined.]**

"Generator" means a generator of electricity that is subject to this Act.

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period. **[IESO: definition not necessary. Funding Shortfall definition should not be based on this defined term nor IESO Power Contract Net Payment nor GA Power Contract Contribution for Reference Period. Definitions are not necessary to determine Funding Shortfall, which is not derived from amounts payable to specific contracts, but rather the difference between what is invoiced to LDCs and amounts collected by LDCs from the eligible class of consumers. The original definition of Funding Shortfall and the incorporated terms are relevant to the Fair Allocation Plan and determining the policy of spreading recovery of the deferred amounts fairly over time.]**

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period. **[IESO: depending on how recovery is to be implemented, this could be converted into an input into the OEB's RPP price setting process. The charge, or perhaps a volumetric recovery rate, may still be relevant for those eligible consumers who are not RPP consumers.]**

"Pledge" means a lien, mortgage, charge, right of set-off [IESO: not applicable, delete] or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom [or for whose benefit] a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3] **[IESO: this definition only includes PPAs, which are contracts for differences. The contracts the Ministry wants to reference would also include gas and hydro contracts that are not contracts for differences. We are not certain all the detail around basis of payment is necessary; consider whether highlighted portion is appropriate.]**

"Province" means Her Majesty the Queen in right of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in Ontario] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected, directly or indirectly and whether a customer of an LDC or not, to the transmission and distribution system assets located in Ontario and who are taking electric delivery service within Ontario, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets [IESO: "electric generation services" are not purchased from transmission or distribution owners/operators] and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4]

---

[3] Should this contemplate the possibility of additional or amended power contracts?

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

[IESO: for factual accuracy, the IESO does not own transmission assets. It controls the IESO controlled grid. Should be corrected to say owned by electricity Distributors or transmitters, or operated by the IESO]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period. **[IESO: will all eligible consumers actually receive an Electricity Invoice? We understand some of the eligible class of consumers are not LDC customers – e.g., suite-metered customers.]**

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Regulated Asset Owner by applying the net proceeds obtained by the Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1). [IESO: consider whether one regulatory asset or a series of regulatory assets, and given that there will be a series of sales]

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the an Electricity Distributor deposits Transition Charge Collections; (b) for IESO, any bank account into which IESO deposits Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means, in respect of a Regulatory Asset. collectively, (a) IESO, to the extent that it has retained any ownership [IESO: consider use of a broader term, not tied to the property analysis, for e.g., "has rights in respect of"; also, consider whether provision need be made for retention of a co-ownership interest. Consider **redrafting as "IESO, until there has been a Disposition of the Regulatory Asset by the IESO"? The current phrasing may suggest even after a sale the IESO may retain an interest.**] interest in, **]** to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act.

"Settlement Date" means the [last Business Day of any month].

"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Transition Charge" means, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

---

[5] See footnote 1, above.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the Actual Finance Amount for the Reference Period, plus (c) the Collected Amount Adjustment.

"Undertaking of the Province" means the undertaking of the Province given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other]. **[IESO: we understand this definition to be the amounts the IESO has not recovered from LDCs due to this rate mitigation program. Is this equivalent to "Funding Shortfall"?]**

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge attributed to it and specified as such [IESO: may want to retain flexibility as to how the amount is recovered; consider leaving to be addressed by regulation] in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Invoicing Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer and recorded in an Electricity Invoice shall [, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge,] constitute indebtedness of the Ratepayer to the Regulatory Asset Owner. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deeded to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred in compliance with the Treasury Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Treasury Plan or as a result of amendments to the Treasury Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective

without any further action. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was properly incurred in accordance with the Treasury Plan. In no case shall a Funding Obligation incurred under the Treasury Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Invoicing Agent shall, as an agent of the Regulatory Asset Owner, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Invoicing Agent to the Ratepayer in respect of such Reference Period. **[IESO: if the amounts that need to be recovered over a reference period are combined into the RPP price (and prices to be paid by other eligible Class B consumers who are not RPP), then special invoicing provisions are not necessary. Instead what would be necessary is a process where the amount needed to be recovered over the reference period would be determined by [OPG?/Ministry?;] and provided to OEB as an input into the RPP price setting process. The places in article 4 where IESO is in square brackets are not roles for the IESO. We do not have a basis for determining what needs to be recovered, over what period or by whom.]**

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][6] or if applicable the [Alternative Collection Agent][7] shall calculate the Period Transition Charge applicable to the Reference Period. [IESO: this may be a more appropriate obligation for the OEB to undertake, albeit with necessary input from the IESO, LDCs, Financing Entity. As a general observation, it is the IESO's view that details concerning Invoicing of Transition Charges (Article 4) and Collections and Remittances (Article 5) are complex and as much detail as possible should be left to be addressed through regulations, OEB license conditions/codes, IESO market rules/manuals, etc.]

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection

---

[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today-ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[7] Should this be a designated government official, rather than an agent appointed by investors?

Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group. [IESO: see comment above]

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Invoicing Agent of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area. [IESO: see comment above]

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by [IESO] and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, bill and invoice the Transition Charges.

(7) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Invoicing Agent** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Invoicing Agent to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Invoicing Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Invoicing Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Invoicing Agent to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Invoicing Agent or any [Alternative Collection Agent] to

ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent. [IESO: consider whether the rights of the regulatory asset owner ought not also to be conferred after a realization event upon the Pledgee]

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner [IESO: consider "shall be held in trust", rather than "shall be deemed to be held in trust"].

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake reasonable to accept and collect Electricity Distributor Remittances.

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner. [IESO: consider "shall be held in trust", rather than "shall be deemed to be held in trust"].

(6) **IESO Remittances** – On each [Settlement Date], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in Ontario or invoices or collects electricity distribution rates in Ontario[8], then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collect of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent, any owner of electricity distribution system assets in Ontario or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure. **[IESO: we don't think this is the intent but the highlighted text suggests IESO could be liable for failure of LDCs to pay invoiced amounts. IESO can seek to enforce payment obligation of LDC but IESO is not principally liable. We assume this is meant to indicate if the IESO fails to invoice or remit the amounts.]**

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to an over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory

---

[8] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

Asset on behalf of the Regulatory Asset Owner. **[IESO: the concept of Replacement Event as regards the IESO is problematic. Instead consider successor to IESO having same obligations]**

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense) by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.] **[IESO: Consider treating set-off against the IESO as a deemed collection]**

(13) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in Ontario or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]

(14) Regulations – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) Composition – The Regulatory Asset shall constitute a property right and interest of the Regulatory Asset Owner in the following:

a. the present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

b. the present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and invoice the Transition Charges in accordance with Article 4;

c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of

Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

e. all Transition Charge Collections;

f. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

g. all Related Rights; and

h. all proceeds of or derived from the foregoing.

The Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

[IESO: Consideration should be given to defining the "Regulatory Asset" in terms of a franchise, right or licence conferred upon the IESO or the Financing Entity. This can be seen in both the Duke and the LIPA transactions.

LIPA

"The 2016B Restructuring Property is a property right consisting generally of the irrevocable right to impose, bill and collect 2016B Restructuring Charges from Customers, the right to adjust those 2016B Restructuring Charges and the right to all revenues, collections, claims, payments, money or proceeds of or arising from the 2016B Restructuring Charges and the property, rights and interests created under Financing Order No.4."

Duke

"The nuclear asset-recovery property includes the right to impose, bill, collect and receive, through the nuclear asset-recovery charges payable by customers who receive electric transmission or distribution service from DEF or its successors or assignees under rate schedules approved by the Florida Commission or under special contracts, including the State and other governmental entities, an amount sufficient to pay principal and interest and other amounts in connection with the bonds. …

The Financing Act provides that the right to collect Payments based on the nuclear asset-recovery charge is a present property right that may be pledged, assigned or sold in connection with the issuance of the bonds.

The nuclear asset-recovery property is not a receivable, and the principal collateral securing the bonds is not a pool of receivables."

The following is the cautionary language in the Duke prospectus, even with the revised property interest language (there is similar language in the LIPA prospectus):

DEF will represent in the sale agreement, and the Financing Act, provides that the nuclear asset-recovery property sold pursuant to such sale agreement constitutes a present property right on the date that it is first transferred to us in connection with the issuance of the bonds. Nevertheless, no assurance can be given that, in the event of a bankruptcy of DEF a court would not rule that the applicable nuclear asset-recovery property comes into existence only as customers use electricity.

If a court were to accept the argument that the applicable nuclear asset-recovery property comes into existence only as customers use electricity, no assurance can be given that a security interest in favor of the bondholders would attach to the nuclear asset-recovery charges in respect of electricity consumed after the commencement of the bankruptcy case or that the nuclear asset-recovery property has been sold to us. If it were determined that the nuclear asset-recovery property had not been sold to us, and the security interest in favor of the bondholders did not attach to the applicable nuclear asset-recovery charges in respect of electricity consumed after the commencement of the bankruptcy case, then we would have an unsecured claim against DEF. If so, there would be delays and/or reductions in payments on the bonds. Whether or not a court determined that nuclear asset-recovery property had been sold to us pursuant to a sale agreement, no assurances can be given that a court would not rule that any nuclear asset-recovery charges relating to electricity consumed after the commencement of the bankruptcy could not be transferred to us or the indenture trustee.]

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset Owner made under the Treasury Plan shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition [, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.] [IESO: References to the Treasury Plan should be directory only, and a failure to comply with the Treasury Plan should not invalidate any incurrence of debt, transfer or grant of security.] Without limiting the foregoing, any Disposition that by its terms is intended to

constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of revenues or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.

(3) **Deemed Perfection and Priority of Dispositions** – At the time a Disposition is made, the absolute assignment of the property rights and interest in the Regulatory Asset subject to the Disposition shall be deemed [IESO: Consider here and elsewhere avoiding the use of the term "deemed"] to have been and shall be perfected [IESO: unless the Regulatory Asset is an account, perfection of an absolute transfer is not relevant] , vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall have priority over any liens in favour of such other persons. [IESO: the IESO's proposed statutory language attempted to buttress this disposition by providing for a contemporaneous divesting and vesting of statutory rights. This was intended to have the effect of divorcing the effectiveness of the disposition from the property analysis]

(4) Validity of Pledges – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge [IESO: is the intent that the security interest arise by agreement (in which case is it intended that the PPSA applies) or does it arise by operation of statute, in which case the PPSA would not apply, PPSA Section 4(1)(a))] , provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation. [IESO: References to the Treasury Plan should be directory only, and a failure to comply with the Treasury Plan should not invalidate any incurrence of debt, transfer or grant of security.]

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in accordance with the Treasury Plan [IESO: References to the Treasury Plan should be directory only, and a failure to comply with the Treasury Plan should not invalidate any incurrence of debt, transfer or grant of security] shall be deemed to have been and shall be perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner [IESO: Should address competing claims to the asset as opposed to the regulatory asset owner], irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and [the security interest in] such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act [IESO: note that registration of a financing statement is not excluded in (4);may want to consider registration of a financing statement under the PPSA as it is a simple act and may lessen the artificiality of the security interest] A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in revenues or other proceeds arising from the Transition Charge that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such revenues or other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge for informational purposes only under the [PPSA]. [IESO: see above]

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5 [IESO: Consider default rights of Pledgee]

(7) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner [IESO: consider in the co-ownership scenario whether an absolute assignee should be required to obtain the cooperation of the IESO], and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms [IESO: Is it necessary to provide that an agreement among named parties is binding upon those parties, or is it the intend to extend the binding effect to non-parties].

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all

purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) Principles and Parameters – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[9]:

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][10].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including

---

[9] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

[10] Consider if a quantitative limit needs to be included in the legislation.

to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.

(3) **Attribution Methodology** – The Fair Allocation Plan shall specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. [may have regard to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*

(4) **[Confirmation][Review] of the Fair Allocation Plan** – [OEB?] **[IESO: subject to accountant review.]**

Article 8 – The Treasury Plan

(1) **Power to Prepare and Implement the Treasury Plan** – The Administrative Agent shall prepare and propose the adoption of a Treasury Plan that is consistent with the principles, parameters, requirements and conditions set forth in Schedule 3, together with and subject to such conditions and requirements as may be specified in a further written order of the Minister of Energy or in accordance with the Regulation. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Treasury Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Treasury Plan.

(2) **Required Terms and Conditions of the Treasury Plan** – The Treasury Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Treasury Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule C.

(3) **Power to Review and Approve the Treasury Plan** – The Minister of Energy may by written order designate one or more persons to review and, if considered necessary, require and prescribe amendments of the Treasury Plan and may specify conditions and requirements in respect of such review and prescriptions as may be specified in such written order.

(4) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. **[IESO: References to the Treasury Plan should be directory only, and a failure to comply with the Treasury Plan should not invalidate any incurrence of debt, transfer or grant of security].** In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred **should not** exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group

contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Treasury Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Treasury Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(5) **Obligation to Apply IESO Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[11]

(6) **Non-Recourse** – The Treasury Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Invoicing Agent, and Alternative Collection Agent, the Administrative Agent, the OEB or the Province, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount [IESO: Not sure that follow this carve-out; consider impact on obligations incurred under regulatory asset purchase agreements]. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(7) **Incurrences are Binding** – Despite any failure to adhere to the Treasury Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure. [IESO: consider whether this can be expanded to cover conveyances of property and grants of security]

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

---

[11] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Province, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part.

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of the actual incremental costs incurred by such person of providing administrative or servicing services.]

Article 10 – Undertaking of the Province

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Province may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly. The Province undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Province.

(2) **Undertaking and Agreement** – The Province undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Province will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Province, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount,

including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Treasury Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Treasury Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of Ontario.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Treasury Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Treasury Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Treasury Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part

[or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Treasury Plan

Section [X] – Procedure to Adopt a Treasury Plan

(1) Submission of Treasury Plan – The person(s) designated by written order of the Minister of Energy under Section 8(1) shall prepare a Treasury Plan and submit it to the Minister of Energy and any person designed by the Minister of Energy under Section 8(2) to review such Treasury Plan [within the time period specified in such written order]/[within [•] days of such written order]. Such person(s) shall implement any changes proposed under Section [X](3) and submit the revised Treasury Plan to the **[OEB]** for approval within [within the time period specified in such written order]/[within [•] days of such written order].

(2) Content of Treasury Plan – Any Treasury Plan shall have regard to the following specifications:

a. A description of how the incurrence of Funding Obligations by present and future Designated Ratepayers will be on a basis that is consistent with their respective allocations of costs and benefits as contemplated in the Fair Allocation Plan;

b. The form, amount and timing of Funding Obligations under the Treasury Plan; and

c. the entities involved in the incurrence of Funding Obligations and execution of the Treasury Plan.

(3) Review of Treasury Plan– The Minister of Energy, or the person(s) designated by written order of the Minister of Energy under Section 8(2), shall review the Treasury Plan submitted in accordance with Section [X](1) and propose any changes to such Treasury Plan that are necessary or desirable to align the Treasury Plan with the requirements set out the [Minister's Order].

(4) Approval of Treasury Plan – The **[OEB]** shall have the power to and shall approve or disapprove of the Treasury Plan based solely on whether the Treasury Plan includes the specifications contemplated under Section [X](2) and whether those specifications [accord with] the assumptions, conditions, requirements and standards set out in the Treasury Plan and the order(s) of the Minister of Energy issued under Section 8(1) and 8(2). If the **[OEB]** fails to approve or disapprove any Treasury Plan within [30] days of [receiving such Treasury Plan],[12] the Treasury Plan is deemed to have been approved.

---

[12] Consider whether the Minister's order should set out timelines for each of steps contemplates by this Section [X], or whether these time periods should be hard-coded into the legislation.

Section [X] – Creation of the [OPG Financing Entity]

(1) Creation of the [OPG Financing Entity] – The person(s) designated by written order of the Minister of Energy under Section 8(1) to implement a Treasury Plan may [create] one or many entities, each known as a "OPG Financing Entity" having regard to the following principles:

a. No part of the revenue or assets of a OPG Financing Entity shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. OPG Financing Entity shall be authorized to:

i. issue bonds contemplated by a Treasury Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Treasury Plan and for administrative services;

iii. pledge the Regulatory Asset to secure bonds contemplated by a Treasury Plan.

c. So long as any bonds contemplated under a Treasury Plan are outstanding, OPG Financing Entity shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity.

d. OPG Financing Entity shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Treasury Plan. [IESO: Consider whether the Treasury Plan can be directory only, non-compliance should not go to validity or enforceability].

e. OPG Financing Entity shall cause the proceeds of any bond issuance contemplated under a Treasury Plan to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Treasury Plan. [IESO: Consider whether the Treasury Plan can be directory only, non-compliance should not go to ability to pay interest]

f. So long as the Regulatory Asset is pledged to secure bonds issued under a Treasury Act, the OPG Financing Entity must apply revenues from the collection of Transition Charges only to repay bonds and other costs as provided for in a Treasury Plan.

[IESO: Consider whether it is helpful to investors if some aspects of the SPV requirements applicable to the OPG Financing Entity can be incorporated into the statute]

(2) **Governance of [OPG Financing Entity]** – A person or persons that effect the creation of OPG Financing Entity shall design the governance of OPG Financing Entity having regard to the following principles:

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

Hi Carolyn. Here is my feedback. CAPS below. Steve

Subject: priorities

Hi – these are the things I'm worried about:

1. The transfer language. Steve, I know you are on this. [JUST FINISHED CALL WITH PH/MF. MUCH NAVEL GAZING, STILL. PH WILL GENERATE REVISIONS TO "TRANSFER" AND S.22. THIS SHOULD BE ACCOMMODATED TO ENSURE THESE GUYS DON'T RESILE FROM THEIR OPINION REQUIREMENTS LATER ON A DEAL. I APPRECIATE THIS IS VERY FRUSTRATING FOR YOU, SORRY.

2. Who will do the fair allocation? Leave this with me but if you are aware of an accounting reason why it should not be IESO, please remind me. The Deputy seems to be waivering on OPG. I thought IESO was too close to government and it was preferable not to have the government involved (I'm thinking of Alan Hibben's comments). [I AM NOT AWARE OF ANY IMPEDIMENT, OTHER THAN EXPERTISE AND POLITICAL WILL. COULD WE SAY MINISTER OR CABINET, BASED ON/HAVING REGARD TO THE ADVICE OF EXPERTS (NAVIGANT)?

3. Torys' comments ##5, 10, 11, 12, 17 and 18. [I RESPONDED A BIT EARLIER. HAPPY TO DISCUSS.]

4. How to respond to Oslers comments? Most of their suggestions aren't necessary or weren't adopted. Should we do a call with Rocco and Elliot to walk them through? [PROBABLY, ALTHOUGH IT IS PROBABLY TOO LATE BASED ON YOUR SCHEDULE, EXCEPT PERHAPS TO APPEASE THEM (WHICH IS PROBABLY NOT LIKELY).]

5. I'm still struggling with s. 15xx(1.2) (calculation of the fair allocation amount as the sum of 2 things) and s. 16xx(4) (limitation, first 5 year period). I'm not sure that either work and if they do, I don't understand them. Please take a look at these provisions in particular. [BEST TO TALK LIVE, WITH TARA, ON THIS]

6. The s. 5 undertaking. Thank you for the advice on this so far. We need to land this provision and I will ask my colleague Paul Johnson to follow up. I am nervous about introducing a new approach without brokering it with OPG, the dealers and my own government colleagues. [I AGREE, ALTHOUGH AS I SAID I THINK THE PROHIBITION GAPS MAY BE SOLVED WITH THE GOVERNMENT'S CONTRACT COMMITMENT]

I sent the attached instructions last night which tried to address the comments that Adam sent on the 25th, Stikemans' comments (which were generally easy to deal with), Torys' comments #3, 6, 9, 13, 14, 16 and Oslers' comments to the limited extent I agreed. Dan also sent instructions on Part II, which he assures me largely address the comments raised by various parties on that section. He will work on a provision related to rates after year 5 today. That provision will tie in the fair allocation and any clean energy adjustments, to get us starting to climb the curve.

Dan will deal with the OEB today.

Pens down means that Tara will get as far as she gets but if she doesn't get to certain instructions, she doesn't get there (to my frustration). All this to say that the earlier we can get to her, the better, which is why we sent what we could last night.

We appreciate all of your help.

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be

required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

> "Absolute Assignee" means a person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset.
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.
>
> "Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Treasury Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, the Regulatory Asset Owner under the Treasury Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Regulatory Asset Owner or incurred by the Regulatory

Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Treasury Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Invoicing Agent, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Treasury Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Treasury Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owner.

"Alternative Invoicing Agent" means a person appointed under Section 4(8) to assume the invoicing and other activities of any Electricity Distributor under Article 4, as agent for and on behalf of the Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group.

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the sum of all Transition Charge Collections for the Reference Period.[2]

---

[1] A key question will be how the overall costs will be spread across the rate base. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [third] Business Day immediately preceding the first day of the Reference Period.]

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Invoicing Agent) in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of a residence located in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund,

collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Treasury Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Treasury Plan.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies) incurred by the Regulatory Asset Owner under the Treasury Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment attributable to the Power Contracts in accordance with the Fair Allocation Plan.

"Generator" means a generator of electricity that is subject to this Act.

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods,

exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge, right of set-off or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom [or for whose benefit] a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3]

---

[3] Should this contemplate the possibility of additional or amended power contracts?

"Province" means Her Majesty the Queen in right of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in Ontario] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected to the transmission and distribution system assets located in Ontario and who are taking electric delivery service within Ontario, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Regulated Asset Owner by applying the net proceeds obtained by the Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1).

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the an Electricity Distributor deposits Transition Charge Collections; (b) for IESO, any bank account into which IESO deposits Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means, collectively, (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

---

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act.

"Settlement Date" means the [last Business Day of any month].

"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Transition Charge" means, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

---

[5] See footnote 1, above.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the Actual Finance Amount for the Reference Period, plus (c) the Collected Amount Adjustment.

"Undertaking of the Province" means the undertaking of the Province given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge attributed to it and specified as such in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Invoicing Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer and recorded in an Electricity Invoice shall [, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge,] constitute indebtedness of the Ratepayer to the Regulatory Asset Owner. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deeded to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred in compliance with the Treasury Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Treasury Plan or as a result of amendments to the Treasury Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was

properly incurred in accordance with the Treasury Plan. In no case shall a Funding Obligation incurred under the Treasury Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Invoicing Agent shall, as an agent of the Regulatory Asset Owner, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Invoicing Agent to the Ratepayer in respect of such Reference Period.

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][6] or if applicable the [Alternative Collection Agent][7] shall calculate the Period Transition Charge applicable to the Reference Period.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Invoicing Agent of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by [IESO] and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to

---

[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today-ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[7] Should this be a designated government official, rather than an agent appointed by investors?

the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, bill and invoice the Transition Charges.

(7) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Invoicing Agent** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Invoicing Agent to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Invoicing Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Invoicing Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Invoicing Agent to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Invoicing Agent or any [Alternative Collection Agent] to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to accept and collect Electricity Distributor Remittances.

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(6) **IESO Remittances** – On each [Settlement Date], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in Ontario or invoices or collects electricity distribution rates in Ontario[8], then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collect of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

---

[8] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent, any owner of electricity distribution system assets in Ontario or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to an over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owner.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense0 by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.]

(13) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in Ontario or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]

(14) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity

Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute a property right and interest of the Regulatory Asset Owner in the following:

a. the present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

b. the present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and invoice the Transition Charges in accordance with Article 4;

c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

e. all Transition Charge Collections;

f. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

g. all Related Rights; and

h. all proceeds of or derived from the foregoing.

The Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset

Owner made under the Treasury Plan shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition [, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.] Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of revenues or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.

(3) **Deemed Perfection and Priority of Dispositions** – At the time a Disposition is made, the absolute assignment of the property rights and interest in the Regulatory Asset subject to the Disposition shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall have priority over any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in accordance with the Treasury Plan shall be deemed to have been and shall be

perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act. A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in revenues or other proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such revenues or other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[9]:

---

[9] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][10].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.

(3) Attribution Methodology – The Fair Allocation Plan shall specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. [may have regard

---

basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

[10] Consider if a quantitative limit needs to be included in the legislation.

to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*

(4) **[Confirmation][Review] of the Fair Allocation Plan** – [OEB?]

Article 8 – The Treasury Plan

(1) **Power to Prepare and Implement the Treasury Plan** – The Administrative Agent shall prepare and propose the adoption of a Treasury Plan that is consistent with the principles, parameters, requirements and conditions set forth in Schedule 3, together with and subject to such conditions and requirements as may be specified in a further written order of the Minister of Energy or in accordance with the Regulation. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Treasury Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Treasury Plan.

(2) **Required Terms and Conditions of the Treasury Plan** – The Treasury Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Treasury Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule C.

(3) **Power to Review and Approve the Treasury Plan** – The Minister of Energy may by written order designate one or more persons to review and, if considered necessary, require and prescribe amendments of the Treasury Plan and may specify conditions and requirements in respect of such review and prescriptions as may be specified in such written order.

(4) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Treasury Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Treasury Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(5) **Obligation to Apply IESO Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[11]

(6) **Non-Recourse** – The Treasury Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Invoicing Agent, and Alternative Collection Agent, the Administrative Agent, the OEB or the Province, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(7) **Incurrences are Binding** – Despite any failure to adhere to the Treasury Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Province, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part.

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of

---

[11] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

the actual incremental costs incurred by such person of providing administrative or servicing services.]

Article 10 – Undertaking of the Province

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Province may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly. The Province undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Province.

(2) **Undertaking and Agreement** – The Province undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Province will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Province, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Treasury Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Treasury Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of Ontario.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Treasury Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Treasury Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Treasury Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Treasury Plan

Section [X] – Procedure to Adopt a Treasury Plan

(1) Submission of Treasury Plan – The person(s) designated by written order of the Minister of Energy under Section 8(1) shall prepare a Treasury Plan and submit it to the Minister of Energy and any person designed by the Minister of Energy under Section 8(2) to review such Treasury Plan [within the time period specified in such written order]/[within [•] days of such written order]. Such person(s) shall implement any changes proposed under Section [X](3) and submit the revised Treasury Plan to the **[OEB]** for approval within [within the time period specified in such written order]/[within [•] days of such written order].

(2) Content of Treasury Plan – Any Treasury Plan shall have regard to the following specifications:

a. A description of how the incurrence of Funding Obligations by present and future Designated Ratepayers will be on a basis that is consistent with their respective allocations of costs and benefits as contemplated in the Fair Allocation Plan;

b. The form, amount and timing of Funding Obligations under the Treasury Plan; and

c. the entities involved in the incurrence of Funding Obligations and execution of the Treasury Plan.

(3) Review of Treasury Plan– The Minister of Energy, or the person(s) designated by written order of the Minister of Energy under Section 8(2), shall review the Treasury Plan submitted in accordance with Section [X](1) and propose any changes to such Treasury Plan that are necessary or desirable to align the Treasury Plan with the requirements set out the [Minister's Order].

(4) Approval of Treasury Plan – The **[OEB]** shall have the power to and shall approve or disapprove of the Treasury Plan based solely on whether the Treasury Plan includes the specifications contemplated under Section [X](2) and whether those specifications [accord with] the assumptions, conditions, requirements and standards set out in the Treasury Plan and the order(s) of the Minister of Energy issued under Section 8(1) and 8(2). If the **[OEB]** fails to approve or disapprove any Treasury Plan within [30] days of [receiving such Treasury Plan],[12] the Treasury Plan is deemed to have been approved.

---

[12] Consider whether the Minister's order should set out timelines for each of steps contemplates by this Section [X], or whether these time periods should be hard-coded into the legislation.

Section [X] – Creation of the [OPG Financing Entity]

(1) Creation of the [OPG Financing Entity] – The person(s) designated by written order of the Minister of Energy under Section 8(1) to implement a Treasury Plan may [create] one or many entities, each known as a "OPG Financing Entity" having regard to the following principles:

a. No part of the revenue or assets of a OPG Financing Entity shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. OPG Financing Entity shall be authorized to:

i. issue bonds contemplated by a Treasury Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Treasury Plan and for administrative services;

iii. pledge the Regulatory Asset to secure bonds contemplated by a Treasury Plan.

c. So long as any bonds contemplated under a Treasury Plan are outstanding, OPG Financing Entity shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity.

d. OPG Financing Entity shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Treasury Plan.

e. OPG Financing Entity shall cause the proceeds of any bond issuance contemplated under a Treasury Plan to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Treasury Plan.

f. So long as the Regulatory Asset is pledged to secure bonds issued under a Treasury Act, the OPG Financing Entity must apply revenues from the collection of Transition Charges only to repay bonds and other costs as provided for in a Treasury Plan.

(2) Governance of [OPG Financing Entity] – A person or persons that effect the creation of OPG Financing Entity shall design the governance of OPG Financing Entity having regard to the following principles:

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be

required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

"Absolute Assignee" means a person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset.

"Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.

"Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Treasury Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, the Regulatory Asset Owner under the Treasury Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Regulatory Asset Owner or incurred by the Regulatory

Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Treasury Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Invoicing Agent, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Treasury Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Treasury Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owner.

"Alternative Invoicing Agent" means a person appointed under Section 4(8) to assume the invoicing and other activities of any Electricity Distributor under Article 4, as agent for and on behalf of the Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group.

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the sum of all Transition Charge Collections for the Reference Period.[2]

---

[1] A key question will be how the overall costs will be spread across the rate base. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [third] Business Day immediately preceding the first day of the Reference Period.]

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Invoicing Agent) in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of a residence located in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund,

collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Treasury Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Treasury Plan.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies) incurred by the Regulatory Asset Owner under the Treasury Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment attributable to the Power Contracts in accordance with the Fair Allocation Plan.

"Generator" means a generator of electricity that is subject to this Act.

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods,

exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge, right of set-off or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom [or for whose benefit] a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3]

---

[3] Should this contemplate the possibility of additional or amended power contracts?

"Province" means Her Majesty the Queen in right of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in Ontario] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected to the transmission and distribution system assets located in Ontario and who are taking electric delivery service within Ontario, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Regulated Asset Owner by applying the net proceeds obtained by the Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1).

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the an Electricity Distributor deposits Transition Charge Collections; (b) for IESO, any bank account into which IESO deposits Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means, collectively, (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

---

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act.

"Settlement Date" means the [last Business Day of any month].

"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Transition Charge" means, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

---

[5] See footnote 1, above.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the Actual Finance Amount for the Reference Period, plus (c) the Collected Amount Adjustment.

"Undertaking of the Province" means the undertaking of the Province given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge attributed to it and specified as such in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Invoicing Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer and recorded in an Electricity Invoice shall [, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge,] constitute indebtedness of the Ratepayer to the Regulatory Asset Owner. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deeded to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred in compliance with the Treasury Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Treasury Plan or as a result of amendments to the Treasury Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was

properly incurred in accordance with the Treasury Plan. In no case shall a Funding Obligation incurred under the Treasury Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Invoicing Agent shall, as an agent of the Regulatory Asset Owner, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Invoicing Agent to the Ratepayer in respect of such Reference Period.

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][6] or if applicable the [Alternative Collection Agent][7] shall calculate the Period Transition Charge applicable to the Reference Period.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Invoicing Agent of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by [IESO] and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to

---

[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today-ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[7] Should this be a designated government official, rather than an agent appointed by investors?

the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, bill and invoice the Transition Charges.

(7) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Invoicing Agent** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Invoicing Agent to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Invoicing Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Invoicing Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Invoicing Agent to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Invoicing Agent or any [Alternative Collection Agent] to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to accept and collect Electricity Distributor Remittances.

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(6) **IESO Remittances** – On each [Settlement Date], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in Ontario or invoices or collects electricity distribution rates in Ontario[8], then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collect of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

---

[8] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent, any owner of electricity distribution system assets in Ontario or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to an over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owner.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense0 by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.]

(13) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in Ontario or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]

(14) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity

Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute a property right and interest of the Regulatory Asset Owner in the following:

a. the present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

b. the present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and invoice the Transition Charges in accordance with Article 4;

c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

e. all Transition Charge Collections;

f. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

g. all Related Rights; and

h. all proceeds of or derived from the foregoing.

The Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset

Owner made under the Treasury Plan shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition [, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.] Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of revenues or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.

(3) **Deemed Perfection and Priority of Dispositions** – At the time a Disposition is made, the absolute assignment of the property rights and interest in the Regulatory Asset subject to the Disposition shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall have priority over any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in accordance with the Treasury Plan shall be deemed to have been and shall be

perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act. A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in revenues or other proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such revenues or other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[9]:

---

[9] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][10].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.

(3) **Attribution Methodology** – The Fair Allocation Plan shall specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. [may have regard

---

basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

[10] Consider if a quantitative limit needs to be included in the legislation.

to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*

(4) **[Confirmation][Review] of the Fair Allocation Plan** – [OEB?]

Article 8 – The Treasury Plan

(1) **Power to Prepare and Implement the Treasury Plan** – The Administrative Agent shall prepare and propose the adoption of a Treasury Plan that is consistent with the principles, parameters, requirements and conditions set forth in Schedule 3, together with and subject to such conditions and requirements as may be specified in a further written order of the Minister of Energy or in accordance with the Regulation. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Treasury Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Treasury Plan.

(2) **Required Terms and Conditions of the Treasury Plan** – The Treasury Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Treasury Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule C.

(3) **Power to Review and Approve the Treasury Plan** – The Minister of Energy may by written order designate one or more persons to review and, if considered necessary, require and prescribe amendments of the Treasury Plan and may specify conditions and requirements in respect of such review and prescriptions as may be specified in such written order.

(4) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Treasury Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Treasury Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(5) **Obligation to Apply IESO Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[11]

(6) **Non-Recourse** – The Treasury Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Invoicing Agent, and Alternative Collection Agent, the Administrative Agent, the OEB or the Province, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(7) **Incurrences are Binding** – Despite any failure to adhere to the Treasury Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Province, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part.

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of

---

[11] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

the actual incremental costs incurred by such person of providing administrative or servicing services.]

Article 10 – Undertaking of the Province

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Province may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly. The Province undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Province.

(2) **Undertaking and Agreement** – The Province undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Province will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Province, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Treasury Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Treasury Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of Ontario.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Treasury Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Treasury Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Treasury Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Treasury Plan

Section [X] – Procedure to Adopt a Treasury Plan

(1) Submission of Treasury Plan – The person(s) designated by written order of the Minister of Energy under Section 8(1) shall prepare a Treasury Plan and submit it to the Minister of Energy and any person designed by the Minister of Energy under Section 8(2) to review such Treasury Plan [within the time period specified in such written order]/[within [•] days of such written order]. Such person(s) shall implement any changes proposed under Section [X](3) and submit the revised Treasury Plan to the **[OEB]** for approval within [within the time period specified in such written order]/[within [•] days of such written order].

(2) Content of Treasury Plan – Any Treasury Plan shall have regard to the following specifications:

a. A description of how the incurrence of Funding Obligations by present and future Designated Ratepayers will be on a basis that is consistent with their respective allocations of costs and benefits as contemplated in the Fair Allocation Plan;

b. The form, amount and timing of Funding Obligations under the Treasury Plan; and

c. the entities involved in the incurrence of Funding Obligations and execution of the Treasury Plan.

(3) Review of Treasury Plan– The Minister of Energy, or the person(s) designated by written order of the Minister of Energy under Section 8(2), shall review the Treasury Plan submitted in accordance with Section [X](1) and propose any changes to such Treasury Plan that are necessary or desirable to align the Treasury Plan with the requirements set out the [Minister's Order].

(4) Approval of Treasury Plan – The **[OEB]** shall have the power to and shall approve or disapprove of the Treasury Plan based solely on whether the Treasury Plan includes the specifications contemplated under Section [X](2) and whether those specifications [accord with] the assumptions, conditions, requirements and standards set out in the Treasury Plan and the order(s) of the Minister of Energy issued under Section 8(1) and 8(2). If the **[OEB]** fails to approve or disapprove any Treasury Plan within [30] days of [receiving such Treasury Plan],[12] the Treasury Plan is deemed to have been approved.

---

[12] Consider whether the Minister's order should set out timelines for each of steps contemplates by this Section [X], or whether these time periods should be hard-coded into the legislation.

Section [X] – Creation of the [OPG Financing Entity]

(1) Creation of the [OPG Financing Entity] – The person(s) designated by written order of the Minister of Energy under Section 8(1) to implement a Treasury Plan may [create] one or many entities, each known as a "OPG Financing Entity" having regard to the following principles:

a. No part of the revenue or assets of a OPG Financing Entity shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. OPG Financing Entity shall be authorized to:

i. issue bonds contemplated by a Treasury Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Treasury Plan and for administrative services;

iii. pledge the Regulatory Asset to secure bonds contemplated by a Treasury Plan.

c. So long as any bonds contemplated under a Treasury Plan are outstanding, OPG Financing Entity shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity.

d. OPG Financing Entity shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Treasury Plan.

e. OPG Financing Entity shall cause the proceeds of any bond issuance contemplated under a Treasury Plan to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Treasury Plan.

f. So long as the Regulatory Asset is pledged to secure bonds issued under a Treasury Act, the OPG Financing Entity must apply revenues from the collection of Transition Charges only to repay bonds and other costs as provided for in a Treasury Plan.

(2) Governance of [OPG Financing Entity] – A person or persons that effect the creation of OPG Financing Entity shall design the governance of OPG Financing Entity having regard to the following principles:

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be

required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

"Absolute Assignee" means a person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset.

"Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.

"Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Treasury Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, the Regulatory Asset Owner under the Treasury Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Regulatory Asset Owner or incurred by the Regulatory

Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Treasury Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Invoicing Agent, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Treasury Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Treasury Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owner.

"Alternative Invoicing Agent" means a person appointed under Section 4(8) to assume the invoicing and other activities of any Electricity Distributor under Article 4, as agent for and on behalf of the Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group.

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the sum of all Transition Charge Collections for the Reference Period.[2]

---

[1] A key question will be how the overall costs will be spread across the rate base. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [third] Business Day immediately preceding the first day of the Reference Period.]

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Invoicing Agent) in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of a residence located in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund,

collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Treasury Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Treasury Plan.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies) incurred by the Regulatory Asset Owner under the Treasury Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment attributable to the Power Contracts in accordance with the Fair Allocation Plan.

"Generator" means a generator of electricity that is subject to this Act.

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods,

exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge, right of set-off or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom [or for whose benefit] a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3]

---

[3] Should this contemplate the possibility of additional or amended power contracts?

"Province" means Her Majesty the Queen in right of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in Ontario] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected to the transmission and distribution system assets located in Ontario and who are taking electric delivery service within Ontario, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Regulated Asset Owner by applying the net proceeds obtained by the Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1).

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the an Electricity Distributor deposits Transition Charge Collections; (b) for IESO, any bank account into which IESO deposits Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means, collectively, (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

---

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act.

"Settlement Date" means the [last Business Day of any month].

"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Transition Charge" means, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

---

[5] See footnote 1, above.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the Actual Finance Amount for the Reference Period, plus (c) the Collected Amount Adjustment.

"Undertaking of the Province" means the undertaking of the Province given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge attributed to it and specified as such in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Invoicing Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer and recorded in an Electricity Invoice shall [, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge,] constitute indebtedness of the Ratepayer to the Regulatory Asset Owner. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deeded to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred in compliance with the Treasury Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Treasury Plan or as a result of amendments to the Treasury Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was

properly incurred in accordance with the Treasury Plan. In no case shall a Funding Obligation incurred under the Treasury Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Invoicing Agent shall, as an agent of the Regulatory Asset Owner, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Invoicing Agent to the Ratepayer in respect of such Reference Period.

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][6] or if applicable the [Alternative Collection Agent][7] shall calculate the Period Transition Charge applicable to the Reference Period.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Invoicing Agent of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by [IESO] and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to

---

[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today- ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[7] Should this be a designated government official, rather than an agent appointed by investors?

the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, bill and invoice the Transition Charges.

(7) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Invoicing Agent** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Invoicing Agent to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Invoicing Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Invoicing Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Invoicing Agent to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Invoicing Agent or any [Alternative Collection Agent] to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to accept and collect Electricity Distributor Remittances.

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(6) **IESO Remittances** – On each [Settlement Date], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in Ontario or invoices or collects electricity distribution rates in Ontario[8], then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collect of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

---

[8] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent, any owner of electricity distribution system assets in Ontario or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to an over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owner.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense0 by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.]

(13) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in Ontario or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]

(14) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity

Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute a property right and interest of the Regulatory Asset Owner in the following:

a. the present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

b. the present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and invoice the Transition Charges in accordance with Article 4;

c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

e. all Transition Charge Collections;

f. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

g. all Related Rights; and

h. all proceeds of or derived from the foregoing.

The Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset

Owner made under the Treasury Plan shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition [, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.] Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of revenues or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.

(3) **Deemed Perfection and Priority of Dispositions** – At the time a Disposition is made, the absolute assignment of the property rights and interest in the Regulatory Asset subject to the Disposition shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall have priority over any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in accordance with the Treasury Plan shall be deemed to have been and shall be

perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act. A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in revenues or other proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such revenues or other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[9]:

---

[9] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][10].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.

(3) Attribution Methodology – The Fair Allocation Plan shall specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. [may have regard

---

basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

[10] Consider if a quantitative limit needs to be included in the legislation.

to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*

(4) **[Confirmation][Review] of the Fair Allocation Plan** – [OEB?]

Article 8 – The Treasury Plan

(1) **Power to Prepare and Implement the Treasury Plan** – The Administrative Agent shall prepare and propose the adoption of a Treasury Plan that is consistent with the principles, parameters, requirements and conditions set forth in Schedule 3, together with and subject to such conditions and requirements as may be specified in a further written order of the Minister of Energy or in accordance with the Regulation. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Treasury Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Treasury Plan.

(2) **Required Terms and Conditions of the Treasury Plan** – The Treasury Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Treasury Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule C.

(3) **Power to Review and Approve the Treasury Plan** – The Minister of Energy may by written order designate one or more persons to review and, if considered necessary, require and prescribe amendments of the Treasury Plan and may specify conditions and requirements in respect of such review and prescriptions as may be specified in such written order.

(4) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Treasury Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Treasury Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(5) **Obligation to Apply IESO Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[11]

(6) **Non-Recourse** – The Treasury Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Invoicing Agent, and Alternative Collection Agent, the Administrative Agent, the OEB or the Province, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(7) **Incurrences are Binding** – Despite any failure to adhere to the Treasury Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Province, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part.

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of

---

[11] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

the actual incremental costs incurred by such person of providing administrative or servicing services.]

Article 10 – Undertaking of the Province

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Province may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly. The Province undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Province.

(2) **Undertaking and Agreement** – The Province undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Province will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Province, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Treasury Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Treasury Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of Ontario.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Treasury Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Treasury Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Treasury Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Treasury Plan

Section [X] – Procedure to Adopt a Treasury Plan

(1) Submission of Treasury Plan – The person(s) designated by written order of the Minister of Energy under Section 8(1) shall prepare a Treasury Plan and submit it to the Minister of Energy and any person designed by the Minister of Energy under Section 8(2) to review such Treasury Plan [within the time period specified in such written order]/[within [•] days of such written order]. Such person(s) shall implement any changes proposed under Section [X](3) and submit the revised Treasury Plan to the **[OEB]** for approval within [within the time period specified in such written order]/[within [•] days of such written order].

(2) Content of Treasury Plan – Any Treasury Plan shall have regard to the following specifications:

a. A description of how the incurrence of Funding Obligations by present and future Designated Ratepayers will be on a basis that is consistent with their respective allocations of costs and benefits as contemplated in the Fair Allocation Plan;

b. The form, amount and timing of Funding Obligations under the Treasury Plan; and

c. the entities involved in the incurrence of Funding Obligations and execution of the Treasury Plan.

(3) Review of Treasury Plan– The Minister of Energy, or the person(s) designated by written order of the Minister of Energy under Section 8(2), shall review the Treasury Plan submitted in accordance with Section [X](1) and propose any changes to such Treasury Plan that are necessary or desirable to align the Treasury Plan with the requirements set out the [Minister's Order].

(4) Approval of Treasury Plan – The **[OEB]** shall have the power to and shall approve or disapprove of the Treasury Plan based solely on whether the Treasury Plan includes the specifications contemplated under Section [X](2) and whether those specifications [accord with] the assumptions, conditions, requirements and standards set out in the Treasury Plan and the order(s) of the Minister of Energy issued under Section 8(1) and 8(2). If the **[OEB]** fails to approve or disapprove any Treasury Plan within [30] days of [receiving such Treasury Plan],[12] the Treasury Plan is deemed to have been approved.

---

[12] Consider whether the Minister's order should set out timelines for each of steps contemplates by this Section [X], or whether these time periods should be hard-coded into the legislation.

Section [X] – Creation of the [OPG Financing Entity]

(1) Creation of the [OPG Financing Entity] – The person(s) designated by written order of the Minister of Energy under Section 8(1) to implement a Treasury Plan may [create] one or many entities, each known as a "OPG Financing Entity" having regard to the following principles:

a. No part of the revenue or assets of a OPG Financing Entity shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. OPG Financing Entity shall be authorized to:

i. issue bonds contemplated by a Treasury Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Treasury Plan and for administrative services;

iii. pledge the Regulatory Asset to secure bonds contemplated by a Treasury Plan.

c. So long as any bonds contemplated under a Treasury Plan are outstanding, OPG Financing Entity shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity.

d. OPG Financing Entity shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Treasury Plan.

e. OPG Financing Entity shall cause the proceeds of any bond issuance contemplated under a Treasury Plan to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Treasury Plan.

f. So long as the Regulatory Asset is pledged to secure bonds issued under a Treasury Act, the OPG Financing Entity must apply revenues from the collection of Transition Charges only to repay bonds and other costs as provided for in a Treasury Plan.

(2) Governance of [OPG Financing Entity] – A person or persons that effect the creation of OPG Financing Entity shall design the governance of OPG Financing Entity having regard to the following principles:

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be

required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

"Absolute Assignee" means a person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset.

"Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.

"Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Treasury Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, the Regulatory Asset Owner under the Treasury Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Regulatory Asset Owner or incurred by the Regulatory

Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Treasury Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Invoicing Agent, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Treasury Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Treasury Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owner.

"Alternative Invoicing Agent" means a person appointed under Section 4(8) to assume the invoicing and other activities of any Electricity Distributor under Article 4, as agent for and on behalf of the Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group.

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the sum of all Transition Charge Collections for the Reference Period.[2]

---

[1] A key question will be how the overall costs will be spread across the rate base. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [third] Business Day immediately preceding the first day of the Reference Period.]

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Invoicing Agent) in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of a residence located in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund,

collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Treasury Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Treasury Plan.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies) incurred by the Regulatory Asset Owner under the Treasury Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment attributable to the Power Contracts in accordance with the Fair Allocation Plan.

"Generator" means a generator of electricity that is subject to this Act.

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods,

exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge, right of set-off or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom [or for whose benefit] a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3]

---

[3] Should this contemplate the possibility of additional or amended power contracts?

"Province" means Her Majesty the Queen in right of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in Ontario] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected to the transmission and distribution system assets located in Ontario and who are taking electric delivery service within Ontario, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Regulated Asset Owner by applying the net proceeds obtained by the Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1).

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the an Electricity Distributor deposits Transition Charge Collections; (b) for IESO, any bank account into which IESO deposits Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means, collectively, (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

---

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act.

"Settlement Date" means the [last Business Day of any month].

"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Transition Charge" means, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

---

[5] See footnote 1, above.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the Actual Finance Amount for the Reference Period, plus (c) the Collected Amount Adjustment.

"Undertaking of the Province" means the undertaking of the Province given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge attributed to it and specified as such in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Invoicing Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer and recorded in an Electricity Invoice shall [, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge,] constitute indebtedness of the Ratepayer to the Regulatory Asset Owner. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deeded to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred in compliance with the Treasury Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Treasury Plan or as a result of amendments to the Treasury Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was

properly incurred in accordance with the Treasury Plan. In no case shall a Funding Obligation incurred under the Treasury Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Invoicing Agent shall, as an agent of the Regulatory Asset Owner, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Invoicing Agent to the Ratepayer in respect of such Reference Period.

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][6] or if applicable the [Alternative Collection Agent][7] shall calculate the Period Transition Charge applicable to the Reference Period.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Invoicing Agent of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by [IESO] and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to

---

[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today- ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[7] Should this be a designated government official, rather than an agent appointed by investors?

the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, bill and invoice the Transition Charges.

(7) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Invoicing Agent** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Invoicing Agent to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Invoicing Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Invoicing Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Invoicing Agent to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Invoicing Agent or any [Alternative Collection Agent] to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to accept and collect Electricity Distributor Remittances.

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(6) **IESO Remittances** – On each [Settlement Date], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in Ontario or invoices or collects electricity distribution rates in Ontario[8], then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collect of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

---

[8] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent, any owner of electricity distribution system assets in Ontario or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to an over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owner.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense0 by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.]

(13) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in Ontario or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]

(14) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity

Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute a property right and interest of the Regulatory Asset Owner in the following:

a. the present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

b. the present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and invoice the Transition Charges in accordance with Article 4;

c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

e. all Transition Charge Collections;

f. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

g. all Related Rights; and

h. all proceeds of or derived from the foregoing.

The Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset

Owner made under the Treasury Plan shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition [, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.] Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of revenues or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.

(3) **Deemed Perfection and Priority of Dispositions** – At the time a Disposition is made, the absolute assignment of the property rights and interest in the Regulatory Asset subject to the Disposition shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall have priority over any liens in favour of such other persons.

(4) Validity of Pledges – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in accordance with the Treasury Plan shall be deemed to have been and shall be

perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act. A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in revenues or other proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such revenues or other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[9]:

---

[9] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][10].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.

(3) Attribution Methodology – The Fair Allocation Plan shall specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. [may have regard

---

basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

[10] Consider if a quantitative limit needs to be included in the legislation.

to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*

(4) **[Confirmation][Review] of the Fair Allocation Plan** – [OEB?]

Article 8 – The Treasury Plan

(1) **Power to Prepare and Implement the Treasury Plan** – The Administrative Agent shall prepare and propose the adoption of a Treasury Plan that is consistent with the principles, parameters, requirements and conditions set forth in Schedule 3, together with and subject to such conditions and requirements as may be specified in a further written order of the Minister of Energy or in accordance with the Regulation. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Treasury Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Treasury Plan.

(2) **Required Terms and Conditions of the Treasury Plan** – The Treasury Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Treasury Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule C.

(3) **Power to Review and Approve the Treasury Plan** – The Minister of Energy may by written order designate one or more persons to review and, if considered necessary, require and prescribe amendments of the Treasury Plan and may specify conditions and requirements in respect of such review and prescriptions as may be specified in such written order.

(4) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Treasury Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Treasury Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(5) **Obligation to Apply IESO Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[11]

(6) **Non-Recourse** – The Treasury Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Invoicing Agent, and Alternative Collection Agent, the Administrative Agent, the OEB or the Province, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(7) **Incurrences are Binding** – Despite any failure to adhere to the Treasury Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Province, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part.

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of

---

[11] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

the actual incremental costs incurred by such person of providing administrative or servicing services.]

Article 10 – Undertaking of the Province

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Province may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly. The Province undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Province.

(2) **Undertaking and Agreement** – The Province undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Province will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Province, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Treasury Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Treasury Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of Ontario.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Treasury Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Treasury Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Treasury Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Treasury Plan

Section [X] – Procedure to Adopt a Treasury Plan

(1) Submission of Treasury Plan – The person(s) designated by written order of the Minister of Energy under Section 8(1) shall prepare a Treasury Plan and submit it to the Minister of Energy and any person designed by the Minister of Energy under Section 8(2) to review such Treasury Plan [within the time period specified in such written order]/[within [•] days of such written order]. Such person(s) shall implement any changes proposed under Section [X](3) and submit the revised Treasury Plan to the **[OEB]** for approval within [within the time period specified in such written order]/[within [•] days of such written order].

(2) Content of Treasury Plan – Any Treasury Plan shall have regard to the following specifications:

a. A description of how the incurrence of Funding Obligations by present and future Designated Ratepayers will be on a basis that is consistent with their respective allocations of costs and benefits as contemplated in the Fair Allocation Plan;

b. The form, amount and timing of Funding Obligations under the Treasury Plan; and

c. the entities involved in the incurrence of Funding Obligations and execution of the Treasury Plan.

(3) Review of Treasury Plan– The Minister of Energy, or the person(s) designated by written order of the Minister of Energy under Section 8(2), shall review the Treasury Plan submitted in accordance with Section [X](1) and propose any changes to such Treasury Plan that are necessary or desirable to align the Treasury Plan with the requirements set out the [Minister's Order].

(4) Approval of Treasury Plan – The **[OEB]** shall have the power to and shall approve or disapprove of the Treasury Plan based solely on whether the Treasury Plan includes the specifications contemplated under Section [X](2) and whether those specifications [accord with] the assumptions, conditions, requirements and standards set out in the Treasury Plan and the order(s) of the Minister of Energy issued under Section 8(1) and 8(2). If the **[OEB]** fails to approve or disapprove any Treasury Plan within [30] days of [receiving such Treasury Plan],[12] the Treasury Plan is deemed to have been approved.

---

[12] Consider whether the Minister's order should set out timelines for each of steps contemplates by this Section [X], or whether these time periods should be hard-coded into the legislation.

Section [X] – Creation of the [OPG Financing Entity]

(1) Creation of the [OPG Financing Entity] – The person(s) designated by written order of the Minister of Energy under Section 8(1) to implement a Treasury Plan may [create] one or many entities, each known as a "OPG Financing Entity" having regard to the following principles:

a. No part of the revenue or assets of a OPG Financing Entity shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. OPG Financing Entity shall be authorized to:

i. issue bonds contemplated by a Treasury Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Treasury Plan and for administrative services;

iii. pledge the Regulatory Asset to secure bonds contemplated by a Treasury Plan.

c. So long as any bonds contemplated under a Treasury Plan are outstanding, OPG Financing Entity shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity.

d. OPG Financing Entity shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Treasury Plan.

e. OPG Financing Entity shall cause the proceeds of any bond issuance contemplated under a Treasury Plan to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Treasury Plan.

f. So long as the Regulatory Asset is pledged to secure bonds issued under a Treasury Act, the OPG Financing Entity must apply revenues from the collection of Transition Charges only to repay bonds and other costs as provided for in a Treasury Plan.

(2) Governance of [OPG Financing Entity] – A person or persons that effect the creation of OPG Financing Entity shall design the governance of OPG Financing Entity having regard to the following principles:

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be

required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

> "Absolute Assignee" means a person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset.
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.
>
> "Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Treasury Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, the Regulatory Asset Owner under the Treasury Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Regulatory Asset Owner or incurred by the Regulatory

Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Treasury Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Invoicing Agent, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Treasury Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Treasury Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owner.

"Alternative Invoicing Agent" means a person appointed under Section 4(8) to assume the invoicing and other activities of any Electricity Distributor under Article 4, as agent for and on behalf of the Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group.

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the sum of all Transition Charge Collections for the Reference Period.[2]

---

[1] A key question will be how the overall costs will be spread across the rate base. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [third] Business Day immediately preceding the first day of the Reference Period.]

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Invoicing Agent) in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of a residence located in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund,

collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Treasury Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Treasury Plan.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies) incurred by the Regulatory Asset Owner under the Treasury Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment attributable to the Power Contracts in accordance with the Fair Allocation Plan.

"Generator" means a generator of electricity that is subject to this Act.

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods,

exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge, right of set-off or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom [or for whose benefit] a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3]

---

[3] Should this contemplate the possibility of additional or amended power contracts?

"Province" means Her Majesty the Queen in right of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in Ontario] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected to the transmission and distribution system assets located in Ontario and who are taking electric delivery service within Ontario, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Regulated Asset Owner by applying the net proceeds obtained by the Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1).

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the an Electricity Distributor deposits Transition Charge Collections; (b) for IESO, any bank account into which IESO deposits Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means, collectively, (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

---

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act.

"Settlement Date" means the [last Business Day of any month].

"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Transition Charge" means, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

---

[5] See footnote 1, above.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the Actual Finance Amount for the Reference Period, plus (c) the Collected Amount Adjustment.

"Undertaking of the Province" means the undertaking of the Province given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge attributed to it and specified as such in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Invoicing Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer and recorded in an Electricity Invoice shall [, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge,] constitute indebtedness of the Ratepayer to the Regulatory Asset Owner. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deeded to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred in compliance with the Treasury Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Treasury Plan or as a result of amendments to the Treasury Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was

properly incurred in accordance with the Treasury Plan. In no case shall a Funding Obligation incurred under the Treasury Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Invoicing Agent shall, as an agent of the Regulatory Asset Owner, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Invoicing Agent to the Ratepayer in respect of such Reference Period.

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][6] or if applicable the [Alternative Collection Agent][7] shall calculate the Period Transition Charge applicable to the Reference Period.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Invoicing Agent of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by [IESO] and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to

---

[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today-ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[7] Should this be a designated government official, rather than an agent appointed by investors?

the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, bill and invoice the Transition Charges.

(7) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Invoicing Agent** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Invoicing Agent to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Invoicing Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Invoicing Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Invoicing Agent to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Invoicing Agent or any [Alternative Collection Agent] to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to accept and collect Electricity Distributor Remittances.

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(6) **IESO Remittances** – On each [Settlement Date], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in Ontario or invoices or collects electricity distribution rates in Ontario[8], then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collect of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

---

[8] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent, any owner of electricity distribution system assets in Ontario or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to an over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owner.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense0 by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.]

(13) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in Ontario or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]

(14) Regulations – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity

Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute a property right and interest of the Regulatory Asset Owner in the following:

a. the present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

b. the present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and invoice the Transition Charges in accordance with Article 4;

c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

e. all Transition Charge Collections;

f. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

g. all Related Rights; and

h. all proceeds of or derived from the foregoing.

The Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset

Owner made under the Treasury Plan shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition [, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.] Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of revenues or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.

(3) **Deemed Perfection and Priority of Dispositions** – At the time a Disposition is made, the absolute assignment of the property rights and interest in the Regulatory Asset subject to the Disposition shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall have priority over any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in accordance with the Treasury Plan shall be deemed to have been and shall be

perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act. A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in revenues or other proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such revenues or other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[9]:

---

[9] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][10].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.

(3) **Attribution Methodology** – The Fair Allocation Plan shall specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. [may have regard

basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

[10] Consider if a quantitative limit needs to be included in the legislation.

to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*

(4) [Confirmation][Review] of the Fair Allocation Plan – [OEB?]

Article 8 – The Treasury Plan

(1) Power to Prepare and Implement the Treasury Plan – The Administrative Agent shall prepare and propose the adoption of a Treasury Plan that is consistent with the principles, parameters, requirements and conditions set forth in Schedule 3, together with and subject to such conditions and requirements as may be specified in a further written order of the Minister of Energy or in accordance with the Regulation. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Treasury Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Treasury Plan.

(2) Required Terms and Conditions of the Treasury Plan – The Treasury Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Treasury Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule C.

(3) Power to Review and Approve the Treasury Plan – The Minister of Energy may by written order designate one or more persons to review and, if considered necessary, require and prescribe amendments of the Treasury Plan and may specify conditions and requirements in respect of such review and prescriptions as may be specified in such written order.

(4) Consistency with the Fair Allocation Plan - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Treasury Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Treasury Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(5) **Obligation to Apply IESO Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[11]

(6) **Non-Recourse** – The Treasury Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Invoicing Agent, and Alternative Collection Agent, the Administrative Agent, the OEB or the Province, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(7) **Incurrences are Binding** – Despite any failure to adhere to the Treasury Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Province, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part.

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of

---

[11] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

the actual incremental costs incurred by such person of providing administrative or servicing services.]

Article 10 – Undertaking of the Province

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Province may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly. The Province undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Province.

(2) **Undertaking and Agreement** – The Province undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Province will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Province, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Treasury Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Treasury Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of Ontario.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Treasury Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Treasury Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Treasury Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative
Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Treasury Plan

Section [X] – Procedure to Adopt a Treasury Plan

(1) Submission of Treasury Plan – The person(s) designated by written order of the Minister of Energy under Section 8(1) shall prepare a Treasury Plan and submit it to the Minister of Energy and any person designed by the Minister of Energy under Section 8(2) to review such Treasury Plan [within the time period specified in such written order]/[within [•] days of such written order]. Such person(s) shall implement any changes proposed under Section [X](3) and submit the revised Treasury Plan to the **[OEB]** for approval within [within the time period specified in such written order]/[within [•] days of such written order].

(2) Content of Treasury Plan – Any Treasury Plan shall have regard to the following specifications:

a. A description of how the incurrence of Funding Obligations by present and future Designated Ratepayers will be on a basis that is consistent with their respective allocations of costs and benefits as contemplated in the Fair Allocation Plan;

b. The form, amount and timing of Funding Obligations under the Treasury Plan; and

c. the entities involved in the incurrence of Funding Obligations and execution of the Treasury Plan.

(3) Review of Treasury Plan– The Minister of Energy, or the person(s) designated by written order of the Minister of Energy under Section 8(2), shall review the Treasury Plan submitted in accordance with Section [X](1) and propose any changes to such Treasury Plan that are necessary or desirable to align the Treasury Plan with the requirements set out the [Minister's Order].

(4) Approval of Treasury Plan – The **[OEB]** shall have the power to and shall approve or disapprove of the Treasury Plan based solely on whether the Treasury Plan includes the specifications contemplated under Section [X](2) and whether those specifications [accord with] the assumptions, conditions, requirements and standards set out in the Treasury Plan and the order(s) of the Minister of Energy issued under Section 8(1) and 8(2). If the **[OEB]** fails to approve or disapprove any Treasury Plan within [30] days of [receiving such Treasury Plan],[12] the Treasury Plan is deemed to have been approved.

---

[12] Consider whether the Minister's order should set out timelines for each of steps contemplates by this Section [X], or whether these time periods should be hard-coded into the legislation.

Section [X] – Creation of the [OPG Financing Entity]

(1) Creation of the [OPG Financing Entity] – The person(s) designated by written order of the Minister of Energy under Section 8(1) to implement a Treasury Plan may [create] one or many entities, each known as a "OPG Financing Entity" having regard to the following principles:

a. No part of the revenue or assets of a OPG Financing Entity shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. OPG Financing Entity shall be authorized to:

i. issue bonds contemplated by a Treasury Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Treasury Plan and for administrative services;

iii. pledge the Regulatory Asset to secure bonds contemplated by a Treasury Plan.

c. So long as any bonds contemplated under a Treasury Plan are outstanding, OPG Financing Entity shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity.

d. OPG Financing Entity shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Treasury Plan.

e. OPG Financing Entity shall cause the proceeds of any bond issuance contemplated under a Treasury Plan to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Treasury Plan.

f. So long as the Regulatory Asset is pledged to secure bonds issued under a Treasury Act, the OPG Financing Entity must apply revenues from the collection of Transition Charges only to repay bonds and other costs as provided for in a Treasury Plan.

(2) Governance of [OPG Financing Entity] – A person or persons that effect the creation of OPG Financing Entity shall design the governance of OPG Financing Entity having regard to the following principles:

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be

required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

> "Absolute Assignee" means a person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset.
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.
>
> "Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Treasury Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, the Regulatory Asset Owner under the Treasury Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Regulatory Asset Owner or incurred by the Regulatory

Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Treasury Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Invoicing Agent, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Treasury Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Treasury Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owner.

"Alternative Invoicing Agent" means a person appointed under Section 4(8) to assume the invoicing and other activities of any Electricity Distributor under Article 4, as agent for and on behalf of the Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group.

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the sum of all Transition Charge Collections for the Reference Period.[2]

---

[1] A key question will be how the overall costs will be spread across the rate base. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [third] Business Day immediately preceding the first day of the Reference Period.]

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Invoicing Agent) in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of a residence located in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund,

collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Treasury Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Treasury Plan.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies) incurred by the Regulatory Asset Owner under the Treasury Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment attributable to the Power Contracts in accordance with the Fair Allocation Plan.

"Generator" means a generator of electricity that is subject to this Act.

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods,

exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge, right of set-off or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom [or for whose benefit] a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3]

---

[3] Should this contemplate the possibility of additional or amended power contracts?

"Province" means Her Majesty the Queen in right of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in Ontario] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected to the transmission and distribution system assets located in Ontario and who are taking electric delivery service within Ontario, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Regulated Asset Owner by applying the net proceeds obtained by the Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1).

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the an Electricity Distributor deposits Transition Charge Collections; (b) for IESO, any bank account into which IESO deposits Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means, collectively, (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

---

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act.

"Settlement Date" means the [last Business Day of any month].

"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Transition Charge" means, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

---

[5] See footnote 1, above.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the Actual Finance Amount for the Reference Period, plus (c) the Collected Amount Adjustment.

"Undertaking of the Province" means the undertaking of the Province given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge attributed to it and specified as such in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Invoicing Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer and recorded in an Electricity Invoice shall [, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge,] constitute indebtedness of the Ratepayer to the Regulatory Asset Owner. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deeded to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred in compliance with the Treasury Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Treasury Plan or as a result of amendments to the Treasury Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was

properly incurred in accordance with the Treasury Plan. In no case shall a Funding Obligation incurred under the Treasury Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Invoicing Agent shall, as an agent of the Regulatory Asset Owner, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Invoicing Agent to the Ratepayer in respect of such Reference Period.

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][6] or if applicable the [Alternative Collection Agent][7] shall calculate the Period Transition Charge applicable to the Reference Period.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Invoicing Agent of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by [IESO] and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to

---

[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today- ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[7] Should this be a designated government official, rather than an agent appointed by investors?

the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, bill and invoice the Transition Charges.

(7) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Invoicing Agent** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Invoicing Agent to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Invoicing Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Invoicing Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Invoicing Agent to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Invoicing Agent or any [Alternative Collection Agent] to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to accept and collect Electricity Distributor Remittances.

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(6) **IESO Remittances** – On each [Settlement Date], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in Ontario or invoices or collects electricity distribution rates in Ontario[8], then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collect of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

---

[8] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent, any owner of electricity distribution system assets in Ontario or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to an over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owner.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense0 by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.]

(13) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in Ontario or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]

(14) Regulations – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity

Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute a property right and interest of the Regulatory Asset Owner in the following:

a. the present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

b. the present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and invoice the Transition Charges in accordance with Article 4;

c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

e. all Transition Charge Collections;

f. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

g. all Related Rights; and

h. all proceeds of or derived from the foregoing.

The Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset

Owner made under the Treasury Plan shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition [, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.] Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of revenues or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.

(3) **Deemed Perfection and Priority of Dispositions** – At the time a Disposition is made, the absolute assignment of the property rights and interest in the Regulatory Asset subject to the Disposition shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall have priority over any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in accordance with the Treasury Plan shall be deemed to have been and shall be

perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act. A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in revenues or other proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such revenues or other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[9]:

---

[9] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][10].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.

(3) **Attribution Methodology** – The Fair Allocation Plan shall specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. [may have regard

---

basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

[10] Consider if a quantitative limit needs to be included in the legislation.

to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*

(4) **[Confirmation][Review] of the Fair Allocation Plan** – [OEB?]

Article 8 – The Treasury Plan

(1) **Power to Prepare and Implement the Treasury Plan** – The Administrative Agent shall prepare and propose the adoption of a Treasury Plan that is consistent with the principles, parameters, requirements and conditions set forth in Schedule 3, together with and subject to such conditions and requirements as may be specified in a further written order of the Minister of Energy or in accordance with the Regulation. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Treasury Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Treasury Plan.

(2) **Required Terms and Conditions of the Treasury Plan** – The Treasury Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Treasury Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule C.

(3) **Power to Review and Approve the Treasury Plan** – The Minister of Energy may by written order designate one or more persons to review and, if considered necessary, require and prescribe amendments of the Treasury Plan and may specify conditions and requirements in respect of such review and prescriptions as may be specified in such written order.

(4) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Treasury Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Treasury Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(5) **Obligation to Apply IESO Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[11]

(6) **Non-Recourse** – The Treasury Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Invoicing Agent, and Alternative Collection Agent, the Administrative Agent, the OEB or the Province, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(7) **Incurrences are Binding** – Despite any failure to adhere to the Treasury Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Province, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part.

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of

---

[11] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

the actual incremental costs incurred by such person of providing administrative or servicing services.]

Article 10 – Undertaking of the Province

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Province may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly. The Province undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Province.

(2) **Undertaking and Agreement** – The Province undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Province will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Province, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Treasury Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Treasury Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of Ontario.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Treasury Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Treasury Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Treasury Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Treasury Plan

Section [X] – Procedure to Adopt a Treasury Plan

(1) Submission of Treasury Plan – The person(s) designated by written order of the Minister of Energy under Section 8(1) shall prepare a Treasury Plan and submit it to the Minister of Energy and any person designed by the Minister of Energy under Section 8(2) to review such Treasury Plan [within the time period specified in such written order]/[within [•] days of such written order]. Such person(s) shall implement any changes proposed under Section [X](3) and submit the revised Treasury Plan to the **[OEB]** for approval within [within the time period specified in such written order]/[within [•] days of such written order].

(2) Content of Treasury Plan – Any Treasury Plan shall have regard to the following specifications:

a. A description of how the incurrence of Funding Obligations by present and future Designated Ratepayers will be on a basis that is consistent with their respective allocations of costs and benefits as contemplated in the Fair Allocation Plan;

b. The form, amount and timing of Funding Obligations under the Treasury Plan; and

c. the entities involved in the incurrence of Funding Obligations and execution of the Treasury Plan.

(3) Review of Treasury Plan– The Minister of Energy, or the person(s) designated by written order of the Minister of Energy under Section 8(2), shall review the Treasury Plan submitted in accordance with Section [X](1) and propose any changes to such Treasury Plan that are necessary or desirable to align the Treasury Plan with the requirements set out the [Minister's Order].

(4) Approval of Treasury Plan – The **[OEB]** shall have the power to and shall approve or disapprove of the Treasury Plan based solely on whether the Treasury Plan includes the specifications contemplated under Section [X](2) and whether those specifications [accord with] the assumptions, conditions, requirements and standards set out in the Treasury Plan and the order(s) of the Minister of Energy issued under Section 8(1) and 8(2). If the **[OEB]** fails to approve or disapprove any Treasury Plan within [30] days of [receiving such Treasury Plan],[12] the Treasury Plan is deemed to have been approved.

---

[12] Consider whether the Minister's order should set out timelines for each of steps contemplates by this Section [X], or whether these time periods should be hard-coded into the legislation.

Section [X] – Creation of the [OPG Financing Entity]

(1) Creation of the [OPG Financing Entity] – The person(s) designated by written order of the Minister of Energy under Section 8(1) to implement a Treasury Plan may [create] one or many entities, each known as a "OPG Financing Entity" having regard to the following principles:

a. No part of the revenue or assets of a OPG Financing Entity shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. OPG Financing Entity shall be authorized to:

i. issue bonds contemplated by a Treasury Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Treasury Plan and for administrative services;

iii. pledge the Regulatory Asset to secure bonds contemplated by a Treasury Plan.

c. So long as any bonds contemplated under a Treasury Plan are outstanding, OPG Financing Entity shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity.

d. OPG Financing Entity shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Treasury Plan.

e. OPG Financing Entity shall cause the proceeds of any bond issuance contemplated under a Treasury Plan to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Treasury Plan.

f. So long as the Regulatory Asset is pledged to secure bonds issued under a Treasury Act, the OPG Financing Entity must apply revenues from the collection of Transition Charges only to repay bonds and other costs as provided for in a Treasury Plan.

(2) Governance of [OPG Financing Entity] – A person or persons that effect the creation of OPG Financing Entity shall design the governance of OPG Financing Entity having regard to the following principles:

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be

required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

"Absolute Assignee" means a person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset.

"Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.

"Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Treasury Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, the Regulatory Asset Owner under the Treasury Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Regulatory Asset Owner or incurred by the Regulatory

Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Treasury Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Invoicing Agent, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Treasury Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Treasury Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owner.

"Alternative Invoicing Agent" means a person appointed under Section 4(8) to assume the invoicing and other activities of any Electricity Distributor under Article 4, as agent for and on behalf of the Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group.

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the sum of all Transition Charge Collections for the Reference Period.[2]

---

[1] A key question will be how the overall costs will be spread across the rate base. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [third] Business Day immediately preceding the first day of the Reference Period.]

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Invoicing Agent) in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of a residence located in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund,

collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Treasury Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Treasury Plan.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies) incurred by the Regulatory Asset Owner under the Treasury Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment attributable to the Power Contracts in accordance with the Fair Allocation Plan.

"Generator" means a generator of electricity that is subject to this Act.

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods,

exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge, right of set-off or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom [or for whose benefit] a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3]

---

[3] Should this contemplate the possibility of additional or amended power contracts?

"Province" means Her Majesty the Queen in right of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in Ontario] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected to the transmission and distribution system assets located in Ontario and who are taking electric delivery service within Ontario, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Regulated Asset Owner by applying the net proceeds obtained by the Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1).

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the an Electricity Distributor deposits Transition Charge Collections; (b) for IESO, any bank account into which IESO deposits Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means, collectively, (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

---

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act.

"Settlement Date" means the [last Business Day of any month].

"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Transition Charge" means, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

---

[5] See footnote 1, above.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the Actual Finance Amount for the Reference Period, plus (c) the Collected Amount Adjustment.

"Undertaking of the Province" means the undertaking of the Province given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge attributed to it and specified as such in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Invoicing Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer and recorded in an Electricity Invoice shall [, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge,] constitute indebtedness of the Ratepayer to the Regulatory Asset Owner. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deeded to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred in compliance with the Treasury Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Treasury Plan or as a result of amendments to the Treasury Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was

properly incurred in accordance with the Treasury Plan. In no case shall a Funding Obligation incurred under the Treasury Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Invoicing Agent shall, as an agent of the Regulatory Asset Owner, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Invoicing Agent to the Ratepayer in respect of such Reference Period.

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][6] or if applicable the [Alternative Collection Agent][7] shall calculate the Period Transition Charge applicable to the Reference Period.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Invoicing Agent of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by [IESO] and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to

---

[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today- ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[7] Should this be a designated government official, rather than an agent appointed by investors?

the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, bill and invoice the Transition Charges.

(7) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Invoicing Agent** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Invoicing Agent to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Invoicing Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Invoicing Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Invoicing Agent to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Invoicing Agent or any [Alternative Collection Agent] to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to accept and collect Electricity Distributor Remittances.

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(6) **IESO Remittances** – On each [Settlement Date], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in Ontario or invoices or collects electricity distribution rates in Ontario[8], then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collect of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

---

[8] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent, any owner of electricity distribution system assets in Ontario or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to an over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforçe the Regulatory Asset on behalf of the Regulatory Asset Owner.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense0 by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.]

(13) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in Ontario or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]

(14) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity

Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute a property right and interest of the Regulatory Asset Owner in the following:

a. the present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

b. the present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and invoice the Transition Charges in accordance with Article 4;

c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

e. all Transition Charge Collections;

f. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

g. all Related Rights; and

h. all proceeds of or derived from the foregoing.

The Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset

Owner made under the Treasury Plan shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition [, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.] Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of revenues or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.

(3) **Deemed Perfection and Priority of Dispositions** – At the time a Disposition is made, the absolute assignment of the property rights and interest in the Regulatory Asset subject to the Disposition shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall have priority over any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in accordance with the Treasury Plan shall be deemed to have been and shall be

perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act. A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in revenues or other proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such revenues or other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[9]:

---

[9] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][10].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.

(3) **Attribution Methodology** – The Fair Allocation Plan shall specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. [may have regard

---

basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

[10] Consider if a quantitative limit needs to be included in the legislation.

to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*

(4) **[Confirmation][Review] of the Fair Allocation Plan** – [OEB?]

Article 8 – The Treasury Plan

(1) **Power to Prepare and Implement the Treasury Plan** – The Administrative Agent shall prepare and propose the adoption of a Treasury Plan that is consistent with the principles, parameters, requirements and conditions set forth in Schedule 3, together with and subject to such conditions and requirements as may be specified in a further written order of the Minister of Energy or in accordance with the Regulation. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Treasury Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Treasury Plan.

(2) **Required Terms and Conditions of the Treasury Plan** – The Treasury Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Treasury Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule C.

(3) **Power to Review and Approve the Treasury Plan** – The Minister of Energy may by written order designate one or more persons to review and, if considered necessary, require and prescribe amendments of the Treasury Plan and may specify conditions and requirements in respect of such review and prescriptions as may be specified in such written order.

(4) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Treasury Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Treasury Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(5) **Obligation to Apply IESO Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[11]

(6) **Non-Recourse** – The Treasury Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Invoicing Agent, and Alternative Collection Agent, the Administrative Agent, the OEB or the Province, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(7) **Incurrences are Binding** – Despite any failure to adhere to the Treasury Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Province, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part.

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of

---

[11] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

the actual incremental costs incurred by such person of providing administrative or servicing services.]

Article 10 – Undertaking of the Province

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Province may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or. impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly. The Province undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Province.

(2) **Undertaking and Agreement** – The Province undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Province will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Province, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Treasury Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Treasury Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of Ontario.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Treasury Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Treasury Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Treasury Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Treasury Plan

Section [X] – Procedure to Adopt a Treasury Plan

(1) Submission of Treasury Plan – The person(s) designated by written order of the Minister of Energy under Section 8(1) shall prepare a Treasury Plan and submit it to the Minister of Energy and any person designed by the Minister of Energy under Section 8(2) to review such Treasury Plan [within the time period specified in such written order]/[within [•] days of such written order]. Such person(s) shall implement any changes proposed under Section [X](3) and submit the revised Treasury Plan to the **[OEB]** for approval within [within the time period specified in such written order]/[within [•] days of such written order].

(2) Content of Treasury Plan – Any Treasury Plan shall have regard to the following specifications:

a. A description of how the incurrence of Funding Obligations by present and future Designated Ratepayers will be on a basis that is consistent with their respective allocations of costs and benefits as contemplated in the Fair Allocation Plan;

b. The form, amount and timing of Funding Obligations under the Treasury Plan; and

c. the entities involved in the incurrence of Funding Obligations and execution of the Treasury Plan.

(3) Review of Treasury Plan– The Minister of Energy, or the person(s) designated by written order of the Minister of Energy under Section 8(2), shall review the Treasury Plan submitted in accordance with Section [X](1) and propose any changes to such Treasury Plan that are necessary or desirable to align the Treasury Plan with the requirements set out the [Minister's Order].

(4) Approval of Treasury Plan – The **[OEB]** shall have the power to and shall approve or disapprove of the Treasury Plan based solely on whether the Treasury Plan includes the specifications contemplated under Section [X](2) and whether those specifications [accord with] the assumptions, conditions, requirements and standards set out in the Treasury Plan and the order(s) of the Minister of Energy issued under Section 8(1) and 8(2). If the **[OEB]** fails to approve or disapprove any Treasury Plan within [30] days of [receiving such Treasury Plan],[12] the Treasury Plan is deemed to have been approved.

---

[12] Consider whether the Minister's order should set out timelines for each of steps contemplates by this Section [X], or whether these time periods should be hard-coded into the legislation.

Section [X] – Creation of the [OPG Financing Entity]

(1) Creation of the [OPG Financing Entity] – The person(s) designated by written order of the Minister of Energy under Section 8(1) to implement a Treasury Plan may [create] one or many entities, each known as a "OPG Financing Entity" having regard to the following principles:

a. No part of the revenue or assets of a OPG Financing Entity shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. OPG Financing Entity shall be authorized to:

i. issue bonds contemplated by a Treasury Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Treasury Plan and for administrative services;

iii. pledge the Regulatory Asset to secure bonds contemplated by a Treasury Plan.

c. So long as any bonds contemplated under a Treasury Plan are outstanding, OPG Financing Entity shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity.

d. OPG Financing Entity shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Treasury Plan.

e. OPG Financing Entity shall cause the proceeds of any bond issuance contemplated under a Treasury Plan to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Treasury Plan.

f. So long as the Regulatory Asset is pledged to secure bonds issued under a Treasury Act, the OPG Financing Entity must apply revenues from the collection of Transition Charges only to repay bonds and other costs as provided for in a Treasury Plan.

(2) Governance of [OPG Financing Entity] – A person or persons that effect the creation of OPG Financing Entity shall design the governance of OPG Financing Entity having regard to the following principles:

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be

required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

"Absolute Assignee" means a person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset.

"Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.

"Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Treasury Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, the Regulatory Asset Owner under the Treasury Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Regulatory Asset Owner or incurred by the Regulatory

Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Treasury Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Invoicing Agent, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Treasury Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Treasury Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owner.

"Alternative Invoicing Agent" means a person appointed under Section 4(8) to assume the invoicing and other activities of any Electricity Distributor under Article 4, as agent for and on behalf of the Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group.

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the sum of all Transition Charge Collections for the Reference Period.[2]

---

[1] A key question will be how the overall costs will be spread across the rate base. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [third] Business Day immediately preceding the first day of the Reference Period.]

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Invoicing Agent) in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of a residence located in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund,

collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Treasury Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Treasury Plan.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies) incurred by the Regulatory Asset Owner under the Treasury Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment attributable to the Power Contracts in accordance with the Fair Allocation Plan.

"Generator" means a generator of electricity that is subject to this Act.

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods,

exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge, right of set-off or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom [or for whose benefit] a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3]

---

[3] Should this contemplate the possibility of additional or amended power contracts?

"Province" means Her Majesty the Queen in right of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in Ontario] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected to the transmission and distribution system assets located in Ontario and who are taking electric delivery service within Ontario, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Regulated Asset Owner by applying the net proceeds obtained by the Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1).

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the an Electricity Distributor deposits Transition Charge Collections; (b) for IESO, any bank account into which IESO deposits Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means, collectively, (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

---

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act.

"Settlement Date" means the [last Business Day of any month].

"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Transition Charge" means, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

---

[5] See footnote 1, above.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the Actual Finance Amount for the Reference Period, plus (c) the Collected Amount Adjustment.

"Undertaking of the Province" means the undertaking of the Province given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge attributed to it and specified as such in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Invoicing Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer and recorded in an Electricity Invoice shall [, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge,] constitute indebtedness of the Ratepayer to the Regulatory Asset Owner. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deeded to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred in compliance with the Treasury Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Treasury Plan or as a result of amendments to the Treasury Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was

properly incurred in accordance with the Treasury Plan. In no case shall a Funding Obligation incurred under the Treasury Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Invoicing Agent shall, as an agent of the Regulatory Asset Owner, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Invoicing Agent to the Ratepayer in respect of such Reference Period.

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][6] or if applicable the [Alternative Collection Agent][7] shall calculate the Period Transition Charge applicable to the Reference Period.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Invoicing Agent of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by [IESO] and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to

---

[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today- ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[7] Should this be a designated government official, rather than an agent appointed by investors?

the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, bill and invoice the Transition Charges.

(7) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Invoicing Agent** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Invoicing Agent to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Invoicing Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Invoicing Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Invoicing Agent to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Invoicing Agent or any [Alternative Collection Agent] to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to accept and collect Electricity Distributor Remittances.

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(6) **IESO Remittances** – On each [Settlement Date], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in Ontario or invoices or collects electricity distribution rates in Ontario[8], then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collect of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

---

[8] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent, any owner of electricity distribution system assets in Ontario or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to an over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owner.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense0 by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.]

(13) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in Ontario or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]

(14) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity

Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute a property right and interest of the Regulatory Asset Owner in the following:

a. the present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

b. the present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and invoice the Transition Charges in accordance with Article 4;

c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

e. all Transition Charge Collections;

f. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

g. all Related Rights; and

h. all proceeds of or derived from the foregoing.

The Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset

Owner made under the Treasury Plan shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition [, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.] Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of revenues or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.

(3) **Deemed Perfection and Priority of Dispositions** – At the time a Disposition is made, the absolute assignment of the property rights and interest in the Regulatory Asset subject to the Disposition shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall have priority over any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in accordance with the Treasury Plan shall be deemed to have been and shall be

perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act. A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in revenues or other proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such revenues or other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[9]:

---

[9] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][10].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.

(3) **Attribution Methodology** – The Fair Allocation Plan shall specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. [may have regard

---

basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

[10] Consider if a quantitative limit needs to be included in the legislation.

to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*

(4) **[Confirmation][Review] of the Fair Allocation Plan** – [OEB?]

Article 8 – The Treasury Plan

(1) **Power to Prepare and Implement the Treasury Plan** – The Administrative Agent shall prepare and propose the adoption of a Treasury Plan that is consistent with the principles, parameters, requirements and conditions set forth in Schedule 3, together with and subject to such conditions and requirements as may be specified in a further written order of the Minister of Energy or in accordance with the Regulation. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Treasury Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Treasury Plan.

(2) **Required Terms and Conditions of the Treasury Plan** – The Treasury Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Treasury Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule C.

(3) **Power to Review and Approve the Treasury Plan** – The Minister of Energy may by written order designate one or more persons to review and, if considered necessary, require and prescribe amendments of the Treasury Plan and may specify conditions and requirements in respect of such review and prescriptions as may be specified in such written order.

(4) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Treasury Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Treasury Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(5) **Obligation to Apply IESO Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[11]

(6) **Non-Recourse** – The Treasury Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Invoicing Agent, and Alternative Collection Agent, the Administrative Agent, the OEB or the Province, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(7) **Incurrences are Binding** – Despite any failure to adhere to the Treasury Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Province, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part.

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of

---

[11] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

the actual incremental costs incurred by such person of providing administrative or servicing services.]

Article 10 – Undertaking of the Province

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Province may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly. The Province undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Province.

(2) **Undertaking and Agreement** – The Province undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Province will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Province, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Treasury Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Treasury Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of Ontario.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Treasury Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Treasury Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Treasury Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Treasury Plan

Section [X] – Procedure to Adopt a Treasury Plan

(1) Submission of Treasury Plan – The person(s) designated by written order of the Minister of Energy under Section 8(1) shall prepare a Treasury Plan and submit it to the Minister of Energy and any person designed by the Minister of Energy under Section 8(2) to review such Treasury Plan [within the time period specified in such written order]/[within [•] days of such written order]. Such person(s) shall implement any changes proposed under Section [X](3) and submit the revised Treasury Plan to the **[OEB]** for approval within [within the time period specified in such written order]/[within [•] days of such written order].

(2) Content of Treasury Plan – Any Treasury Plan shall have regard to the following specifications:

a. A description of how the incurrence of Funding Obligations by present and future Designated Ratepayers will be on a basis that is consistent with their respective allocations of costs and benefits as contemplated in the Fair Allocation Plan;

b. The form, amount and timing of Funding Obligations under the Treasury Plan; and

c. the entities involved in the incurrence of Funding Obligations and execution of the Treasury Plan.

(3) Review of Treasury Plan– The Minister of Energy, or the person(s) designated by written order of the Minister of Energy under Section 8(2), shall review the Treasury Plan submitted in accordance with Section [X](1) and propose any changes to such Treasury Plan that are necessary or desirable to align the Treasury Plan with the requirements set out the [Minister's Order].

(4) Approval of Treasury Plan – The **[OEB]** shall have the power to and shall approve or disapprove of the Treasury Plan based solely on whether the Treasury Plan includes the specifications contemplated under Section [X](2) and whether those specifications [accord with] the assumptions, conditions, requirements and standards set out in the Treasury Plan and the order(s) of the Minister of Energy issued under Section 8(1) and 8(2). If the **[OEB]** fails to approve or disapprove any Treasury Plan within [30] days of [receiving such Treasury Plan],[12] the Treasury Plan is deemed to have been approved.

---

[12] Consider whether the Minister's order should set out timelines for each of steps contemplates by this Section [X], or whether these time periods should be hard-coded into the legislation.

Section [X] – Creation of the [OPG Financing Entity]

(1) **Creation of the [OPG Financing Entity]** – The person(s) designated by written order of the Minister of Energy under Section 8(1) to implement a Treasury Plan may [create] one or many entities, each known as a "OPG Financing Entity" having regard to the following principles:

a. No part of the revenue or assets of a OPG Financing Entity shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. OPG Financing Entity shall be authorized to:

i. issue bonds contemplated by a Treasury Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Treasury Plan and for administrative services;

iii. pledge the Regulatory Asset to secure bonds contemplated by a Treasury Plan.

c. So long as any bonds contemplated under a Treasury Plan are outstanding, OPG Financing Entity shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity.

d. OPG Financing Entity shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Treasury Plan.

e. OPG Financing Entity shall cause the proceeds of any bond issuance contemplated under a Treasury Plan to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Treasury Plan.

f. So long as the Regulatory Asset is pledged to secure bonds issued under a Treasury Act, the OPG Financing Entity must apply revenues from the collection of Transition Charges only to repay bonds and other costs as provided for in a Treasury Plan.

(2) **Governance of [OPG Financing Entity]** – A person or persons that effect the creation of OPG Financing Entity shall design the governance of OPG Financing Entity having regard to the following principles:

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be

required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

"Absolute Assignee" means a person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset.

"Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.

"Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Treasury Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, the Regulatory Asset Owner under the Treasury Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Regulatory Asset Owner or incurred by the Regulatory

Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Treasury Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Invoicing Agent, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Treasury Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Treasury Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owner.

"Alternative Invoicing Agent" means a person appointed under Section 4(8) to assume the invoicing and other activities of any Electricity Distributor under Article 4, as agent for and on behalf of the Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group.

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the sum of all Transition Charge Collections for the Reference Period.[2]

---

[1] A key question will be how the overall costs will be spread across the rate base. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [third] Business Day immediately preceding the first day of the Reference Period.]

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Invoicing Agent) in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of a residence located in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund,

collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Treasury Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Treasury Plan.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies) incurred by the Regulatory Asset Owner under the Treasury Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment attributable to the Power Contracts in accordance with the Fair Allocation Plan.

"Generator" means a generator of electricity that is subject to this Act.

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods,

exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge, right of set-off or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom [or for whose benefit] a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3]

---

[3] Should this contemplate the possibility of additional or amended power contracts?

"Province" means Her Majesty the Queen in right of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in Ontario] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected to the transmission and distribution system assets located in Ontario and who are taking electric delivery service within Ontario, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Regulated Asset Owner by applying the net proceeds obtained by the Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1).

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the an Electricity Distributor deposits Transition Charge Collections; (b) for IESO, any bank account into which IESO deposits Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means, collectively, (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

---

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act.

"Settlement Date" means the [last Business Day of any month].

"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Transition Charge" means, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

---

[5] See footnote 1, above.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the Actual Finance Amount for the Reference Period, plus (c) the Collected Amount Adjustment.

"Undertaking of the Province" means the undertaking of the Province given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge attributed to it and specified as such in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Invoicing Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer and recorded in an Electricity Invoice shall [, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge,] constitute indebtedness of the Ratepayer to the Regulatory Asset Owner. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deeded to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred in compliance with the Treasury Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Treasury Plan or as a result of amendments to the Treasury Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was

properly incurred in accordance with the Treasury Plan. In no case shall a Funding Obligation incurred under the Treasury Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Invoicing Agent shall, as an agent of the Regulatory Asset Owner, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Invoicing Agent to the Ratepayer in respect of such Reference Period.

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][6] or if applicable the [Alternative Collection Agent][7] shall calculate the Period Transition Charge applicable to the Reference Period.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Invoicing Agent of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by [IESO] and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to

---

[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today- ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[7] Should this be a designated government official, rather than an agent appointed by investors?

the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, bill and invoice the Transition Charges.

(7) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Invoicing Agent** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Invoicing Agent to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Invoicing Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Invoicing Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Invoicing Agent to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Invoicing Agent or any [Alternative Collection Agent] to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to accept and collect Electricity Distributor Remittances.

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(6) **IESO Remittances** – On each [Settlement Date], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in Ontario or invoices or collects electricity distribution rates in Ontario[8], then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collect of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

---

[8] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent, any owner of electricity distribution system assets in Ontario or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to an over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owner.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense0 by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.]

(13) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in Ontario or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]

(14) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity

Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute a property right and interest of the Regulatory Asset Owner in the following:

a. the present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

b. the present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and invoice the Transition Charges in accordance with Article 4;

c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

e. all Transition Charge Collections;

f. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

g. all Related Rights; and

h. all proceeds of or derived from the foregoing.

The Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset

Owner made under the Treasury Plan shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition [, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.] Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of revenues or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.

(3) **Deemed Perfection and Priority of Dispositions** – At the time a Disposition is made, the absolute assignment of the property rights and interest in the Regulatory Asset subject to the Disposition shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall have priority over any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in accordance with the Treasury Plan shall be deemed to have been and shall be

perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act. A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in revenues or other proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such revenues or other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[9]:

---

[9] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][10].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.

(3) **Attribution Methodology** – The Fair Allocation Plan shall specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. [may have regard

---

basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

[10] Consider if a quantitative limit needs to be included in the legislation.

to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*

(4) **[Confirmation][Review] of the Fair Allocation Plan** – [OEB?]

Article 8 – The Treasury Plan

(1) **Power to Prepare and Implement the Treasury Plan** – The Administrative Agent shall prepare and propose the adoption of a Treasury Plan that is consistent with the principles, parameters, requirements and conditions set forth in Schedule 3, together with and subject to such conditions and requirements as may be specified in a further written order of the Minister of Energy or in accordance with the Regulation. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Treasury Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Treasury Plan.

(2) **Required Terms and Conditions of the Treasury Plan** – The Treasury Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Treasury Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule C.

(3) **Power to Review and Approve the Treasury Plan** – The Minister of Energy may by written order designate one or more persons to review and, if considered necessary, require and prescribe amendments of the Treasury Plan and may specify conditions and requirements in respect of such review and prescriptions as may be specified in such written order.

(4) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Treasury Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Treasury Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(5) **Obligation to Apply IESO Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[11]

(6) **Non-Recourse** – The Treasury Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Invoicing Agent, and Alternative Collection Agent, the Administrative Agent, the OEB or the Province, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(7) **Incurrences are Binding** – Despite any failure to adhere to the Treasury Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Province, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part.

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of

---

[11] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

the actual incremental costs incurred by such person of providing administrative or servicing services.]

Article 10 – Undertaking of the Province

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Province may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly. The Province undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Province.

(2) **Undertaking and Agreement** – The Province undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Province will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Province, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Treasury Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Treasury Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of Ontario.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Treasury Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Treasury Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Treasury Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Treasury Plan

Section [X] – Procedure to Adopt a Treasury Plan

(1) Submission of Treasury Plan – The person(s) designated by written order of the Minister of Energy under Section 8(1) shall prepare a Treasury Plan and submit it to the Minister of Energy and any person designed by the Minister of Energy under Section 8(2) to review such Treasury Plan [within the time period specified in such written order]/[within [•] days of such written order]. Such person(s) shall implement any changes proposed under Section [X](3) and submit the revised Treasury Plan to the **[OEB]** for approval within [within the time period specified in such written order]/[within [•] days of such written order].

(2) Content of Treasury Plan – Any Treasury Plan shall have regard to the following specifications:

a. A description of how the incurrence of Funding Obligations by present and future Designated Ratepayers will be on a basis that is consistent with their respective allocations of costs and benefits as contemplated in the Fair Allocation Plan;

b. The form, amount and timing of Funding Obligations under the Treasury Plan; and

c. the entities involved in the incurrence of Funding Obligations and execution of the Treasury Plan.

(3) Review of Treasury Plan– The Minister of Energy, or the person(s) designated by written order of the Minister of Energy under Section 8(2), shall review the Treasury Plan submitted in accordance with Section [X](1) and propose any changes to such Treasury Plan that are necessary or desirable to align the Treasury Plan with the requirements set out the [Minister's Order].

(4) Approval of Treasury Plan – The **[OEB]** shall have the power to and shall approve or disapprove of the Treasury Plan based solely on whether the Treasury Plan includes the specifications contemplated under Section [X](2) and whether those specifications [accord with] the assumptions, conditions, requirements and standards set out in the Treasury Plan and the order(s) of the Minister of Energy issued under Section 8(1) and 8(2). If the **[OEB]** fails to approve or disapprove any Treasury Plan within [30] days of [receiving such Treasury Plan],[12] the Treasury Plan is deemed to have been approved.

---

[12] Consider whether the Minister's order should set out timelines for each of steps contemplates by this Section [X], or whether these time periods should be hard-coded into the legislation.

Section [X] – Creation of the [OPG Financing Entity]

(1) Creation of the [OPG Financing Entity] – The person(s) designated by written order of the Minister of Energy under Section 8(1) to implement a Treasury Plan may [create] one or many entities, each known as a "OPG Financing Entity" having regard to the following principles:

a. No part of the revenue or assets of a OPG Financing Entity shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. OPG Financing Entity shall be authorized to:

i. issue bonds contemplated by a Treasury Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Treasury Plan and for administrative services;

iii. pledge the Regulatory Asset to secure bonds contemplated by a Treasury Plan.

c. So long as any bonds contemplated under a Treasury Plan are outstanding, OPG Financing Entity shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity.

d. OPG Financing Entity shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Treasury Plan.

e. OPG Financing Entity shall cause the proceeds of any bond issuance contemplated under a Treasury Plan to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Treasury Plan.

f. So long as the Regulatory Asset is pledged to secure bonds issued under a Treasury Act, the OPG Financing Entity must apply revenues from the collection of Transition Charges only to repay bonds and other costs as provided for in a Treasury Plan.

(2) Governance of [OPG Financing Entity] – A person or persons that effect the creation of OPG Financing Entity shall design the governance of OPG Financing Entity having regard to the following principles:

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be

required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

"Absolute Assignee" means a person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset.

"Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.

"Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Treasury Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, the Regulatory Asset Owner under the Treasury Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Regulatory Asset Owner or incurred by the Regulatory

Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Treasury Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Invoicing Agent, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Treasury Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Treasury Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owner.

"Alternative Invoicing Agent" means a person appointed under Section 4(8) to assume the invoicing and other activities of any Electricity Distributor under Article 4, as agent for and on behalf of the Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group.

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the sum of all Transition Charge Collections for the Reference Period.[2]

---

[1] A key question will be how the overall costs will be spread across the rate base. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [third] Business Day immediately preceding the first day of the Reference Period.]

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Invoicing Agent) in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of a residence located in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund,

collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Treasury Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Treasury Plan.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies) incurred by the Regulatory Asset Owner under the Treasury Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment attributable to the Power Contracts in accordance with the Fair Allocation Plan.

"Generator" means a generator of electricity that is subject to this Act.

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods,

exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge, right of set-off or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom [or for whose benefit] a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3]

---

[3] Should this contemplate the possibility of additional or amended power contracts?

"Province" means Her Majesty the Queen in right of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in Ontario] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected to the transmission and distribution system assets located in Ontario and who are taking electric delivery service within Ontario, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Regulated Asset Owner by applying the net proceeds obtained by the Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1).

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the an Electricity Distributor deposits Transition Charge Collections; (b) for IESO, any bank account into which IESO deposits Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means, collectively, (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

---

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act.

"Settlement Date" means the [last Business Day of any month].

"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Transition Charge" means, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

---

[5] See footnote 1, above.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the Actual Finance Amount for the Reference Period, plus (c) the Collected Amount Adjustment.

"Undertaking of the Province" means the undertaking of the Province given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge attributed to it and specified as such in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Invoicing Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer and recorded in an Electricity Invoice shall [, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge,] constitute indebtedness of the Ratepayer to the Regulatory Asset Owner. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deeded to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred in compliance with the Treasury Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Treasury Plan or as a result of amendments to the Treasury Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was

properly incurred in accordance with the Treasury Plan. In no case shall a Funding Obligation incurred under the Treasury Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Invoicing Agent shall, as an agent of the Regulatory Asset Owner, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Invoicing Agent to the Ratepayer in respect of such Reference Period.

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][6] or if applicable the [Alternative Collection Agent][7] shall calculate the Period Transition Charge applicable to the Reference Period.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Invoicing Agent of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by [IESO] and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to

---

[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today- ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[7] Should this be a designated government official, rather than an agent appointed by investors?

the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, bill and invoice the Transition Charges.

(7) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Invoicing Agent** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Invoicing Agent to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Invoicing Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Invoicing Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Invoicing Agent to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Invoicing Agent or any [Alternative Collection Agent] to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to accept and collect Electricity Distributor Remittances.

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(6) **IESO Remittances** – On each [Settlement Date], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in Ontario or invoices or collects electricity distribution rates in Ontario[8], then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collect of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

---

[8] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent, any owner of electricity distribution system assets in Ontario or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to an over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owner.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense0 by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.]

(13) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in Ontario or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]

(14) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity

Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute a property right and interest of the Regulatory Asset Owner in the following:

a. the present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

b. the present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and invoice the Transition Charges in accordance with Article 4;

c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

e. all Transition Charge Collections;

f. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

g. all Related Rights; and

h. all proceeds of or derived from the foregoing.

The Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset

Owner made under the Treasury Plan shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition [, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.] Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of revenues or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.

(3) **Deemed Perfection and Priority of Dispositions** – At the time a Disposition is made, the absolute assignment of the property rights and interest in the Regulatory Asset subject to the Disposition shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall have priority over any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in accordance with the Treasury Plan shall be deemed to have been and shall be

perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act. A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in revenues or other proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such revenues or other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[9]:

---

[9] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][10].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.

(3) **Attribution Methodology** – The Fair Allocation Plan shall specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. [may have regard

---

basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

[10] Consider if a quantitative limit needs to be included in the legislation.

to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*

(4) **[Confirmation][Review] of the Fair Allocation Plan** – [OEB?]

Article 8 – The Treasury Plan

(1) **Power to Prepare and Implement the Treasury Plan** – The Administrative Agent shall prepare and propose the adoption of a Treasury Plan that is consistent with the principles, parameters, requirements and conditions set forth in Schedule 3, together with and subject to such conditions and requirements as may be specified in a further written order of the Minister of Energy or in accordance with the Regulation. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Treasury Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Treasury Plan.

(2) **Required Terms and Conditions of the Treasury Plan** – The Treasury Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Treasury Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule C.

(3) **Power to Review and Approve the Treasury Plan** – The Minister of Energy may by written order designate one or more persons to review and, if considered necessary, require and prescribe amendments of the Treasury Plan and may specify conditions and requirements in respect of such review and prescriptions as may be specified in such written order.

(4) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Treasury Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Treasury Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(5) **Obligation to Apply IESO Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[11]

(6) **Non-Recourse** – The Treasury Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Invoicing Agent, and Alternative Collection Agent, the Administrative Agent, the OEB or the Province, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(7) **Incurrences are Binding** – Despite any failure to adhere to the Treasury Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Province, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part.

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of

---

[11] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

the actual incremental costs incurred by such person of providing administrative or servicing services.]

Article 10 – Undertaking of the Province

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Province may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly. The Province undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Province.

(2) **Undertaking and Agreement** – The Province undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Province will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Province, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Treasury Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Treasury Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of Ontario.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Treasury Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Treasury Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Treasury Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Treasury Plan

Section [X] – Procedure to Adopt a Treasury Plan

(1) Submission of Treasury Plan – The person(s) designated by written order of the Minister of Energy under Section 8(1) shall prepare a Treasury Plan and submit it to the Minister of Energy and any person designed by the Minister of Energy under Section 8(2) to review such Treasury Plan [within the time period specified in such written order]/[within [•] days of such written order]. Such person(s) shall implement any changes proposed under Section [X](3) and submit the revised Treasury Plan to the **[OEB]** for approval within [within the time period specified in such written order]/[within [•] days of such written order].

(2) Content of Treasury Plan – Any Treasury Plan shall have regard to the following specifications:

a. A description of how the incurrence of Funding Obligations by present and future Designated Ratepayers will be on a basis that is consistent with their respective allocations of costs and benefits as contemplated in the Fair Allocation Plan;

b. The form, amount and timing of Funding Obligations under the Treasury Plan; and

c. the entities involved in the incurrence of Funding Obligations and execution of the Treasury Plan.

(3) Review of Treasury Plan– The Minister of Energy, or the person(s) designated by written order of the Minister of Energy under Section 8(2), shall review the Treasury Plan submitted in accordance with Section [X](1) and propose any changes to such Treasury Plan that are necessary or desirable to align the Treasury Plan with the requirements set out the [Minister's Order].

(4) Approval of Treasury Plan – The **[OEB]** shall have the power to and shall approve or disapprove of the Treasury Plan based solely on whether the Treasury Plan includes the specifications contemplated under Section [X](2) and whether those specifications [accord with] the assumptions, conditions, requirements and standards set out in the Treasury Plan and the order(s) of the Minister of Energy issued under Section 8(1) and 8(2). If the **[OEB]** fails to approve or disapprove any Treasury Plan within [30] days of [receiving such Treasury Plan],[12] the Treasury Plan is deemed to have been approved.

---

[12] Consider whether the Minister's order should set out timelines for each of steps contemplates by this Section [X], or whether these time periods should be hard-coded into the legislation.

Section [X] – Creation of the [OPG Financing Entity]

(1) Creation of the [OPG Financing Entity] – The person(s) designated by written order of the Minister of Energy under Section 8(1) to implement a Treasury Plan may [create] one or many entities, each known as a "OPG Financing Entity" having regard to the following principles:

a. No part of the revenue or assets of a OPG Financing Entity shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. OPG Financing Entity shall be authorized to:

i. issue bonds contemplated by a Treasury Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Treasury Plan and for administrative services;

iii. pledge the Regulatory Asset to secure bonds contemplated by a Treasury Plan.

c. So long as any bonds contemplated under a Treasury Plan are outstanding, OPG Financing Entity shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity.

d. OPG Financing Entity shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Treasury Plan.

e. OPG Financing Entity shall cause the proceeds of any bond issuance contemplated under a Treasury Plan to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Treasury Plan.

f. So long as the Regulatory Asset is pledged to secure bonds issued under a Treasury Act, the OPG Financing Entity must apply revenues from the collection of Transition Charges only to repay bonds and other costs as provided for in a Treasury Plan.

(2) Governance of [OPG Financing Entity] – A person or persons that effect the creation of OPG Financing Entity shall design the governance of OPG Financing Entity having regard to the following principles:

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be

required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

"Absolute Assignee" means a person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset.

"Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.

"Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Treasury Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, the Regulatory Asset Owner under the Treasury Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Regulatory Asset Owner or incurred by the Regulatory

Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Treasury Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Invoicing Agent, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Treasury Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Treasury Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owner.

"Alternative Invoicing Agent" means a person appointed under Section 4(8) to assume the invoicing and other activities of any Electricity Distributor under Article 4, as agent for and on behalf of the Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group.

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the sum of all Transition Charge Collections for the Reference Period.[2]

---

[1] A key question will be how the overall costs will be spread across the rate base. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [third] Business Day immediately preceding the first day of the Reference Period.]

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Invoicing Agent) in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of a residence located in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund,

collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Treasury Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Treasury Plan.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies) incurred by the Regulatory Asset Owner under the Treasury Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment attributable to the Power Contracts in accordance with the Fair Allocation Plan.

"Generator" means a generator of electricity that is subject to this Act.

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods,

exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge, right of set-off or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom [or for whose benefit] a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3]

---

[3] Should this contemplate the possibility of additional or amended power contracts?

"Province" means Her Majesty the Queen in right of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in Ontario] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected to the transmission and distribution system assets located in Ontario and who are taking electric delivery service within Ontario, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Regulated Asset Owner by applying the net proceeds obtained by the Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1).

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the an Electricity Distributor deposits Transition Charge Collections; (b) for IESO, any bank account into which IESO deposits Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means, collectively, (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

---

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act.

"Settlement Date" means the [last Business Day of any month].

"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Transition Charge" means, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

---

[5] See footnote 1, above.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the Reference Period, minus (b) the Actual Finance Amount for the Reference Period, plus (c) the Collected Amount Adjustment.

"Undertaking of the Province" means the undertaking of the Province given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge attributed to it and specified as such in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Invoicing Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer and recorded in an Electricity Invoice shall [, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge,] constitute indebtedness of the Ratepayer to the Regulatory Asset Owner. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deeded to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred in compliance with the Treasury Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Treasury Plan or as a result of amendments to the Treasury Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was

properly incurred in accordance with the Treasury Plan. In no case shall a Funding Obligation incurred under the Treasury Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Invoicing Agent shall, as an agent of the Regulatory Asset Owner, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Invoicing Agent to the Ratepayer in respect of such Reference Period.

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][6] or if applicable the [Alternative Collection Agent][7] shall calculate the Period Transition Charge applicable to the Reference Period.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Invoicing Agent of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by [IESO] and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to

---

[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today- ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[7] Should this be a designated government official, rather than an agent appointed by investors?

the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, bill and invoice the Transition Charges.

(7) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Invoicing Agent** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Invoicing Agent to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Invoicing Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Invoicing Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Invoicing Agent to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Invoicing Agent or any [Alternative Collection Agent] to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to accept and collect Electricity Distributor Remittances.

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(6) **IESO Remittances** – On each [Settlement Date], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in Ontario or invoices or collects electricity distribution rates in Ontario[8], then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collect of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

---

[8] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent, any owner of electricity distribution system assets in Ontario or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to an over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owner.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense0 by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.]

(13) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in Ontario or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]

(14) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity

Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute a property right and interest of the Regulatory Asset Owner in the following:

a. the present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

b. the present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and invoice the Transition Charges in accordance with Article 4;

c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

e. all Transition Charge Collections;

f. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

g. all Related Rights; and

h. all proceeds of or derived from the foregoing.

The Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset

Owner made under the Treasury Plan shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition [, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.] Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of revenues or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.

(3) **Deemed Perfection and Priority of Dispositions** – At the time a Disposition is made, the absolute assignment of the property rights and interest in the Regulatory Asset subject to the Disposition shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall have priority over any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in accordance with the Treasury Plan shall be deemed to have been and shall be

perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act. A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in revenues or other proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such revenues or other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[9]:

---

[9] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][10].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.

(3) **Attribution Methodology** – The Fair Allocation Plan shall specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. [may have regard

---

basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

[10] Consider if a quantitative limit needs to be included in the legislation.

to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*

(4) **[Confirmation][Review] of the Fair Allocation Plan** – [OEB?]

Article 8 – The Treasury Plan

(1) **Power to Prepare and Implement the Treasury Plan** – The Administrative Agent shall prepare and propose the adoption of a Treasury Plan that is consistent with the principles, parameters, requirements and conditions set forth in Schedule 3, together with and subject to such conditions and requirements as may be specified in a further written order of the Minister of Energy or in accordance with the Regulation. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Treasury Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Treasury Plan.

(2) **Required Terms and Conditions of the Treasury Plan** – The Treasury Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Treasury Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule C.

(3) **Power to Review and Approve the Treasury Plan** – The Minister of Energy may by written order designate one or more persons to review and, if considered necessary, require and prescribe amendments of the Treasury Plan and may specify conditions and requirements in respect of such review and prescriptions as may be specified in such written order.

(4) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Treasury Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Treasury Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(5) **Obligation to Apply IESO Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[11]

(6) **Non-Recourse** – The Treasury Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Invoicing Agent, and Alternative Collection Agent, the Administrative Agent, the OEB or the Province, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(7) **Incurrences are Binding** – Despite any failure to adhere to the Treasury Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Province, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part.

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of

---

[11] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

the actual incremental costs incurred by such person of providing administrative or servicing services.]

Article 10 – Undertaking of the Province

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Province may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly. The Province undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Province.

(2) **Undertaking and Agreement** – The Province undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Province will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Province, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Treasury Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Treasury Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of Ontario.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Treasury Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Treasury Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Treasury Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Treasury Plan

Section [X] – Procedure to Adopt a Treasury Plan

(1) Submission of Treasury Plan – The person(s) designated by written order of the Minister of Energy under Section 8(1) shall prepare a Treasury Plan and submit it to the Minister of Energy and any person designed by the Minister of Energy under Section 8(2) to review such Treasury Plan [within the time period specified in such written order]/[within [•] days of such written order]. Such person(s) shall implement any changes proposed under Section [X](3) and submit the revised Treasury Plan to the **[OEB]** for approval within [within the time period specified in such written order]/[within [•] days of such written order].

(2) Content of Treasury Plan – Any Treasury Plan shall have regard to the following specifications:

a. A description of how the incurrence of Funding Obligations by present and future Designated Ratepayers will be on a basis that is consistent with their respective allocations of costs and benefits as contemplated in the Fair Allocation Plan;

b. The form, amount and timing of Funding Obligations under the Treasury Plan; and

c. the entities involved in the incurrence of Funding Obligations and execution of the Treasury Plan.

(3) Review of Treasury Plan– The Minister of Energy, or the person(s) designated by written order of the Minister of Energy under Section 8(2), shall review the Treasury Plan submitted in accordance with Section [X](1) and propose any changes to such Treasury Plan that are necessary or desirable to align the Treasury Plan with the requirements set out the [Minister's Order].

(4) Approval of Treasury Plan – The **[OEB]** shall have the power to and shall approve or disapprove of the Treasury Plan based solely on whether the Treasury Plan includes the specifications contemplated under Section [X](2) and whether those specifications [accord with] the assumptions, conditions, requirements and standards set out in the Treasury Plan and the order(s) of the Minister of Energy issued under Section 8(1) and 8(2). If the **[OEB]** fails to approve or disapprove any Treasury Plan within [30] days of [receiving such Treasury Plan],[12] the Treasury Plan is deemed to have been approved.

---

[12] Consider whether the Minister's order should set out timelines for each of steps contemplates by this Section [X], or whether these time periods should be hard-coded into the legislation.

Section [X] – Creation of the [OPG Financing Entity]

(1) Creation of the [OPG Financing Entity] – The person(s) designated by written order of the Minister of Energy under Section 8(1) to implement a Treasury Plan may [create] one or many entities, each known as a "OPG Financing Entity" having regard to the following principles:

a. No part of the revenue or assets of a OPG Financing Entity shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. OPG Financing Entity shall be authorized to:

i. issue bonds contemplated by a Treasury Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Treasury Plan and for administrative services;

iii. pledge the Regulatory Asset to secure bonds contemplated by a Treasury Plan.

c. So long as any bonds contemplated under a Treasury Plan are outstanding, OPG Financing Entity shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity.

d. OPG Financing Entity shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Treasury Plan.

e. OPG Financing Entity shall cause the proceeds of any bond issuance contemplated under a Treasury Plan to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Treasury Plan.

f. So long as the Regulatory Asset is pledged to secure bonds issued under a Treasury Act, the OPG Financing Entity must apply revenues from the collection of Transition Charges only to repay bonds and other costs as provided for in a Treasury Plan.

(2) Governance of [OPG Financing Entity] – A person or persons that effect the creation of OPG Financing Entity shall design the governance of OPG Financing Entity having regard to the following principles:

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

FAIR HYDRO ACT, 2017 (FIRST READING) – DEALERS COMMENTS

1. There should be some restriction on who can become a "specified consumer" in the future by way of the regulations as any expansion of the "specified consumers" after the first fair adjustments have been made could result in certain consumers who did not receive the full fair adjustment being asked to pay more than their share of the clean energy adjustment.

2. Sections 7 and 8 provide for the "first adjustments" for RPP and certain non-RPP consumers, respectively. Section 11 states that the LGIC may prescribe the methodology for subsequent adjustments, but there is no parallel to sections 7 and 8 that would require the Board to make determinations consistent with the methodology prescribed by section 11.

3. The collection of clean energy adjustments by a sub-metering entity should be mandatory, not permissive. Accordingly, in section 13(6), "may" should be "shall".

4. Sections 16 and 17 of the Act setting out the process for payment of clean energy adjustments by LDCs to the IESO remains unclear as to whether this is being invoiced and paid under the market rules (per s. 16(1)) on the same basis as existing amounts collected by the IESO, in which case we would expect the prudential and default provisions of the market rules to apply, or if this is being remitted to the IESO following collection of these amounts by the LDCs. At this stage, we would prefer the legislation to expressly contemplate both possibilities so that the affected parties can work out which approach is best. Depending on the outcome, it is likely that the reference in s. 16(1) to amounts "paid" to the IESO could/should be a reference to amounts "remitted" to the IESO.

5. With respect to section 20, we have repeatedly identified issues with the calculation of the fair allocation amount and continue to be of the view that it does not work. In paragraph 1, each of the estimated clean energy costs and clean energy benefits is being determined (*i.e.* there are two numbers being determined). Paragraph 3 effectively says to take the difference between the amounts determined pursuant to paragraphs 1 and 2, but paragraph 1 is not a single number so this is mathematically impossible. Then in paragraph 2, that calculation appears to be trying to capture all the rate reductions under this Act that have occurred in prior reference periods. Firstly, it is not clear why this amount is only limited to clause (a) of the definition of clean energy costs and not all rate reductions. Secondly, this is defined as being a cumulative amount, and in paragraph 3 you effectively take a current period amount (which doesn't work, per the comment above) and subtract from it this cumulative amount. This doesn't seem right since any historical clean energy overpayments would be "lost" in this calculation.

6. Section 41(1)(7) refers to "a breach under section 29", which is not right. Section 29 sets out rights and interests of investment interest owners, so we believe what section 41(1)(7) is trying to get at is "***a failure to give effect to the rights and interests*** provided for in section 29", not a breach under section 29, *per se*.

ONTARIO FAIR HYDRO PLAN ACT, 2017 – ITEMS TO BE PRESCRIBED BY REGULATION

*Note: The following does not include reference to items prescribed by regulations made pursuant to other legislation, namely the *Ontario Energy Board Act, 1998* and the *Electricity Act, 1998*.

**Note: Where a numerical reference is found in the third column below (i.e. (#4)), such number references the corresponding number from the list in Section 41(1) of the legislation, which sets out some of the key matters pursuant to which the Lieutenant Governor in Council may make regulations.

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
Definitions			
"clean energy costs"	"clean energy costs" means the value of the costs allocated to specified consumers as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of, (a) the amounts to be paid or reflected by the IESO in adjustments made under section 25.33 of the Electricity Act, 1998 or any provision that is the successor to that provision, which relate to contracts or amounts for, […] (v) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed,	• Other contracts the costs of which are to be excluded from "clean energy costs". • Other costs or estimated costs that qualify as "clean energy costs".	• Policy matter for MOE to determine.

[1] This commentary reflects the collective input from OPG, the dealers and their external counsel. Additional comments will be provided once draft regulations have been circulated.

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
	(b) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and (c) such other costs or estimated costs as may be prescribed;		
"electricity vendor"	"electricity vendor" means, (a) a licensed distributor, (b) a licensed retailer, (c) the IESO in circumstances where it directly invoices a specified consumer for electricity used in Ontario, or (d) such other person as may be prescribed;	• Other persons that qualify as an "electricity vendor".	• Policy matter for MOE to determine.
"finance amount"	"finance amount" means the finance amount determined in accordance with the regulations;	• The amount of and determination of the finance amount.	• Draft in progress and will be provided separately. Note that this amount should include fees payable to OPG and others, all taxes payable and all of the upfront costs of setting up the financing entity and the borrowing platform (legal fees, rating agency fees, etc.).
"funding obligation"	"funding obligation" means a payment obligation incurred by or on behalf of an investment interest owner to fund its ownership of an investment interest or a payment obligation that meets such other criteria as may	• Criteria for investment interest owners' payment obligations to fund their investment interest ownership.	• Funding obligations to include: (i) moneys borrowed; (ii) any amount raised by

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
	be prescribed;		acceptance under any acceptance credit facility; (iii) any amount raised pursuant to any note purchase facility or the issuance of bonds, notes, debentures, certificates of beneficial interest, certificates of ownership, loan stock or any similar instrument; (iv) any amount raised pursuant to any issue of securities which are expressed to be redeemable either at a fixed date or at the option of the holder at any time before the final maturity date; (v) the amount of any liability in respect of any advance or deferred purchase agreement if one of the primary reasons for entering into such agreement is to raise finance (but excluding trade liabilities payable in the ordinary course of business of such person); (vi) the amount raised by the sale or discount of receivables on arm's length terms; (vii) any amount raised under any other transaction (including any forward sale or

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
			purchase agreement or sale and leaseback transaction) having the commercial effect of a borrowing; and (viii) amounts payable under interest rate swaps or cross-currency swaps, including any bonds or loans incurred by a financing entity to finance collateral obligations under the swap.
"reference period"	"reference period" means, (a) the period beginning on July 1, 2017 and ending on October 31, 2017, and (b) during the period beginning on November 1, 2017 and ending on either April 30, 2047 or such later day as may be prescribed, (i) every six-month period following the period mentioned in clause (a); or (ii) any period shorter than six months, as may be prescribed;	• Dates that modify the relevant periods in which the clean energy adjustment payable is payable. (#8)	• Regarding (b) of the definition of "reference period", the regulations should contemplate that a final true-up process will extend beyond the end of the program in 2047. Timing and process for revisions to the regulations to extend the program end date, if needed, to be confirmed. • Regarding (b)(ii) of the definition of "reference period", reference periods may be shorter than six months if the FSM calculates the true-up amount and determines the CEA on an interim or more frequent basis as permitted in the regulations related to the true-up.

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
			• True-up regulations will permit: (i) quarterly true-up and setting of the CEA after the scheduled final payment date for a funding obligation; (ii) monthly true-up and setting of the CEA if the FSM reasonably forecasts that expected collections of the CEA will be insufficient to pay the estimated finance amount for the next reference period, any arrearages or the need to replenish any draws upon the capital or reserve accounts of the financing entity.
"refinancing"	"refinancing" means, subject to the regulations, the incurrence of debt in connection with a redemption, repayment or repurchase of a funding obligation;	• Qualifications to or exemptions from what would typically constitute a refinancing. (#3)	• Currently under consideration. A proposal will follow.
"specified consumer"	"specified consumer" means, (a) a person who has an account with an electricity vendor for the supply of electricity in Ontario and meets the criteria set out in subsection (2), or (b) such other person as may be prescribed;	• Persons qualifying as specified consumers. • Customers with electricity demands greater than 50 KW or using more than 250,000 kW/h that qualify as "specified consumers". (#4)	• Once the class of specified consumers has been prescribed in the regulations and the program has commenced, there should be no further changes to broaden or narrow the class of specified consumers. • See also separate comments

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
	(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria: 1. The person has a demand for electricity of not more than 50 kilowatts, or such other amount as may be prescribed. 2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed. […] 5. The person satisfies such criteria as may be prescribed.		provided by the dealers on the legislation addressing this point in the Act (comment #1).
"true up amount"	"true up amount" means a true up amount determined in accordance with the regulations;	• The amount of and determination of the true up amount.	• Draft true-up provided separately.
Part II. Fair Adjustment			
Regulated rate consumer, first adjustments (7)(1)	Despite any order under subsection 78 (3.1) of the *Ontario Energy Board Act, 1998* and despite section 79.16 of that Act, the electricity rates payable by regulated rate consumers for the period beginning on July 1, 2017 and ending on April 30, 2018 are the rates, as determined by the Board, that would result in a hypothetical regulated rate consumer who meets the prescribed criteria being charged an invoice amount that is 25 per cent less than the invoice amount that would have been charged to that consumer under the comparison rates described in subsection (2).	• Criteria qualifying a consumer as a regulated rate consumer. (#4)	• Policy matter for MOE to determine. • We nevertheless understand this to be the Toronto Hydro 750 kWh/month residential consumer as contemplated in the earlier draft legislation.

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
Invoice amounts (7)(3)	The types of amounts to be included or excluded in each invoice amount mentioned in subsection (1) are the types of amounts specified in the regulations.	• Specification of amounts to be included or excluded in an invoice. (#5)	• Unclear what types of amounts are intended to be prescribed. Working group to review proposal in the draft regulations.
Board to make determinations (8)(2)	The Board shall, in accordance with the regulations, determine the adjustments to be made by electricity vendors.	• Adjustments to be made by electricity vendors in respect of specified consumers who are not regulated rate consumers further to adjustments made by the IESO under section 25.33 of the *Electricity Act, 1998.* (#5)	• Policy matter for MOE to determine.
Same, regulations (8)(3)	The regulations may specify different adjustments to be made in respect of prescribed classes of specified consumers who are not regulated rate consumers.	• Differing or unique adjustments to be made by electricity vendors in addition to those noted above. (#5) • Classes of specified consumers receiving certain adjustments. (#4)	• Policy matter for MOE to determine. Will need to ensure there is no adverse impact on financing.
Same (10)(2)	The electricity vendor shall ensure that, if any of its customers who are specified consumers have been invoiced in a manner that does not reflect the determinations of the Board under section 9, the specified consumer receives the difference between the amounts shown on the invoice and the amounts reflecting the Board's determinations, provided as a lump sum credit on the first invoice issued after the electricity vendor has adapted its invoices or by such other	• Other means than a lump sum credit on the next invoice for reimbursing specified consumers not invoiced in accordance with the Board's determinations. (#6)	• Regulations should clarify that any credit will not affect prior remittances made to the financing entity.

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
	means as may be prescribed.		
Subsequent adjustments (11)(1)	Despite clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998* and subject to subsection (2), the Lieutenant Governor in Council may prescribe the methodology to be applied by the Board after April 30, 2018 for the purpose of determining, (a) electricity rates for regulated rate consumers; or (b) adjustments to be applied by electricity vendors to the adjustments made by the IESO under section 25.33 of the *Electricity Act, 1998* in respect of prescribed classes of specified consumers who are not regulated rate consumers.	• Methodology to be applied by the Board for determining electricity rates and adjustments (to be applied by electricity vendors to the IESO adjustments under the *Electricity Act, 1998*). (#6) • Classes of specified consumers who are not regulated rate consumers receiving certain adjustments. (#4)	• Key issue for financing and rating agencies, to be discussed. • See separate comments provided by the dealers on the legislation addressing this point in the Act (comment #2).
Limitation (11)(2)	Any prescribed methodology shall have regard to the following: 1. The purposes of this Act. 2. The clean energy costs borne by specified consumers over time. 3. Such other matters as may be prescribed.	• Additional matters in respect of the methodology to be applied by the Board. (#6)	• Key issue for rating agencies, to be discussed.
Same (12)(2)	If an invoice for the electricity is issued to the person by the specified consumer or a unit sub-meter provider providing unit sub-metering for the specified consumer, the amount payable for the electricity by the person who is liable to pay the invoice shall be determined in accordance	• The amount payable by the person liable to pay an invoice issued by a specified consumer or a unit sub-meter provider. (#6)	• Financing entity must be able to fully recover.

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
	with the regulations.		
Part III. Clean Energy Adjustment			
Unit sub-metering (13)(6)	A specified consumer who provides electricity through unit sub-metering may collect amounts in respect of the clean energy adjustment payable under this section in accordance with the regulations.	• Amounts a specified consumer who provides electricity through sub-metering may collect in respect of the clean energy adjustment. (#6)	• Policy matter for MOE to determine.
Regulations re true up amount (15)(2)	The Lieutenant Governor in Council shall, in making regulations with respect to the determination of the true up amount, have regard to the following principles: 1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the finance amount when it is due. 2. The method for determining the true up amount should take into account historical and reasonably foreseeable, i. differences between the estimated and actual finance amount for the applicable reference period, ii. differences between amounts invoiced and amounts collected due to various factors, including	• *See at left for principles guiding true-up amount regulation.*	• See draft true-up provided separately.

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
	applicable taxes, consumer defaults and delays, billing lags and write-offs, and iii. variations in billings due to variations in electricity consumption.		
Financial Services Manager to notify Board (15)(3)	The Financial Services Manager shall, in accordance with the regulations, notify the Board of the clean energy adjustment in respect of a reference period and such other information related to the determination of the clean energy adjustment as may be prescribed.	• Information to be conveyed to the Board and other notice requirements regarding the clean energy adjustment for a reference period to be provided by the Financial Services Manager.	• Notification to the Board of CEA (inclusive of true-up amount) shall be in a prescribed form and shall include a breakdown of the estimated finance amount per s. 15(1)1.i and the true-up amount per s. 15(1)1.ii.
Board to determine rates (15)(4)	Without changing the clean energy adjustment, the Board shall, in accordance with the regulations, determine the rates at which specified consumers are invoiced to recover the clean energy adjustment in respect of the reference period.	• Determination of rate at which specified consumers are invoiced to recover the clean energy adjustment in a reference period. (#5)	• Operational issue, but determination of CEA must be non-reviewable, irrevocable (other than pursuant to the true-up adjustment) and non-appealable. • Board must accept the CEA amount provided by the FSM and apply it to forecast electricity demand information for specified consumers, to be provided by the IESO, in order to determine a $/kWh rate that is distinct from RPP rates and

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
			which shall fully recover the CEA. • All specified consumers to be charged the same rate regardless of time of use or tiered pricing.
IESO to receive amounts (16)(1)	The IESO shall, as agent of the investment interest owners, receive amounts in respect of the clean energy adjustment paid to it from electricity vendors in accordance with the market rules made under section 32 of the *Electricity Act, 1998* or the regulations.	• Terms on which the IESO will receive amounts in respect of the clean energy adjustment paid to it by electricity vendors.	• The CEA must be separately identifiable at time any remittances are made to IESO, which will occur, without set off, on a monthly basis consistent with current settlement process and prudential requirements. • We expect that the regulations will set out the invoicing and collection mechanics for electricity vendors and the IESO. The dealers would prefer to have flexibility regarding the imposition of current IESO market rules around the billing, invoicing and collections processes. See separate comments provided by the dealers on the legislation addressing this point in the Act (comment #4).
IESO to remit (16)(4)	The IESO shall remit amounts received by it in respect of the clean energy adjustment,	• Terms of remittance of clean energy adjustment amounts by	• Each financing entity to establish its own collection

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
	inclusive of interest earned on the amounts referred to in subsection (1), to or for the benefit of the investment interest owners in accordance with the regulations.	the IESO to investment interest owners.	account and all collections and IESO servicer advances should be paid directly to this account (i.e., NOT run through an OPG account).
Electricity vendor to invoice specified consumers (17)(1)	Each electricity vendor shall issue an invoice to each of its customers who is a specified consumer for the amount payable by the consumer in respect of the clean energy adjustment, as determined by applying the rate set by the Board under subsection 15(4) and in accordance with the regulations.	• Determination of invoice for specified consumers (*see above "Board to determine rates"*). (#6)	• Electricity vendors shall, in the invoices to its customers that are specified consumers, provide a separate line item for the portion of such invoice that is in respect of the CEA. • All specified consumers will be charged the same rate regardless of time of use or tiered pricing.
Electricity vendor to report (17)(2)	Each electricity vendor shall, in accordance with the regulations, promptly report to the IESO the total amount invoiced to its customers who are specified consumers in respect of the clean energy adjustment, the amount collected and such other information as may be prescribed.	• Contents of invoices delivered to specified consumers and additional information in respect of the clean energy adjustment to be reported to the IESO by each electricity vendor. (#5)	• Electricity vendors shall maintain separate records with respect to amounts invoiced to customers in respect of the CEA and shall make such records available to the IESO, FSM, financing entity and investment asset owners, if requested.
Electricity vendor to collect (17)(3)	Each electricity vendor shall, as agent of the investment interest owners, collect amounts in respect of the clean energy adjustment from specified consumers in accordance with the regulations.	• Amounts and means for electricity vendors to collect amounts in respect of the clean energy adjustment from specified consumers. (#4)	• LDC issue, provided that electricity vendors shall segregate portion collected in respect of the CEA.

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
Remittance to IESO (17)(6)	Each electricity vendor shall remit amounts in respect of the clean energy adjustment to the IESO for the benefit of the investment interest owners in accordance with the regulations.	• Terms of remittance to the IESO of clean energy adjustment amounts received by electricity vendors to the IESO.	• The CEA must be separately identifiable, and delivered to a separate account, at the time any remittances are made to IESO, which will occur on a monthly basis consistent with current settlement process and prudential requirements.
Part IV. Implementation			
Same (19)(2)	The administration of the investment asset may include providing information to the IESO in respect of obligations under Part III and such other activities as may be prescribed.	• Activities and requirements of the Financial Services Manager in administering the investment asset.	• Financing entity and IESO will enter into an agreement with respect to the administration of the investment asset, on terms and conditions that do not contravene the Act.
Fees (19)(3)	Subject to any prescribed limitations, the Financial Services Manager may establish and charge fees in relation to such matters as may be prescribed in accordance with the regulations, which regulations may provide for the ability to recover costs and expenditures and to earn a return.	• Matters for which the Financial Services Manager may establish and charge fees to recover costs and expenditures and earn a return. • Limitations on fees the Financial Services Manager may charge in respect of the matters referenced above.	• FSM fees earned to reflect market terms and conditions. • Matters subject to FSM fees and any limitations to be discussed.
Same, Board approval (19)(4)	Before establishing fees under subsection (3), the Financial Services Manager shall submit them to the Board for approval in accordance with the regulations.	• Requirement for approval and criteria for approval by Board of fees established by the	• To be discussed. We understand OPG and OEB have been discussing this

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
		Financial Services Manager.	point.
Minister to calculate fair allocation amount (20)(1)	Subject to subsections (2) and (3), before the first funding obligation is incurred, the Minister shall calculate a fair allocation amount in respect of each reference period, applying such method as the Minister considers appropriate and in accordance with the following steps: 1. Determine the estimated clean energy costs and estimated clean energy benefits allocated to specified consumers in respect of the reference period. 2. Determine the estimated reduction in the amounts payable by specified consumers as a result of determinations of the Board under Part II in respect of all previous reference periods, including the estimated reduction in clean energy costs described in clause (a) of the definition of "clean energy costs" in subsection 1(1) that would otherwise have been payable by specified consumers in the absence of this Act. 3. Determine the amount, if any, by which the determination under paragraph 1 exceeds the determination under paragraph 2. 4. Calculate the sum of the amount determined under	• Other amounts to be calculated by the Minister before the first funding obligation is incurred.	• See separate comments provided by the dealers on the legislation addressing this point in the Act (comment #5).

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
	paragraph 3 and such other amounts as may be prescribed.		
Principles (20)(2)	In calculating the fair allocation amount, the Minister shall have regard to the following principles: [...] 4. Such other principles as may be prescribed.	• Principles the Minister shall have regard to in calculating the fair allocation amount.	• Policy matter for MOE to determine. Will need to ensure OPG can work with it operationally.
Assumptions (20)(3)	In calculating the fair allocation amount, the Minister shall make such assumptions as the Minister considers to be reasonable regarding the following: [...] 4. Such other assumptions as may be prescribed.	• Assumptions the Minister may make in calculating the fair allocation amount.	• Policy matter for MOE to determine. Will need to ensure OPG can work with it operationally.
Recalculation (20)(5)	A calculation of the fair allocation amount under this Part may be changed by such person as may be prescribed in accordance with such requirements as may be prescribed.	• The person or persons that may change the calculation of the fair allocation amount. • The requirements for changing the calculation of the fair allocation amount.	• Policy matter for MOE, unless OPG is given authority to do this, in which case process will need to be discussed.
Information (20)(7)	The Minister, the IESO, the Financial Services Manager, the Board and electricity vendors shall provide such information as may be prescribed in accordance with the regulations for the purposes of facilitating a change to a calculation of the fair allocation amount.	• Nature of information to be provided by the Minister, the IESO, the Financial Services Manager, the Board and electricity vendors in connection with a change to a calculation of the fair allocation amount.	• Will need clarification regarding the information FSM will be required to provide for this purpose.

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
Principles (21)(3)	In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles: [...] 3. Reasonable assumptions should be made regarding such matters as may be prescribed. 4. Such other principles as may be prescribed.	• Assumptions the Financial Services Manager may make in preparing the Financing Plan. • Principles the Financial Services Manager shall have regard to in preparing the Financing Plan	• The FSM shall have regard to the following principles in preparing the Financing Plan: (i) anticipated IESO funding shortfalls and related transfer amounts; (ii) the maturities of funding obligations; (iii) the availability of refinancings, redemption opportunities and liquidity terms and conditions; (iv) the availability of currency and interest rate hedging facilities for the purposes of mitigating any differences between the expected finance amount becoming due and payable during any reference period and the fair allocation amount for the reference period; (v) interest rates and related financing costs; and (vi) available capital markets in which funding obligations may be incurred.
Limitation (21)(4)	In respect of each reference period from July 1, 2017 to April 30, 2021, no funding obligation shall be incurred that would result in amounts	• Limit of amounts payable in respect of the clean energy adjustment during a reference	• To be discussed. The limit to be determined in the regulations has to be such that

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
	payable in respect of the clean energy adjustment in respect of the reference period unless, […] (b) if the Board has made a determination under Part II in respect of the reference period, the funding obligations incurred would not result in amounts payable in respect of the clean energy adjustment during the reference period in an amount that exceeds the limit determined in accordance with the regulations.	period if the Board has made a determination under Part II.	it is consistent with the determination of the fair allocation amount for that reference period.
Part V. The Regulatory Asset			
IESO deferral (23)(1)	The IESO deferral for each month, commencing May 1, 2017, shall be determined by the IESO in accordance with the regulations.	• The terms of the IESO deferral for each month on the regulatory asset (*including the terms set out below*).	• IESO issue.
Same, retrospective amounts (23)(2)	For greater certainty, the regulations may provide for the IESO deferral to include an amount that was incurred by the IESO on or after May 1, 2017 and before the day this section comes into force.	• Deferral terms that include an amount incurred by the IESO (*see above*).	• IESO issue.
Electricity vendors to provide information (23)(3)	Electricity vendors shall provide to the IESO such information as the IESO may reasonably request for the purposes of determining the IESO deferral under subsection (1) and such further information as may be prescribed.	• Information to be provided by electricity vendors in connection with the regulatory asset.	• IESO issue.
Variance account to be established, maintained (24)(1)	The IESO shall establish and maintain a variance account in which it records the following: […]	• Adjustments to be applied to and recorded in the variance account.	• IESO issue, provided, for clarity, that no adjustments can be made on account of any investment assets (IESO

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
	3. Such other adjustments as may be prescribed, including adjustments in respect of the period that commences on or after May 1, 2017 and before the day this section comes into force.		deferral/variance account can vary up until date of transfer to a financing entity).
Regulatory asset established (25)(1)	Effective May 1, 2017, the IESO has the right, exercisable in accordance with this Act and the regulations, to recover the balance recorded in the variance account from specified consumers.	• Nature and terms of the IESO's right to recover the balance recorded in the variance account from specified consumers.	• IESO issue.
Board to set rates (25)(2)	Subject to subsection (3), the Board shall, from time to time and in accordance with the regulations, determine and set rates payable by specified consumers to allow for the IESO to recover the balance recorded in the variance account.	• Scope of Board's power to determine rates payable by specified consumers to allow for the IESO to recover the balance recorded in the variance account.	• IESO issue.
Transfer of regulatory asset (26)(1)	The IESO may from time to time, in accordance with this Act and the regulations, transfer a specified portion of the regulatory asset to a financing entity in accordance with this section.	• Terms by which the IESO may transfer a portion of the regulatory asset to a financing entity.	• Transfer to occur by way of an agreement between the IESO and financing entity on terms and conditions that do not contravene the Act.
Part VI. The Investment Asset			
Investment asset, irrevocable rights and interests (29)(1)	The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests of investment interest owners: […] 2. The right to receive, collect and recover the clean energy	• Parties holding amounts in respect of the clean energy adjustment in addition to the electricity vendors and the IESO. • Accounts with rights and	• We do not expect there to be any other prescribed parties (at least initially) identified for Section 2. • Prescribed accounts to mean any account in the name of

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
	adjustment that is imposed, invoiced and recoverable under this Act, including any amounts in respect of the clean energy adjustment that are held by electricity vendors, the IESO and other prescribed parties. 3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.	entitlements of investment interest owners in respect of the investment asset. (#7)	the IESO or any electricity vendor into which amounts in respect of the CEA are remitted as well as accounts opened in the name of the financing entity by OPG as FSM.
Part VII. Miscellaneous			
Appointment of agent, invoicing or collection (33)(1)	If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.	• Circumstances requiring the appointment of a person to carry out the obligations of an electricity vendor with respect to invoicing or collection. (#5)	• Prescribed circumstances should include any time that an electricity vendor is unable or unwilling to perform its obligations under the Act, i.e. an insolvency event.

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
References in marketing materials and offering documents (40)	No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under section 5 unless the prescribed requirements, if any, are satisfied.	• Requirements to be met in order to disclose financing, funding obligations or references to rights, obligations, guarantees or undertakings in marketing materials or offering documents.	• Disclosure relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under section 5 in marketing materials or offering documents shall be permitted if such disclosure is required by applicable law, required to be disclosed in connection with any financing of funding obligations (i.e. disclosure to rating agencies), prior written notice of such disclosure is given to the Minister and the Minister is given a reasonable opportunity to comment on the disclosure prior to its disclosure.
Regulations (41)(1)	The Lieutenant Governor in Council may make regulations in respect of the following matters: 1. Governing anything that is required or permitted to be prescribed or that is required or permitted to be done by, or in accordance with, the regulations or as authorized, specified or provided in the regulations. 2. Defining, for the purposes of a regulation, words and expressions used in this Act that are not defined	• *See at left for examples of key regulations under the Act.*	• Regulations to provide that, without approval of the Minister, no financing entity may be voluntarily wound-up, liquidated or dissolved until one year after all of its funding obligations have been paid. • (41)(1)7 to provide a mechanism for an investment interest owner to apply to a court for an order requiring

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
	in the Act. 3. Governing the incurrence of debt for the purposes of the definition of "refinancing" in subsection 1(1). 4. Governing the inclusion of information under this Act on or with invoices, which may include requiring notice to be provided by electricity vendors to specified consumers and other prescribed persons regarding the adjustments, including providing for different requirements in different circumstances and for different classes of specified consumers. 5. Governing the inclusion of information about the clean energy adjustment and any other matters provided for under this Act on or with invoices issued to specified consumers, including the form that the information must take and the form of the invoices and the form of any notice to be provided to the specified consumer under this Act. 6. Governing the manner by which invoices or notices provided for under this Act are to be provided to specified consumers and other prescribed persons. 7 Providing for a right of compensation for investment		compensation in the event that any person fails to give effect to the rights and interests of the investment interest owner in the investment asset, for the court to make any order it sees fit in that regard, and for such order to be enforceable against the Province or any person that fails to comply with its obligations under the Act.

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
	interest owners affected by a breach under section 29 and the manner in which such a right may be enforced under this Act. 8. Prescribing the time within which any action required by this Act may be required to be done. 9. Providing for such other matters as the Lieutenant Governor in Council considers advisable to carry out the purpose of this Act.		
Part VIII. Amendments to Other Acts			
42(2)	Subsection 25.33 (1) of the Act is amended by striking out "and" at the end of clause (a), by adding "and" at the end of clause (b) and by adding the following clause: (c) such amounts as may be prescribed that are paid or incurred by the IESO in relation to the *Ontario Fair Hydro Plan Act, 2017*.	• Consumers other than specified consumers. (#4)	• IESO issue
42(3)	Subsection 25.33(2) of the Act is amended by striking out "and" at the end of clause (a), by adding "and" at the end of clause (b) and by adding the following clause: (c) such amounts as may be prescribed that are paid or incurred by the IESO in relation to the *Ontario Fair Hydro Plan Act, 2017*.	• Amounts paid or incurred by the IESO.	• IESO issue

Legislation Section Reference	Legislation Excerpt	Nature/Description of Regulation(s)	Proposed Content for Regulations[1]
42(4)	Clause 25.33(4)(b) of the Act is amended by adding "or as may be required by a regulation made under this Act or the *Ontario Fair Hydro Plan Act, 2017*" at the end.	• The IESO, distributors and retailers that may make and receive payments, set-offs and credits.	• IESO issue

April 3/20

Meeting w/ Hydro Ottawa, Enbridge, LSB, Power TD, Scotiabank

Carolyn - welcome to legislative counsel.
- Conversation. Explain future notes
- Proposed longer to achieve objectives
- Begin page by page flip

① Fair allocation plan - what supposed to do - why amended

② Recovery plan.

Steve - 2 pillars are the basis on which establish parameters for debate - recognizes on which plan will be affected

- funding gap @ LSO level as a result of plan decisions (Fair allocation plan) clarify

TD - amt of sat debt - have don to raising discr?

Brad - some form of cash response - pharma as agent to intervene

Scott - in absence of consult - in ~~to~~ OTC - get consult - ~~to~~ pharm

Brad - if some respond - stroke for afib.

Scott - how impt is AHA? -

Brad - will have to interject during legis. mtg.

Mike - go for AHA to ~~be~~ get pharm one of 2 kind - be aware it's different - direct rate payer

Steer - recovery period - last piece (dizziness is dotted on top) - legislation starts to look like,

- combined networks and comm that we have touched process

8:30 – 6:50 – Energy Policy
- OPG.
- Contract Ship - Under.
- TD.

Ontario Fair Hydro Plan Meeting
Wednesday, April 5, 2017
10:00 am – 4:00 pm
199 Bay St. – Blakes Office

Agenda

- Legislative timeline and sequencing
- Building block concepts
- Detailed discussion
- Plan for next meeting - Friday, April 7

Kacaba, Jennifer (ENERGY)

From: Calwell, Carolyn (ENERGY/MEDEI/MRI)
Sent: April 27, 2017 3:16 PM
To: Shear, Dan (ENERGY); Rehob, James (ENERGY); Kacaba, Jennifer (ENERGY); Johnson, Paul (ENERGY/MEDEI/MRI)
Subject: FW: priorities

fyi, in case you too have wondered how many regulatory assets are there (one) and how the sale of the RA will work.

From: ASHBOURNE, STEPHEN [mailto:STEPHEN.ASHBOURNE@blakes.com]
Sent: April-27-17 3:03 PM
To: Calwell, Carolyn (ENERGY/MEDEI/MRI); JACKSON, ADAM; STOKES, BRYSON
Cc: WILSON, JUDY
Subject: RE: priorities

Yes, one RA, and one IA. FYI, I have tried to say "the RA" rather than "a RA" for that reason. Same of IA.

Note that the RA is the right to recover the balance of the variance account – which is a singular balance.

The IA is the single bundle of rights in 25xx(1), which get carved into investment interests (the terms of which will be described in the applicable transfer agreement).

Note that "funding rebates" form part of the IA, but in fact get streamed to only the relevant investment interest – so the idea of undivided co-ownership is strained a bit by introducing the funding rebate concept the way we have suggested, but I think it can be made to work in the transfer agreement when the time comes.

Hope that helps. Steve

Subject: RE: priorities

Hi Carolyn. The upshot is that all external counsel agreed that a transfer agreement would be required. We picked up the requirement for a cash payment based on earlier iterations – I believe from PH. My only goal is to properly link the amount of the reduction in the RA to the amount of the investment interest, so that we can say that ratepayers are not paying more as a result of an arbitrary decision regarding the value of the RA reduction. Requiring a cash payment seems

like an easy way to discipline that part. Neither MF or PH raised a concern regarding that cash payment mechanic. Hope that makes sense. Steve

Subject: RE: priorities

This is great, Steve. Tara came back with these questions:

I'm looking at the proposed language for subs. 22xx (2) and just want to clarify something else… now we are talking about agreements. Do you want the IESO to be *required* to enter into an agreement with the FE in order to carry out a transfer? And do you want to impose as a requirement the consideration of a cash payment under the agreement? Because right now as proposed, the agreement for cash is just one option available to the IESO. If this is supposed to be the only way for a transfer to take place, I want to make that clear.

Could you give me a call to discuss this a couple of my other questions?

Carolyn

Internal Draft: April 4, 2017

TORYS COMMENTS April 6, 2017

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

~~Article 1 – Purpose~~

~~IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).~~

~~Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").~~

~~If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to~~

~~cover a funding shortfall during one period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.~~

~~It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.~~

Torys Introductory Comments

1. **We accept that for operational and perhaps constitutional reasons there should be a Fair Allocation Plan and a Treasury Plan (which we would prefer be renamed "Financing Plan"). But the risk of non-compliance with either Plan is not one that investors should be expected to assume. They are not in a position to do due diligence on the point. Therefore, the Province must assume responsibility for non-compliance with the Fair Allocation Plan and the Financing Plan as part of its Undertaking in Article 10.**

2. **This draft contemplates that anyone can be a Regulatory Asset Owner. The earlier drafts that we received through MOE contemplated that only a "Financing Entity" could be a Regulatory Asset Owner. We note that there are advantages and disadvantages to either approach and there could also be a political dimension to the decision (i.e., the risk of "undesirable" Regulatory Asset Owners). We note that this draft does not even have a definition of "Financing Entity" (as in the approach reflected in this draft such a definition is not necessary; although we do note that it would be illogical to define any role for OPG as Administrative Agent if there is no role for Financing Entities in the legislation). In case a decision is made to limit Regulatory Asset Owners to Financing Entities, we propose the following definition for "Financing Entity": "means any entity established at the initiative of and managed by OPG for the purposes of supporting the Financing Plan". In addition, we would propose that another part of the legislation (dealing with amendments to the Act relating to OPG) provide that "in the case of any Financing Entity that is a wholly-owned subsidiary of OPG, such subsidiary would not be subject to Part VI of the *Electricity Act* (Ontario) and in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the *Income Tax Act* (Canada) or the *Taxation Act, 2007* Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment**

required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act". We are still working on tax efficiency and bankruptcy remoteness for Financing Entities and this would add flexibility.

3. It is important that the legislation provide as much flexibility as possible to enable third party financing. The current draft presumes that "the" Regulatory Asset will be a single growing asset in which different persons may own an undivided co-ownership interest. This is too restrictive. We strongly suggest that the legislation be drafted so as to provide that there may be more than one co-owned Regulatory Asset by referring to "a" Regulatory Asset rather than "the" Regulatory Asset. Regulatory Assets must be capable of being aggregated, so as to become larger, and disaggregated to facilitate absolute sales (rather than being limited to selling co-ownership interests as the only option).

4. Our preference continues to be for the smallest role possible for OEB. Whatever that role is, it is essential that any approvals or consents by the OEB be completed before any financing that is dependent on such approval or consent and, once OEB's determination is made it must be irrevocable and non-appealable. For example, after the initial approvals of the Fair Allocation Plan/Financing Plan there would be no further OEB review, etc. If there is subsequent review required, no debt issued prior to that point would be affected and the Financing Entity would not be able to buy Regulatory Assets/issue additional debt until such subsequent review occurred (so the Province will have to step in again with the IESO to provide interim financing in those circumstances).

5. We understand the Ministry is pursuing a report that will assess which are the relevant generation facilities and what are their asset lives in an effort to identify the total value that can be extended to future ratepayers, but that report will not be available until after the legislation is in place. The legislation must provide sufficient flexibility in the event the analysis finds there is not enough value that can be extended to future generations so as to support 17% reduction for ratepayers over the next 5 years. Also consider how the analysis will address the risk that generators may choose to retire their facilities at the end of their current Power Contracts and not invest in extending service lives to secure further power contracts at what is likely to be a lower price than they are getting presently? If facilities are retired, how will this affect the Fair Allocation Plan and the constitutional issue (because future ratepayers would be asked to pay for benefits that they never receive).

6. We believe that rather than try to create and manage layers of contractual relationships between each Regulatory Asset Owner and all Electricity Distributors, it is necessary for IESO to be the sole statutory Servicer and for IESO to manage the relationships with the Electricity Distributors (as it does now).

7. We were under the impression that in order for the Regulatory Asset to come into existence it had to begin with IESO recording a deficit or a deferral. The Regulatory Asset comes into existence upon IESO recording that deferred amount. Without that recorded amount, it is difficult to see what IESO is

assigning. We believe that the legislation must stipulate that IESO shall record the amount of any monthly deficiency and that this recording creates the Regulatory Asset. We also have been advised by the Dealer's counsel that there would be a concern if IESO had the ability to indefinitely cover Funding Obligations by continuously creating new Regulatory Assets, so the legislation should provide an end date beyond which IESO could no longer create new Regulatory Assets.

Article 1 – Purpose

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

"Absolute Assignee" means a person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of ~~the~~**a** Regulatory Asset.

"Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.

"Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the ~~Treasury~~**Financing** Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, ~~the~~**a** Regulatory Asset Owner under the ~~Treasury~~**Financing** Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on ~~the~~**a** Regulatory Asset Owner or incurred by on behalf of ~~the~~**a** Regulatory Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the ~~Treasury~~**Financing** Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative ~~Invoicing Agent~~**Servicer**, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset

Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the ~~Treasury~~**Financing** Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the ~~Treasury~~**Financing** Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the **Servicer or a** Regulatory Asset Owner**, as the case may be**.

"Alternative ~~Invoicing Agent~~**Servicer**" means a person appointed under Section 4(8) to assume the ~~invoicing and other activities of any Electricity Distributor under Article 4,~~**obligations of the Servicer,** as agent for and on behalf of ~~the~~**a** Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group. **[NTD: Who will be responsible for determining this attribution methodology? Currently, OEB has legislative authority for setting electricity rates so it would seem that this authority would have to be delegated elsewhere by the Province to avoid OEB regulatory oversight. If it is intended that the OEB would be reviewing and approving the Fair Allocation Plan in any way (which we understand has not been determined), OPG could accept this so long as the FAP is only subject to OEB review and approval before any regulatory assets are purchased and before any debt is issued by the financing entity. This would result in delays in financings so the IESO would need to fund the shortfall on an interim basis and obtain funding to do this. Once the Fair Allocation Plan is reviewed and approved (if this is the intention), there would need to be assurance that there would be no further OEB review. If there is opportunity for further review, it is essential that such review have no impact on prior issued debt and any further financings would be put on hold until such review is completed (during which time the IESO would again need to fund the shortfall on an interim basis and obtain necessary funding). Finally, please consider moving this entire concept to the Regulations.]**

[1] A key question will be how the overall costs will be spread across the rate base **[NTD: Incorrect use of the term. "Rate base" refers to the capital invested in the utility that is used to determine return component of rates under cost of service rate setting. It is not related to customer demand or cost of power. Perhaps "customer base" is what was intended]**. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period.[2]

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [30th] day immediately preceding the first day of the Reference Period.] **[NTD: It would not be practical for OPG as Administrative Agent to have to figure out the number of ratepayers in the group every 6 months. If the Transition Charge is made to be volumetric and not flat fee per connection, this likely becomes unnecessary. On this point, we note that since benefits of the deferral will flow to consumers on a volumetric basis, if costs are to be imposed other than on a volumetric basis this may give rise to constitutional issues]**

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under ~~the~~**a** Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area. **[NTD: Don't know why definition refers specifically to residences as distributors serve other classes of customers too. Suggest defining with reference to the distributor licensed by the OEB in respect of a Service Area. Service Areas are identified in those licences]**

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative ~~Invoicing~~**Collection** Agent) **or by the Servicer [NTD: For Ratepayers billed directly by IESO.]** in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of ~~a residence located~~**connectivity to a distribution network** in the Electricity Distributor's designated Service Area. **[NTD: Not sure this should be limited to residences given the class of customers eligible under the deferral program. Also suggest just calling this electricity bills as they are generally not referred to as invoices]**

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" ~~has the meaning given in Article 1.~~**means a plan developed by the Ministry of Energy to allocate the costs and benefits of the Green Generation Initiative** equitably across present and future Ratepayers.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the ~~Treasury~~**Financing** Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the ~~Treasury~~**Financing** Plan.

"Financing Plan" means the written plan [prepared by the Administrative Agent**]** in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer,

liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including **principal, interest and other financing charges on** indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies **and all taxes payable in connection with the foregoing**) incurred by or on behalf of the Regulatory Asset Owner ~~under the Treasury Plan~~**(other than IESO)** in order to fund ~~a Funding Shortfall for a Reference Period~~**the purchase of a Regulatory Asset**, including any Refinancing of another such payment obligation. **[NTD: Assumes IESO itself will not have Funding Obligations covered under the statute.]**

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment attributable to the Power Contracts in accordance with the Fair Allocation Plan. **[NTD: Need to confirm that when IESO has a shortfall in a given month between what it receives and what it owes under the GA, that the IESO has ability to isolate or calculate each of the three distinct bases for that variance, being (a) existing volume-based variances which are rolled into subsequent month GA and trued-up every 6 months under RPP, (b) existing variances attributable to OREC which are funded by province, and (c) new variances attributable to Fair Hydro program which will be funded by sales to Financing Entities. It may not be necessary or practical to segregate those in the hands of each distributor, unit sub-metering provider and retailer so long as IESO can segregate them once received based on information provided by those parties through IESO Portal or otherwise]**

"Generator" means a generator of electricity that is subject to this Act. **[NTD: Generator is a defined term in other legislation (OEB Act, Electricity Act) so this should be a distinct term such as "FH Generator" to avoid confusion]**

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts. **[NTD: If adjustments for Fair Hydro deferral program are to be applied after existing GA adjustments, then this needs a new name. Existing adjustments are GA and additional adjustments are a separate concept such as "FH Adjustment"]**

"Green Generation Initiative" ~~has the meaning given in Article 1.~~**means the Province's initiative** to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, **and** energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs.

"IESO" means the Independent Electricity System Operator created pursuant to ■.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO ~~Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.~~**Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for [managing the Province's power system].**

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge, right of set-off or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of ~~the~~**a** Regulatory Asset.

"Pledgee" means a person to whom ~~[or for whose benefit]~~ a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3]

"Province" means the Province of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in the Province] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected to the transmission and distribution system assets located in the Province and who are taking electric delivery service within the Province, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4] **[NTD: These should be referred to as "FH-Eligible Consumers" or similar and should align with the description of the eligible customer class provided by the Ministry, i.e. same as OREC-eligible consumers except for consumers served by Independent Power Authorities (who do not pay GA). Careful in use of the word "retail" as that seems to imply customers of retailers, which are part of but only a small part of the FH-Eligible Consumers. Remove reference to transmission-connected customers because not all such customers would be FH-Eligible]**

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan. **[NTD: Not sure if any reason for selecting these dates, but would suggest aligning with RPP re-setting periods of May 1 and November 1 or, better yet, do not hardwire into the legislation but move to Regulations.]**

[3] Should this contemplate the possibility of additional or amended power contracts?
[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of ~~the~~a Regulated Asset Owner by applying the net proceeds obtained by ~~the~~a Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1).

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; (b) for ~~IESO~~**the Servicer**, any bank account into which ~~IESO deposits or receives Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits or receives~~**the Servicer deposits** Transition Charge Collections, Electricity Distributor Remittances or ~~IESO Remittances~~**Servicer Remittances, in each case which account shall be segregated from its other accounts and held in trust for the Regulatory Asset Owners**.

"Regulatory Asset Owner" means, collectively, (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7). **[Note: As per introductory comments, consider if this should be limited to Financing Entities.]**

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, ~~redeem or repurchase,~~ or to provide for the repayment~~, redemption or repurchase~~ (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Retailers" means ■. [Note: include in Ratepayers]

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act. **[NTD: This Act will not establish permitted service areas. Distributors are licensed by the OEB. Each license specifies the distributor's service area. Not clear why service area is a necessary concept for the legislative framework, particularly since it will be irrelevant when the role of the distributors is expanded to retailers and unit sub-metering providers who do not have service areas]**

"Servicer" means the entity appointed by a Regulatory Asset Owner as its agent to manage the billing, collection and remittance of Transition Charges, initially being IESO.

"Servicer Remittances" means, for a Settlement Date, all Transition Charge Collections and Electricity Distributor Remittances received by the Servicer prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by **the Servicer to recover payment of amounts payable by Electricity Distributors to the Servicer in accordance with Article 5.**

"Settlement Date" means the [last Business Day of any month].

~~"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.~~

"Transition Charge" means~~, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].~~ **the non-bypassable portion of the charges billed under any Electricity Invoice issued to a Ratepayer, which amount may or may not be specifically identified in such Electricity Invoice, the collections of which are to be applied to recover Funding Obligations and includes all unpaid arrears of such charges from previous periods. [NTD: If benefit of deferral is provided on a volumetric basis (i.e. the more you consume, the more you save), so too should the costs of the deferral be charged on a volumetric basis. Otherwise, it likely raises constitutional issues. As such, don't divide by consumer base but rather the charge should be set based on forecast volumes of demand as is the case with RPP. That produces a rate "adder" to be billed to consumers. To the extent amounts do not get recovered due to differences between forecast and actual, those would need to be identified and rolled into the amount needed for recovery in the next period]**

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a

~~[5] See footnote 1, above.~~

Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of ~~the~~a Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the related True-Up Period, minus (b) the Actual Finance Amount for such related True-Up Period, plus (c) the Collected Amount Adjustment.

"True-Up Period" means, in relation to a Reference Period, the period from and including the [30th] day immediately preceding the first day of the Reference Period, to but excluding the [30th] day immediately preceding the last day of the Reference Period.

"Undertaking of the Lieutenant Governor in Council" means the undertaking of the Lieutenant Governor in Council given under Section 10(2).

"Unit Sub-Metering Providers" means ■. [Note: Include in Ratepayers.]

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay ~~each~~**all** Transition ~~Charge attributed~~**Charges charged** to it ~~and specified as such~~ in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative ~~Invoicing~~**Collection** Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice. **[NTD: If distributors and others are unable to reflect the charge as a distinct line item on bills in time for May 1 implementation, then the charge will not be "specified" and therefore no obligation to pay. Suggest removing requirement that it be specified. Also suggest saying the obligation on FH-Eligible Consumers is to pay "all" Transition Charges that are "charged" to them, rather than each charge attributed to it. Note that terms of payment as between consumers and distributors are set out in the distributor's conditions of service, which are implied terms of contract as between them. Not sure if similar applies for retailers and unit sub-metering providers. Electricity bills may not set out all terms of payment]**

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer ~~and recorded~~ in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute indebtedness of the Ratepayer ~~to the Regulatory Asset Owner~~. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise. **[NTD: There is no contractual or other direct relationship between ratepayer and regulatory asset owner. Consumer has relationship only with distributor. Suggest that this program rely on the existing framework which obligates consumers to pay distributors and distributors to collect those amounts and remit to IESO together with information**

needed by IESO to perform settlement, rather than trying to create and overlay a separate set of similar obligations on ratepayers, distributors and the IESO through this legislation. For greater comfort, consideration could be given to establishing deemed conditions of licenses for distributors, retailers and unit sub-metering providers, which conditions would require them to collect and remit amounts in accordance with this legislation. There are precedent provisions under the OEB Act for deemed conditions of licences. An added benefit may be that this could be considered a further element of OEB "oversight" (from perspective of the accountants) as license conditions are enforceable provisions under the legislation]

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated ~~on a *pro rata* basis~~**first** to the payment **in full** of related Transition Charges ~~and~~**before any amounts are allocated to** other invoiced amounts~~and the amount so allocated as a payment of related Transition Charges shall be deemed to constitute a Transition Charge Collection~~.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations **[**incurred under the ~~Treasury~~**Financing** Plan**]** (including any adjustments based on modifications to such Funding Obligations made in compliance with the ~~Treasury~~**Financing** Plan or as a result of amendments to the ~~Treasury~~**Financing** Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action~~.~~ **[NTD: Need to consider possibility of errors being made and allowing for corrections].** **[**For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was properly incurred under the ~~Treasury~~**Financing** Plan.**]** In no case shall a Funding Obligation incurred under the ~~Treasury~~**Financing** Plan be affected by a subsequent amendment to the Fair Allocation Plan. **[NTD: Move second last sentence to Regulations.]**

(6) **[**~~Anti-avoidance; No-by-pass – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]~~**NTD: Too vague to be meaningful. Catch through definition of Electricity Invoice.]**

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative ~~Invoicing~~**Collection** Agent shall, as an agent of the

~~Regulatory Asset Owner~~**Servicer**, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative ~~Invoicing~~**Collection** Agent to the Ratepayer in respect of such Reference Period **[NTD: Distributor should not have discretion to specify the charge. All they should be doing is applying the charge to the bill based on the rate adder that is determined by OEB, based on information from Financing Entities which it must accept, in concert with setting RPP price]**. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be ~~deemed to have been imposed on and billed to the applicable Ratepayer~~**due and owing**.

[NTD: We suggest moving sub-sections (2), (3) and (4) to Regulations.]

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][65] or if applicable the [Alternative Collection Agent][76] shall calculate the Period Transition Charge applicable to the Reference Period.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative ~~Invoicing Agent~~**Servicer** of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area. **[NTD: Currently, the OEB and not the IESO has jurisdiction to set rates and charges for electricity. If this role is to be given to IESO, they would need to be given this power. It seems that this role fits better with the OEB, in which case we would suggest that OEB should determine the FH Charge based on information it receives from the Financing Entities, which information it must be required to accept, and that it should do so as part of the process it now applies to set RPP rates. OEB would essentially be taking the amounts from the Financing Entities and applying them to forecast demand levels for the FH-Eligible Consumer class that it will need to get from IESO in order to develop a rate adder that distributors, retailers and unit sub-metering providers will then be required to apply to consumer bills]**

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by ~~[IESO] and specified as such in an Electricity Invoice~~**the Servicer** shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

[65] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today- ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[76] Should this be a designated government official, rather than an agent appointed by investors?

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose~~, attribute,~~ **and** bill ~~and invoice~~ the Transition Charges.

(7) **IESO Successors~~ of IESO~~** – Any~~ successor of~~ IESO **Successor** shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative ~~Invoicing Agent~~Servicer** – If a Replacement Event occurs in respect of ~~any Electricity Distributor~~**the Servicer**, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative ~~Invoicing Agent~~**Servicer** to perform some or all of the obligations and duties required to be undertaken by ~~such Electricity Distributor under this Article 4,~~**the Servicer,** as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative ~~Invoicing Agent~~**Servicer** shall become obligated to perform such assumed obligations in replacement of ~~such Electricity Distributor.~~ **the Servicer.** Any ~~Electricity Distributor~~**Servicer** that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative ~~Invoicing Agent~~**Servicer** and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative ~~Invoicing Agent~~**Servicer** to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, ~~IESO~~**the Servicer**, Alternative ~~Invoicing Agent~~**Servicer** or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose~~, attribute,~~ **or** bill ~~or invoice~~ Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure. **[NTD: Consideration should be given to having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce]**

(10) No Set-Off or Reduction – No Servicer or Electricity Distributor may set off or reduce (by counterclaim, defence or otherwise) the amount payable by it pursuant to this Article 4.

(11) ~~(10)~~ **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative ~~Invoicing Agent~~**Servicer** or any ~~[~~Alternative Collection Agent~~]~~ to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the ~~Regulatory Asset Owner~~**Servicer**, ~~[diligent efforts]~~ to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall ~~be deemed to~~ hold such amounts in trust for the Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of ~~IESO or if applicable the Alternative Collection Agent~~ **the Servicer**.

(4) **Duty to Collect Electricity Distributor Remittances** – ~~IESO or if applicable any Alternative Collection Agent~~**The Servicer** shall, as an agent of the Regulatory Asset Owner, ~~undertake [diligent efforts] to~~ accept and collect Electricity Distributor Remittances~~.~~ **from Electricity Distributors and Transition Charge Collections from Ratepayers that pay their Electricity Invoices directly to the Servicer. [NTD: Consider building this obligation into a deemed condition of licence for the IESO.]**

(5) **Segregation of Electricity Distributor Remittances** – ~~IESO and if applicable the Alternative Collection Agent~~**The Servicer** shall [promptly] segregate Electricity Distributor Remittances **and Transition Charge Collections** from other payments received or held by it and deposit such Electricity Distributor Remittances **and Transition Charge Collections** into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances **and Transition Charge Collections** having been made into its Regulatory Asset Account, ~~IESO or if applicable any Alternative Collection Agent shall be deemed to~~**the Servicer shall** hold such amounts in trust for the Regulatory Asset Owner.

(6) ~~IESO~~**Servicer Remittances** – On each [Settlement Date], ~~IESO and if applicable the Alternative Collection Agent~~**the Servicer** shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **IESO Successors** ~~of IESO~~ – Any ~~successor of~~ IESO **Successor** shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the

obligation to collect Electricity Distributor Remittances and **Transition Charge Collections and** to remit ~~IESO~~**Servicer** Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province[87] **[NTD: This does not make sense because a person who acquires distribution system assets or is authorized to collect distribution rates must be a licensed electricity distributor and would therefore take on the obligations of a distributor]**, then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and ~~collect~~**collection** of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area **[NTD: Everything from "including" onward is unnecessary because ratepayers in a distributor's service are necessarily would include all consumers connected to the distribution system and taking distribution service in the area]**; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates **[NTD: This is governed by the Conditions of Service for distributors and under the Distribution System Code, but not sure what equivalents are for consumers served by retailers and unit sub-metering providers]**; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, ~~IESO, Alternative Invoicing Agent~~**the Servicer**, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit ~~IESO~~**Servicer** Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure. **[NTD: Consideration should be given to having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce]**

~~(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as~~

[87] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

~~applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to and over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owner.~~

~~(12) **No Set-off, etc.** – The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.]~~

[NTD: Redundant: Up to Servicer to deal with LDCs.]

[NTD: Redundant.]

(11) ~~(13)~~ **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or ~~IESO~~**Servicer** Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and ~~IESO~~**Servicer** Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] **[**~~Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable~~**NTD: Suggest a broader remedy such as appointment of a receiver.]**

(12) ~~(14)~~ **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – ~~The~~ Regulatory ~~Asset~~Assets

(1) **Composition** – ~~The~~**A** Regulatory Asset shall constitute ~~a~~**an existing, present** property right ~~and interest~~**consisting of the following rights** of the Regulatory Asset Owner ~~in the following:~~**:**

a. the ~~present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;~~**right to record the Regulatory Asset in its accounts;**

b. the ~~present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and~~**right to impose,** invoice ~~the Transition Charges in accordance with Article 4~~**, collect and received Transition Charges,** Electricity Distributor **Remittances and Servicer Remittances in an amount necessary to recover all of its Funding Obligations as the same become due and payable**;

~~c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;~~

c. ~~d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;~~**right to receive all present and future payment obligations of Ratepayers, Electricity Distributors and the Servicer arising pursuant to Article 4 and Article 5;**

~~e. all Transition Charge Collections;~~

d. the right to obtain periodic adjustments to the Transition Charges in accordance with Article ■ [true-up procedure] as necessary to recover the Funding Obligations as the same become due and payable;

e. ~~f. all rights and entitlements under each Regulatory Asset Account and~~**the right to** all amounts ~~on deposit~~**held** in ~~any such~~**each** Regulatory Asset Account;

f. ~~g.~~ all ~~Related Rights; and~~**revenue, collections, claims, payments, money and** proceeds of or derived from the **rights described in (a) through (e), regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds; and**

g. ~~h.~~ all ~~proceeds of or derived from the foregoing.~~**Related Rights.**

~~The~~**A** Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected

and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset Owner ~~made under the Treasury Plan~~**[NTD: No reason why Financing Plan should restrict assignability of Regulatory Asset → At worst may affect enforceability of related Funding Obligations, if any.]** shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition~~[, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.]~~**, provided that the parties to the governing documentation have expressly stated that such Disposition is a sale or other absolute transfer.** Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. ~~A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of Transition Charge Collections or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.~~

(3) **Deemed Perfection and Priority of Dispositions** – ~~At the time a~~**Any** Disposition ~~is made, the absolute assignment of the property rights and~~**of an** interest in ~~the~~**a** Regulatory Asset ~~subject to the Disposition shall be deemed to have been and~~**shall be vested, valid, binding and perfected from the time when such Disposition is made. Such Disposition** shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall ~~have priority over~~**be free and clear of** any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge~~[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no~~**. No** consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner~~ in respect of a Funding Obligation incurred under the Treasury Plan~~ shall be deemed to have been and shall be perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act. A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in Transition Charge Collections or other related proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge **describing the Regulatory Asset as "intangible" property** for informational purposes only under the [PPSA].

~~(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.~~

~~(7) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.~~

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article ~~7~~.**7 [NTD: Not clear what type of authority this refers to. LGIC makes orders. Minister can be given power to issue directives. Legislation can require Minister to issue plans, such as the LTEP. Minister can require others to prepare plans. Need to clarify how this is being done. It would also be unusual for the FAP to be issued by the Minister but then made subject to review and approval by the OEB (as some have considered). Not aware of any other examples where OEB had power to review something coming from the Minister].** The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to ~~the following~~**such** principles ~~and parameters~~[9]**as may be prescribed. [NTD: Move to Regulations.]**

1. **[**Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair

[9] ~~We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.~~

Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][108].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.**] [NTD: Need to understand what this is contemplating – could it result in crediting back to customers certain amounts after they have already been paid because FAP realizes they should have deferred more to the future? This sounds unworkable and would create significant uncertainty if the effects of a FAP could be undone by a subsequent FAP]**

(3) **Attribution Methodology** – The Fair Allocation Plan ~~shall~~**may** specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. **[**~~may have regard to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]*~~**NTD: Who develops the methodology? How can it be objective if it requires Minister to have regard to certain principles and parameters? Is such methodology needed if charge is made to be volumetric?]**

(4) **[Confirmation][Review] of the Fair Allocation Plan** – [OEB?]

Article 8 – The ~~Treasury~~Financing Plan

[NTD: Consider how much of this Article can be moved to Regulations.]

(1) **Power to Prepare and Implement the ~~Treasury~~Financing Plan** – In compliance with a [written order][***MOE to confirm process.***] of the Minister of Energy, the Administrative Agent shall prepare and propose the adoption of a ~~Treasury~~**Financing** Plan. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a ~~Treasury~~**Financing** Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a ~~Treasury Plan.~~**Financing Plan. [NTD: Why not just say that AA shall prepare . . .]**

(2) **Required Terms and Conditions of the ~~Treasury~~Financing Plan** – The ~~Treasury~~**Financing** Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future

[108] Consider if a quantitative limit needs to be included in the legislation.

Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The ~~Treasury~~**Financing** Plan shall be consistent with the principles, parameters, requirements and conditions ~~set forth in Schedule 3 and such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation].~~**as may be prescribed]. [NTD: Not clear what sort of order power is envisioned or why this cannot be baked into the regs without need for Minister to ask for it]**

(3) **Power to Review and Approve the ~~Treasury~~Financing Plan** – The Minister of Energy may, by written order, designate one or more persons to review the ~~Treasury~~**Financing** Plan and to review and assess the consistency of the Funding Obligations incurred with such ~~Treasury~~**Financing** Plan, and the Minister of Energy may specify requirements in respect of such review in such written order. The Administrative Agent, or such other person(s) as may be designated by written order of the Minister of Energy made pursuant to Section 8(1), shall make any such amendments to the ~~Treasury~~**Financing** Plan, and submit a revised ~~Treasury~~**Financing** Plan to the **[OEB]** for approval within [the time period specified in such written order]/[[•] days of such written order].[***Consider periodic amendments to the ~~Treasury~~Financing Plan following an annual review; provided that amendments cannot affect the existing Funding Obligations. Consider the level of oversight the MoE/OEB will have over this process?***] **[NTD: This sounds like a very cumbersome two-step review and approval process. First Minister can get someone to review and assess the plan and then OEB must approve it? What is the point of having two processes? What value would OEB be expected to add, given the nature of the Financing Plan and OEB expertise? What is the contemplated outcome of the first part of this review by the Minister or designate?]**

(4) **Approval of ~~Treasury~~Financing Plan** – The **[OEB]** shall have the power to and shall approve or disapprove of the ~~Treasury~~**Financing** Plan based solely on whether the ~~Treasury~~**Financing** Plan is consistent with (i) the principles, parameters, requirements and conditions set forth in Schedule 3, (ii) such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation] [and (iii) the Fair Allocation Plan]. If the **[OEB]** approves the ~~Treasury~~**Financing** Plan, then such ~~Treasury~~**Financing** Plan shall be implemented by the Administrative Agent. If the OEB disapproves of the ~~Treasury~~**Financing** Plan or otherwise fails to approve the ~~Treasury~~**Financing** Plan, then the Administrative Agent shall re-submit the ~~Treasury~~**Financing** Plan with such amendments as the Administrative Agent shall consider necessary for the ~~Treasury~~**Financing** Plan to be approved by the OEB. **[NTD: If the OEB is required to review and approve the Financing Plan in any, OPG could accept this only if the Financing Plan is subject to OEB review and approval before any regulatory assets are purchased and before any debt is issued by the financing entity. This would result in delays in financings so the IESO would need to fund the shortfall on an interim basis and obtain funding to do this. Once the Financing Plan is reviewed and approved (if this is the intention), there would need to be assurance that there would be no further OEB review. If there is opportunity for further review, it is essential that such review have no impact on prior issued debt and any further financings would be put on hold until such review is completed (during which time the IESO would again need to fund the shortfall on an interim basis and obtain necessary funding)**

(5) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the ~~Treasury~~**Financing** Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the ~~Treasury~~**Financing** Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(6) **Establishment of Special Purpose Entities** – If the implementation of the ~~Treasury~~**Financing** Plan contemplates the establishment of one or more special purpose finance entities to incur Funding Obligations under the ~~Treasury~~**Financing** Plan, as an Absolute Assignee and on a basis that limits the recourse for the payment of such Funding Obligations to such Absolute Assignee's interest in, to and under the Regulatory Asset, the Administrative Agent shall have regard to the characteristics ~~specified in Schedule 4 in establishing such special purpose entity~~**as may be prescribed.] [NTD: Consider introducing concept of a Financing Entity defined as per our introductory notes.]**

(7) **Obligation to Apply ~~IESO~~Servicer Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[~~119~~]

(8) **Non-Recourse** – The ~~Treasury~~**Financing** Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative ~~Invoicing Agent~~**Servicer**, and Alternative Collection Agent, the Administrative Agent, the OEB, the Province or the Lieutenant Governor in Council, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part or expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

[~~119~~] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

(9) **Incurrences are Binding** – Despite any failure to adhere to the ~~Treasury~~**Financing** Plan or to comply with any requirement of this Part **or Part VIII, including the Fair Allocation Plan**, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this ~~Part~~**Act**, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure **and any associated Transition Charges will be deemed to be in accordance with the Fair Allocation Plan and the Financing Plan**.

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation. **[NTD: Does this include Financing Entities? If so, the outcome of such investigation cannot adversely impact on FE's ability to recover regulatory asset amounts. See existing audit rights of OEB to avoid duplication]**

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Lieutenant Governor in Council, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part. **[NTD: The outcome of such investigation cannot adversely impact on FE's ability to recover regulatory asset amounts.]**

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of the actual incremental costs incurred by such person of providing administrative or servicing services.] **[NTD: OPG believes that it is important for the legislation to provide (likely in the part of the Bill dealing with OPG specific amendments) that the risks and cost consequences to OPG of being an Administrative Agent or of consolidating a Financing Entity for accounting purposes shall not be considered by the OEB in setting the regulated payment amounts for OPG.]**

Article 10 – Undertaking of the Lieutenant Governor in Council

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Lieutenant Governor in Council may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly**, including through the**

introduction of any bill or the passing of any legislation or regulation. The Lieutenant Governor in Council undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Lieutenant Governor in Council~~.~~ **, including through the introduction of any bill or the passing of any legislation or regulation. [NTD: Consider whether LGIC is the proper reference.]**

(2) **Undertaking and Agreement** – The Lieutenant Governor in Council undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Lieutenant Governor in Council will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time**, including through the introduction of any bill or the passing of any legislation or regulation.**

The Lieutenant Governor in Council undertakes and agrees with the Regulatory Asset Owners that if IESO becomes insolvent or otherwise incapable of performing its obligations under this Part, an IESO Successor will be established capable of performing such obligations in order that the Regulatory Asset Owners may appoint the IESO Successor as an Alternative Servicer. The Lieutenant Governor in Council undertakes and agrees with the Regulatory Asset Owners to fully compensate the Regulatory Asset Owners for any failure by the Lieutenant Governor in Council to comply with its undertakings and agreements in this Article 10(2) for any loss suffered by the Regulatory Asset Owner as a result of such failure.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Lieutenant Governor in Council, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a ~~Treasury~~**Financing** Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the ~~Treasury~~**Financing** Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the ~~Treasury~~**Financing** Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the ~~Treasury~~**Financing** Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the ~~Treasury~~**Financing** Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or

transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

[NTD: OPG specific amendments to be included in the Bill.]

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the ~~Treasury~~Financing Plan

The ~~Treasury~~**Financing** Plan shall have regard to the following principles, parameters, requirements and conditions:[***Consider others.***]

(1) the ~~Treasury~~**Financing** Plan shall, in respect of each Reference Period, describe the allocations of Unrecovered Transition Costs to each Reference Group as contemplated by the Fair Allocation Plan;

(2) the Administrative Agent shall make a good faith estimate of the Funding Shortfalls for each Reference Period, based on the terms of the Power Contracts and assumptions considered to be reasonable respecting forward market prices for electricity;

(3) the Administrative Agent shall describe alternative funding arrangements considered to be suitable for the purpose of funding the estimated Funding Shortfalls, including by reference to short term and/or long term Funding Obligations that could reasonably be incurred by Regulatory Asset Owner for such purpose;

(4) such Funding Obligations shall reflect quantities, maturities, payment obligations, prepayment or redemption rights and such other features so that the effect of incurring such Funding Obligations would be that the payments made thereunder in respect of each Reference Period (including the anticipated Finance Amounts becoming payable in relation to such Funding Obligations) would reasonably correspond to the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

(5) the ~~Treasury~~**Financing** Plan shall reflect the outcome of a financial model that incorporates the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges attributed to a hypothetical Ratepayer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation having regard to the application of the Allocation Methodology); [***Consider what outputs from OPG will be tested by the OEB and when. The modelling in the ~~Treasury~~Financing Plan may permit the OEB to check progress against the model from time to time, which may provide a basis for the MoE/OEB to require a review/amendment to the ~~Treasury~~Financing Plan if the ongoing operation of the program results in significant deviation from the model. Consider whether this flexibility is desirable.***]

(6) the Administrative Agent, for and on behalf of each Regulatory Asset Owner, shall seek to incur Funding Obligations from time to time on the best terms available at such time for a financing transaction of the size and type contemplated, and having regarding to the following parameters:

a. whether the Regulatory Asset Owner[s] will require committed access to short term liquidity to cover estimated Funding Shortfalls prior to incurring fixed term Funding Obligations, and the amount and repayment terms of any such required liquidity; provided that any Repayment required to be made under the terms of such short-term liquidity would not obligate a Regulatory Asset Owner to repay an amount in relation to a Reference Period that would have the effect of the ~~Treasury~~**Financing** Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

b. the basis upon which the Administrative Agent will select the term to maturity of any other Funding Obligations; provided that any Repayments required to be made under the terms of such Funding Obligations shall not obligate a Regulatory Asset Owner to repay an amount in relation to a Reference Period that would have the effect of the ~~Treasury~~**Financing** Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

c. the basis upon which the interest rates applicable to such Funding Obligations would be determined;

d. the reference capital or finance market in which such Funding Obligation would be incurred, including markets outside of Canada if considered by the Administrative Agent to be appropriate in the circumstances;

e. the currency of payments under such Funding Obligations and, if the Funding Obligations are denominated in a currency other than Canadian dollars, the basis upon which the Administrative Agent shall cause the [applicable] Regulatory Asset Owner to enter into hedging transactions to mitigate currency risk, including acceptable minimum and maximum coverage levels, having regard to the availability of related derivatives having notional amounts corresponding to the repayment and maturity profile of such Funding Obligations;

f. the basis upon which the Administrative Agent will select counterparties under any transaction to be entered into by a Regulatory Asset Owner, including any paying agent, servicer, cash manager, liquidity provider, hedge counterparty, account bank, lender, note trustee, security trustee, paying agent, registrar/transfer agent, financial services agent, arranger or manager;

g. the basis upon which the Administrative Agent will manage counterparty risk, including by providing for maximum counterparty exposure limits having regard to concentration, credit and other identified risks with respect to individual counterparties or countries;

h. the basis upon which the Administrative Agent will negotiate and settle Finance Amounts, including the amount of any Redemption Amounts, Finance Reserve Deposits and Additional Funding Charges;

(7) the basis upon which Funding Obligations may be redeemed, prepaid, repurchased or otherwise affected, having regard for the need to minimize debt service charges and other Funding Costs, and the need to maintain a stable funding platform to finance the Funding Shortfall from time to time on a basis that is consistent with the allocations of Unrecovered Transition Costs to applicable Reference Groups under the Fair Allocation Plan;

(8) the basis upon which any Repayments, Funding Costs and Redemption Amounts will be paid, including any defeasance, sinking fund or through other reserves or liquidity facilities;

(9) the basis upon which fees, charges, expenses, costs, indemnities, reimbursements and other amounts payable to or for the benefit of the Administrative Agent and other agents and service providers to the Regulatory Asset Owner[s] may be determined, allocated and paid;

(10) the timing and basis upon which Finance Reserve Deposits and Finance Reserve Withdrawals may be made;

(11) the basis upon which any obligations for any other Additional Funding Charges may be incurred and paid;

(12) the basis upon which the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied, including in relation to any counterparty enforcement and realization scenario;

(13) the transmittal to [the IESO] of information related to the amounts to be included in the determination of the Period Transition Charge for a Reference Period;

(14) the basis upon which any Disposition may be made or effected by a Regulatory Asset Owner, including parameters for determining the purchase price for the interest in the Regulatory Asset that is the subject matter of such Disposition, and any consents and releases that may be usefully obtained in connection with such Disposition;

(15) a description of each special purchase entity that will purchase the Regulatory Asset from the IESO, including proposed capitalization, governance, and restrictions on their powers and activities having regard to the parameters in Schedule 4; and

(16) the basis on which any Pledge may be given or effected.

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

Schedule 4

Creation of any Special Purpose Entity to become a Regulatory Asset Owner]

(1) Powers and Abilities:

a. No part of the revenue or assets of a Regulatory Asset Owner shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. Each Regulatory Asset Owner shall be authorized to:

i. incur the Funding Obligations contemplated by a ~~Treasury~~**Financing** Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a ~~Treasury~~**Financing** Plan and for administrative services; and

iii. pledge the Regulatory Asset to secure the Funding Obligations incurred by the Regulatory Asset Owner;

c. So long as any Funding Obligations contemplated under a ~~Treasury~~**Financing** Plan are outstanding, the Regulatory Asset Owner shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity;

d. the Regulatory Asset Owner shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a ~~Treasury~~**Financing** Plan;

e. the Regulatory Asset Owner shall cause the proceeds obtained by incurring any Funding Obligation to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a ~~Treasury~~**Financing** Plan; and

f. so long as the Regulatory Asset is pledged to secure Funding Obligations, the Regulatory Asset Owner must apply revenues from the collection of Transition Charges only to repay such Funding Obligations and other costs as provided for in a ~~Treasury~~**Financing** Plan.

(2) Governance of Regulatory Asset Owner – The Regulatory Asset Owner shall shall be created having regard to the following principles:[***OPG to confirm if SPE will be a trust or another type of entity.***]

a. **[Number of trustees]**

b. [Replacement of trustees; vacancies; appointment of successors]

c. [Removal of trustees for neglect of duty or misconduct]

d. [Quorum and meetings]

e. [Fiduciary duty]

f. [Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]

g. [Delegation of powers and duties to administrative agents]

h. [Delegation of powers and duties to administrative agents]

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Torys Introductory Comments

1. We accept that for operational and perhaps constitutional reasons there should be a Fair Allocation Plan and a Treasury Plan (which we would prefer be renamed "Financing Plan"). But the risk of non-compliance with either Plan is not one that investors should be expected to assume. They are not in a position to do due diligence on the point. Therefore, the Province must assume responsibility for non-compliance with the Fair Allocation Plan and the Financing Plan as part of its Undertaking in Article 10.

2. This draft contemplates that anyone can be a Regulatory Asset Owner. The earlier drafts that we received through MOE contemplated that only a "Financing Entity" could be a Regulatory Asset Owner. We note that there are advantages and disadvantages to either approach and there could also be a political dimension to the decision (i.e., the risk of "undesirable" Regulatory Asset Owners). We note that this draft does not even have a definition of "Financing Entity" (as in the approach reflected in this draft such a definition is not necessary; although we do note that it would be illogical to define any role for OPG as Administrative Agent if there is no role for Financing Entities in the legislation). In case a decision is made to limit Regulatory Asset Owners to Financing Entities, we propose the following definition for "Financing Entity": "means any entity established at the initiative of and managed by OPG for the purposes of supporting the Financing Plan". In addition, we would propose that another part of the legislation (dealing with amendments to the Act relating to OPG) provide that "in the case of any Financing Entity that is a wholly-owned subsidiary of OPG, such subsidiary would not be subject to Part VI of the *Electricity Act* (Ontario) and in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the *Income Tax Act* (Canada) or the *Taxation Act, 2007* Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act". We are still working on tax efficiency and bankruptcy remoteness for Financing Entities and this would add flexibility.

3. It is important that the legislation provide as much flexibility as possible to enable third party financing. The current draft presumes that "the" Regulatory Asset will be a single growing asset in which different persons may own an undivided co-ownership interest. This is too restrictive. We strongly suggest that the legislation be drafted so as to provide that there may be more than one co-owned Regulatory Asset by referring to "a" Regulatory Asset rather than "the" Regulatory Asset. Regulatory Assets must be capable of being aggregated, so as to become larger, and disaggregated to facilitate absolute sales (rather than being limited to selling co-ownership interests as the only option).

4. Our preference continues to be for the smallest role possible for OEB. Whatever that role is, it is essential that any approvals or consents by the OEB be completed before any financing that is dependent on such approval or consent and, once OEB's

determination is made it must be irrevocable and non-appealable. For example, after the initial approvals of the Fair Allocation Plan/Financing Plan there would be no further OEB review, etc. If there is subsequent review required, no debt issued prior to that point would be affected and the Financing Entity would not be able to buy Regulatory Assets/issue additional debt until such subsequent review occurred (so the Province will have to step in again with the IESO to provide interim financing in those circumstances).

5. We understand the Ministry is pursuing a report that will assess which are the relevant generation facilities and what are their asset lives in an effort to identify the total value that can be extended to future ratepayers, but that report will not be available until after the legislation is in place. The legislation must provide sufficient flexibility in the event the analysis finds there is not enough value that can be extended to future generations so as to support 17% reduction for ratepayers over the next 5 years. Also consider how the analysis will address the risk that generators may choose to retire their facilities at the end of their current Power Contracts and not invest in extending service lives to secure further power contracts at what is likely to be a lower price than they are getting presently? If facilities are retired, how will this affect the Fair Allocation Plan and the constitutional issue (because future ratepayers would be asked to pay for benefits that they never receive).

6. We believe that rather than try to create and manage layers of contractual relationships between each Regulatory Asset Owner and all Electricity Distributors, it is necessary for IESO to be the sole statutory Servicer and for IESO to manage the relationships with the Electricity Distributors (as it does now).

7. We were under the impression that in order for the Regulatory Asset to come into existence it had to begin with IESO recording a deficit or a deferral. The Regulatory Asset comes into existence upon IESO recording that deferred amount. Without that recorded amount, it is difficult to see what IESO is assigning. We believe that the legislation must stipulate that IESO shall record the amount of any monthly deficiency and that this recording creates the Regulatory Asset. We also have been advised by the Dealer's counsel that there would be a concern if IESO had the ability to indefinitely cover Funding Obligations by continuously creating new Regulatory Assets, so the legislation should provide an end date beyond which IESO could no longer create new Regulatory Assets.

Article 1 – Purpose

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

"Absolute Assignee" means a person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided

interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of a Regulatory Asset.

"Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.

"Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Financing Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, a Regulatory Asset Owner under the Financing Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on a Regulatory Asset Owner or incurred by on behalf of a Regulatory Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Financing Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Servicer, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Financing Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Financing Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Servicer or a Regulatory Asset Owner, as the case may be.

"Alternative Servicer" means a person appointed under Section 4(8) to assume the obligations of the Servicer, as agent for and on behalf of a Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group. **[NTD: Who will be responsible for determining this attribution methodology? Currently, OEB has legislative authority for setting electricity rates so it would seem that this authority would have to be delegated elsewhere by the Province to avoid OEB regulatory oversight. If it is intended that the OEB would be reviewing and approving the Fair Allocation Plan in any way (which we understand has not been determined), OPG could accept this so long as the FAP is only subject to OEB review and approval before any regulatory assets are purchased and before any debt is issued by the financing entity. This would result in delays in financings so the IESO would need to fund the shortfall on an interim basis and obtain funding to do this. Once the Fair Allocation Plan is reviewed and approved (if this is the intention), there would need to be assurance that there would be no further OEB review. If there is opportunity for further review, it is essential that such review have no impact on prior issued debt and any further financings would be put on hold until such review is completed (during which time the IESO would again need to fund the shortfall on an interim basis and obtain necessary funding). Finally, please consider moving this entire concept to the Regulations.]**

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period.[2]

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [30th] day immediately preceding the first day of the Reference Period.] **[NTD: It would not be practical for OPG as Administrative Agent to have to figure out the number of ratepayers in the group every 6 months. If the Transition Charge is made to be volumetric and not flat fee per connection, this likely becomes unnecessary. On this point, we note that since benefits of the deferral will flow to consumers on a volumetric basis, if costs are to be imposed other than on a volumetric basis this may give rise to constitutional issues]**

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion

---

[1] A key question will be how the overall costs will be spread across the rate base **[NTD: Incorrect use of the term. "Rate base" refers to the capital invested in the utility that is used to determine return component of rates under cost of service rate setting. It is not related to customer demand or cost of power. Perhaps "customer base" is what was intended]**. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under a Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area. **[NTD: Don't know why definition refers specifically to residences as distributors serve other classes of customers too. Suggest defining with reference to the distributor licensed by the OEB in respect of a Service Area. Service Areas are identified in those licences]**

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Collection Agent) or by the Servicer **[NTD: For Ratepayers billed directly by IESO.]** in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of connectivity to a distribution network in the Electricity Distributor's designated Service Area. **[NTD: Not sure this should be limited to residences given the class of customers eligible under the deferral program. Also suggest just calling this electricity bills as they are generally not referred to as invoices]**

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" means a plan developed by the Ministry of Energy to allocate the costs and benefits of the Green Generation Initiative equitably across present and future Ratepayers.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a

debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Financing Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Financing Plan.

"Financing Plan" means the written plan [prepared by the Administrative Agent] in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including principal, interest and other financing charges on indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies and all taxes payable in connection with the foregoing) incurred by or on behalf of the Regulatory Asset Owner (other than IESO) in order to fund the purchase of a Regulatory Asset, including any Refinancing of another such payment obligation. **[NTD: Assumes IESO itself will not have Funding Obligations covered under the statute.]**

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA

Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment attributable to the Power Contracts in accordance with the Fair Allocation Plan. **[NTD: Need to confirm that when IESO has a shortfall in a given month between what it receives and what it owes under the GA, that the IESO has ability to isolate or calculate each of the three distinct bases for that variance, being (a) existing volume-based variances which are rolled into subsequent month GA and trued-up every 6 months under RPP, (b) existing variances attributable to OREC which are funded by province, and (c) new variances attributable to Fair Hydro program which will be funded by sales to Financing Entities. It may not be necessary or practical to segregate those in the hands of each distributor, unit sub-metering provider and retailer so long as IESO can segregate them once received based on information provided by those parties through IESO Portal or otherwise]**

"Generator" means a generator of electricity that is subject to this Act. **[NTD: Generator is a defined term in other legislation (OEB Act, Electricity Act) so this should be a distinct term such as "FH Generator" to avoid confusion]**

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts. [**NTD: If adjustments for Fair Hydro deferral program are to be applied after existing GA adjustments, then this needs a new name. Existing adjustments are GA and additional adjustments are a separate concept such as "FH Adjustment"]**

"Green Generation Initiative" means the Province's initiative to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, and energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs.

"IESO" means the Independent Electricity System Operator created pursuant to ■.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power

Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for [managing the Province's power system].

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge, right of set-off or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset.

"Pledgee" means a person to whom a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3]

"Province" means the Province of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in the Province] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected to the transmission and distribution system assets located in the Province and who are taking electric delivery service within the Province, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4] **[NTD: These should be referred to as "FH-Eligible Consumers" or similar and should align with the description of the eligible**

---

[3] Should this contemplate the possibility of additional or amended power contracts?

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

customer class provided by the Ministry, i.e. same as OREC-eligible consumers except for consumers served by Independent Power Authorities (who do not pay GA). Careful in use of the word "retail" as that seems to imply customers of retailers, which are part of but only a small part of the FH-Eligible Consumers. Remove reference to transmission-connected customers because not all such customers would be FH-Eligible]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan. **[NTD: Not sure if any reason for selecting these dates, but would suggest aligning with RPP re-setting periods of May 1 and November 1 or, better yet, do not hardwire into the legislation but move to Regulations.]**

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of a Regulated Asset Owner by applying the net proceeds obtained by a Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1).

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; (b) for the Servicer, any bank account into which the Servicer deposits Transition Charge Collections, Electricity Distributor Remittances or Servicer Remittances, in each case which account shall be segregated from its other accounts and held in trust for the Regulatory Asset Owners.

"Regulatory Asset Owner" means, collectively, (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7). **[Note: As per introductory comments, consider if this should be limited to Financing Entities.]**

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, or to provide for the repayment (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Retailers" means ■. **[Note: include in Ratepayers]**

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act. **[NTD: This Act will not establish permitted service areas. Distributors are licensed by the OEB. Each license specifies the distributor's service area. Not clear why service area is a necessary concept for the legislative framework, particularly since it will be irrelevant when the role of the distributors is expanded to retailers and unit sub-metering providers who do not have service areas]**

"Servicer" means the entity appointed by a Regulatory Asset Owner as its agent to manage the billing, collection and remittance of Transition Charges, initially being IESO.

"Servicer Remittances" means, for a Settlement Date, all Transition Charge Collections and Electricity Distributor Remittances received by the Servicer prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by the Servicer to recover payment of amounts payable by Electricity Distributors to the Servicer in accordance with Article 5.

"Settlement Date" means the [last Business Day of any month].

"Transition Charge" means the non-bypassable portion of the charges billed under any Electricity Invoice issued to a Ratepayer, which amount may or may not be specifically identified in such Electricity Invoice, the collections of which are to be applied to recover Funding Obligations and includes all unpaid arrears of such charges from previous periods. **[NTD: If benefit of deferral is provided on a volumetric basis (i.e. the more you consume, the more you save), so too should the costs of the deferral be charged on a volumetric basis. Otherwise, it likely raises constitutional issues. As such, don't divide by consumer base but rather the charge should be set based on**

forecast volumes of demand as is the case with RPP. That produces a rate "adder" to be billed to consumers. To the extent amounts do not get recovered due to differences between forecast and actual, those would need to be identified and rolled into the amount needed for recovery in the next period]

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of a Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the related True-Up Period, minus (b) the Actual Finance Amount for such related True-Up Period, plus (c) the Collected Amount Adjustment.

"True-Up Period" means, in relation to a Reference Period, the period from and including the [30th] day immediately preceding the first day of the Reference Period, to but excluding the [30th] day immediately preceding the last day of the Reference Period.

"Undertaking of the Lieutenant Governor in Council" means the undertaking of the Lieutenant Governor in Council given under Section 10(2).

"Unit Sub-Metering Providers" means ■. **[Note: Include in Ratepayers.]**

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay all Transition Charges charged to it in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Collection Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice. **[NTD: If distributors and others are unable to reflect the charge as a distinct line item on bills in time for May 1 implementation, then the charge will not be "specified" and therefore no obligation to pay. Suggest removing requirement that it be specified. Also suggest saying the obligation on FH-Eligible Consumers is to pay "all" Transition Charges that are "charged" to them, rather than each charge attributed to it. Note that terms of payment as between consumers and distributors are set out in the distributor's conditions of service, which are implied terms of contract as between them. Not sure if similar applies for retailers and unit sub-metering providers. Electricity bills may not set out all terms of payment]**

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute indebtedness of the Ratepayer. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness

owing by the Ratepayer under the Electricity Invoice or otherwise. **[NTD: There is no contractual or other direct relationship between ratepayer and regulatory asset owner. Consumer has relationship only with distributor. Suggest that this program rely on the existing framework which obligates consumers to pay distributors and distributors to collect those amounts and remit to IESO together with information needed by IESO to perform settlement, rather than trying to create and overlay a separate set of similar obligations on ratepayers, distributors and the IESO through this legislation. For greater comfort, consideration could be given to establishing deemed conditions of licenses for distributors, retailers and unit sub-metering providers, which conditions would require them to collect and remit amounts in accordance with this legislation. There are precedent provisions under the OEB Act for deemed conditions of licences. An added benefit may be that this could be considered a further element of OEB "oversight" (from perspective of the accountants) as license conditions are enforceable provisions under the legislation]**

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated first to the payment in full of related Transition Charges before any amounts are allocated to other invoiced amounts.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations [incurred under the Financing Plan] (including any adjustments based on modifications to such Funding Obligations made in compliance with the Financing Plan or as a result of amendments to the Financing Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action **[NTD: Need to consider possibility of errors being made and allowing for corrections]**. [For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was properly incurred under the Financing Plan.] In no case shall a Funding Obligation incurred under the Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan. **[NTD: Move second last sentence to Regulations.]**

(6) **[NTD: Too vague to be meaningful. Catch through definition of Electricity Invoice.]**

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Collection Agent shall, as an agent of the Servicer, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in

respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Collection Agent to the Ratepayer in respect of such Reference Period **[NTD: Distributor should not have discretion to specify the charge. All they should be doing is applying the charge to the bill based on the rate adder that is determined by OEB, based on information from Financing Entities which it must accept, in concert with setting RPP price]**. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be due and owing.

[NTD: We suggest moving sub-sections (2), (3) and (4) to Regulations.]

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][5] or if applicable the [Alternative Collection Agent][6] shall calculate the Period Transition Charge applicable to the Reference Period.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Servicer of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area. **[NTD: Currently, the OEB and not the IESO has jurisdiction to set rates and charges for electricity. If this role is to be given to IESO, they would need to be given this power. It seems that this role fits better with the OEB, in which case we would suggest that OEB should determine the FH Charge based on information it receives from the Financing Entities, which information it must be required to accept, and that it should do so as part of the process it now applies to set RPP rates. OEB would essentially be taking the amounts from the Financing Entities and applying them to forecast demand levels for the FH-Eligible Consumer class that it will need to get from IESO in order to develop a rate adder that distributors, retailers and unit sub-metering providers will then be required to apply to consumer bills]**

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by the Servicer shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

---

[5] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today- ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[6] Should this be a designated government official, rather than an agent appointed by investors?

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose and bill the Transition Charges.

(7) **IESO Successors** – Any IESO Successor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Servicer** – If a Replacement Event occurs in respect of the Servicer, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Servicer to perform some or all of the obligations and duties required to be undertaken by the Servicer, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Servicer shall become obligated to perform such assumed obligations in replacement of the Servicer. Any Servicer that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Servicer and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Servicer to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, the Servicer, Alternative Servicer or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose or bill Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure. **[NTD: Consideration should be given to having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce]**

(10) **No Set-Off or Reduction** – No Servicer or Electricity Distributor may set off or reduce (by counterclaim, defence or otherwise) the amount payable by it pursuant to this Article 4.

(11) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Servicer or any Alternative Collection Agent to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Servicer, undertake to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in

Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall hold such amounts in trust for the Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of the Servicer.

(4) **Duty to Collect Electricity Distributor Remittances** – The Servicer shall, as an agent of the Regulatory Asset Owner, accept and collect Electricity Distributor Remittances from Electricity Distributors and Transition Charge Collections from Ratepayers that pay their Electricity Invoices directly to the Servicer. **[NTD: Consider building this obligation into a deemed condition of licence for the IESO.]**

(5) **Segregation of Electricity Distributor Remittances** – The Servicer shall [promptly] segregate Electricity Distributor Remittances and Transition Charge Collections from other payments received or held by it and deposit such Electricity Distributor Remittances and Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances and Transition Charge Collections having been made into its Regulatory Asset Account, the Servicer shall hold such amounts in trust for the Regulatory Asset Owner.

(6) **Servicer Remittances** – On each [Settlement Date], the Servicer shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **IESO Successors** – Any IESO Successor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and Transition Charge Collections and to remit Servicer Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province[7] **[NTD: This does not make sense because a person who acquires distribution system assets or is authorized to collect distribution rates must be a licensed electricity distributor and would therefore take on the obligations of a distributor]**, then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collection of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area **[NTD: Everything from "including" onward is unnecessary because ratepayers in a distributor's service are necessarily would include all consumers connected to the distribution system and taking distribution service in the area]**; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates **[NTD: This is governed by the Conditions of Service for distributors and under the Distribution System Code, but not sure what equivalents are for consumers served by retailers and unit sub-metering providers]**; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, the Servicer, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit Servicer Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure. **[NTD: Consideration should be given to having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce]**

[NTD: Redundant: Up to Servicer to deal with LDCs.]

[NTD: Redundant.]

(11) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or Servicer Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the

---

[7] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and Servicer Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] **[NTD: Suggest a broader remedy such as appointment of a receiver.]**

(12) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – Regulatory Assets

(1) **Composition** – A Regulatory Asset shall constitute an existing, present property right consisting of the following rights of the Regulatory Asset Owner:

a. the right to record the Regulatory Asset in its accounts;

b. the right to impose, invoice, collect and received Transition Charges, Electricity Distributor Remittances and Servicer Remittances in an amount necessary to recover all of its Funding Obligations as the same become due and payable;

c. the right to receive all present and future payment obligations of Ratepayers, Electricity Distributors and the Servicer arising pursuant to Article 4 and Article 5;

d. the right to obtain periodic adjustments to the Transition Charges in accordance with Article ■ [true-up procedure] as necessary to recover the Funding Obligations as the same become due and payable;

e. the right to all amounts held in each Regulatory Asset Account;

f. all revenue, collections, claims, payments, money and proceeds of or derived from the rights described in (a) through (e), regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds; and

g. all Related Rights.

A Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset Owner **[NTD: No reason why Financing Plan should restrict assignability of Regulatory Asset → At worst may affect enforceability of related Funding Obligations, if any.]** shall be permitted and when made shall be valid and enforceable

in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition, provided that the parties to the governing documentation have expressly stated that such Disposition is a sale or other absolute transfer. Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof.

(3) **Deemed Perfection and Priority of Dispositions** – Any Disposition of an interest in a Regulatory Asset shall be vested, valid, binding and perfected from the time when such Disposition is made. Such Disposition shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall be free and clear of any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge. No consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner shall be deemed to have been and shall be perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act. A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in Transition Charge Collections or other related proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. [A Pledgee shall cause a financing statement to

be filed in respect of a Pledge describing the Regulatory Asset as "intangible" property for informational purposes only under the [PPSA].

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7 **[NTD: Not clear what type of authority this refers to. LGIC makes orders. Minister can be given power to issue directives. Legislation can require Minister to issue plans, such as the LTEP. Minister can require others to prepare plans. Need to clarify how this is being done. It would also be unusual for the FAP to be issued by the Minister but then made subject to review and approval by the OEB (as some have considered). Not aware of any other examples where OEB had power to review something coming from the Minister]**. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to such principles as may be prescribed. **[NTD: Move to Regulations.]**

1. [Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below,

the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][8].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.] **[NTD: Need to understand what this is contemplating – could it result in crediting back to customers certain amounts after they have already been paid because FAP realizes they should have deferred more to the future? This sounds unworkable and would create significant uncertainty if the effects of a FAP could be undone by a subsequent FAP]**

(3) **Attribution Methodology** – The Fair Allocation Plan may specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. **[NTD: Who develops the methodology? How can it be objective if it requires Minister to have regard to certain principles and parameters? Is such methodology needed if charge is made to be volumetric?]**

(4) **[Confirmation][Review] of the Fair Allocation Plan** – [OEB?]

Article 8 – The Financing Plan

[NTD: Consider how much of this Article can be moved to Regulations.]

(1) **Power to Prepare and Implement the Financing Plan** – In compliance with a [written order][***MOE to confirm process.***] of the Minister of Energy, the Administrative Agent shall prepare and propose the adoption of a Financing Plan. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Financing Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Financing Plan. **[NTD: Why not just say that AA shall prepare . . .]**

(2) **Required Terms and Conditions of the Financing Plan** – The Financing Plan shall establish the basis for funding decisions that have the effect of allocating the

---

[8] Consider if a quantitative limit needs to be included in the legislation.

Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Financing Plan shall be consistent with the principles, parameters, requirements and conditions as may be prescribed]. **[NTD: Not clear what sort of order power is envisioned or why this cannot be baked into the regs without need for Minister to ask for it]**

(3) **Power to Review and Approve the Financing Plan** – The Minister of Energy may, by written order, designate one or more persons to review the Financing Plan and to review and assess the consistency of the Funding Obligations incurred with such Financing Plan, and the Minister of Energy may specify requirements in respect of such review in such written order. The Administrative Agent, or such other person(s) as may be designated by written order of the Minister of Energy made pursuant to Section 8(1), shall make any such amendments to the Financing Plan, and submit a revised Financing Plan to the **[OEB]** for approval within [the time period specified in such written order]/[[•] days of such written order].[***Consider periodic amendments to the Financing Plan following an annual review; provided that amendments cannot affect the existing Funding Obligations. Consider the level of oversight the MoE/OEB will have over this process?***] **[NTD: This sounds like a very cumbersome two-step review and approval process. First Minister can get someone to review and assess the plan and then OEB must approve it? What is the point of having two processes? What value would OEB be expected to add, given the nature of the Financing Plan and OEB expertise? What is the contemplated outcome of the first part of this review by the Minister or designate?]**

(4) **Approval of Financing Plan** – The **[OEB]** shall have the power to and shall approve or disapprove of the Financing Plan based solely on whether the Financing Plan is consistent with (i) the principles, parameters, requirements and conditions set forth in Schedule 3, (ii) such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation] [and (iii) the Fair Allocation Plan]. If the **[OEB]** approves the Financing Plan, then such Financing Plan shall be implemented by the Administrative Agent. If the OEB disapproves of the Financing Plan or otherwise fails to approve the Financing Plan, then the Administrative Agent shall re-submit the Financing Plan with such amendments as the Administrative Agent shall consider necessary for the Financing Plan to be approved by the OEB. **[NTD: If the OEB is required to review and approve the Financing Plan in any, OPG could accept this only if the Financing Plan is subject to OEB review and approval before any regulatory assets are purchased and before any debt is issued by the financing entity. This would result in delays in financings so the IESO would need to fund the shortfall on an interim basis and obtain funding to do this. Once the Financing Plan is reviewed and approved (if this is the intention), there would need to be assurance that there would be no further OEB review. If there is opportunity for further review, it is essential that such review have no impact on prior issued debt and any further financings would be put on hold until such review is completed (during which time the IESO would again need to fund the shortfall on an interim basis and obtain necessary funding)**

(5) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in

the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Financing Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Financing Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(6) **Establishment of Special Purpose Entities** – If the implementation of the Financing Plan contemplates the establishment of one or more special purpose finance entities to incur Funding Obligations under the Financing Plan, as an Absolute Assignee and on a basis that limits the recourse for the payment of such Funding Obligations to such Absolute Assignee's interest in, to and under the Regulatory Asset, the Administrative Agent shall have regard to the characteristics as may be prescribed.] **[NTD: Consider introducing concept of a Financing Entity defined as per our introductory notes.]**

(7) **Obligation to Apply Servicer Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[9]

(8) **Non-Recourse** – The Financing Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Servicer, and Alternative Collection Agent, the Administrative Agent, the OEB, the Province or the Lieutenant Governor in Council, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part or expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(9) **Incurrences are Binding** – Despite any failure to adhere to the Financing Plan or to comply with any requirement of this Part or Part VIII, including the Fair Allocation Plan, all amounts payable or becoming due and payable by or on behalf of the Regulatory

---

[9] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Act, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure and any associated Transition Charges will be deemed to be in accordance with the Fair Allocation Plan and the Financing Plan.

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation. **[NTD: Does this include Financing Entities? If so, the outcome of such investigation cannot adversely impact on FE's ability to recover regulatory asset amounts. See existing audit rights of OEB to avoid duplication]**

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Lieutenant Governor in Council, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part. **[NTD: The outcome of such investigation cannot adversely impact on FE's ability to recover regulatory asset amounts.]**

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of the actual incremental costs incurred by such person of providing administrative or servicing services.] **[NTD: OPG believes that it is important for the legislation to provide (likely in the part of the Bill dealing with OPG specific amendments) that the risks and cost consequences to OPG of being an Administrative Agent or of consolidating a Financing Entity for accounting purposes shall <u>not</u> be considered by the OEB in setting the regulated payment amounts for OPG.]**

Article 10 – Undertaking of the Lieutenant Governor in Council

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Lieutenant Governor in Council may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly, including through the introduction of any bill or the passing of any legislation or regulation. The Lieutenant Governor in Council undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or

termination as a result of any action taken or failure by the Lieutenant Governor in Council, including through the introduction of any bill or the passing of any legislation or regulation. **[NTD: Consider whether LGIC is the proper reference.]**

(2) **Undertaking and Agreement** – The Lieutenant Governor in Council undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Lieutenant Governor in Council will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, including through the introduction of any bill or the passing of any legislation or regulation.

The Lieutenant Governor in Council undertakes and agrees with the Regulatory Asset Owners that if IESO becomes insolvent or otherwise incapable of performing its obligations under this Part, an IESO Successor will be established capable of performing such obligations in order that the Regulatory Asset Owners may appoint the IESO Successor as an Alternative Servicer. The Lieutenant Governor in Council undertakes and agrees with the Regulatory Asset Owners to fully compensate the Regulatory Asset Owners for any failure by the Lieutenant Governor in Council to comply with its undertakings and agreements in this Article 10(2) for any loss suffered by the Regulatory Asset Owner as a result of such failure.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Lieutenant Governor in Council, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Financing Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Financing Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Financing Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Financing Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Financing Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be

severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

[NTD: OPG specific amendments to be included in the Bill.]

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Financing Plan

The Financing Plan shall have regard to the following principles, parameters, requirements and conditions:[***Consider others.***]

(1) the Financing Plan shall, in respect of each Reference Period, describe the allocations of Unrecovered Transition Costs to each Reference Group as contemplated by the Fair Allocation Plan;

(2) the Administrative Agent shall make a good faith estimate of the Funding Shortfalls for each Reference Period, based on the terms of the Power Contracts and assumptions considered to be reasonable respecting forward market prices for electricity;

(3) the Administrative Agent shall describe alternative funding arrangements considered to be suitable for the purpose of funding the estimated Funding Shortfalls, including by reference to short term and/or long term Funding Obligations that could reasonably be incurred by Regulatory Asset Owner for such purpose;

(4) such Funding Obligations shall reflect quantities, maturities, payment obligations, prepayment or redemption rights and such other features so that the effect of incurring such Funding Obligations would be that the payments made thereunder in respect of each Reference Period (including the anticipated Finance Amounts becoming payable in relation to such Funding Obligations) would reasonably correspond to the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

(5) the Financing Plan shall reflect the outcome of a financial model that incorporates the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges attributed to a hypothetical Ratepayer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation having regard to the application of the Allocation Methodology); [***Consider what outputs from OPG will be tested by the OEB and when. The modelling in the Financing Plan may permit the OEB to check progress against the model from time to time, which may provide a basis for the MoE/OEB to require a review/amendment to the Financing Plan if the ongoing operation of the program results in significant deviation from the model. Consider whether this flexibility is desirable.***]

(6) the Administrative Agent, for and on behalf of each Regulatory Asset Owner, shall seek to incur Funding Obligations from time to time on the best terms available at such time for a financing transaction of the size and type contemplated, and having regarding to the following parameters:

a. whether the Regulatory Asset Owner[s] will require committed access to short term liquidity to cover estimated Funding Shortfalls prior to incurring fixed term Funding Obligations, and the amount and repayment terms of any such required liquidity; provided that any Repayment required to be made under the terms of

such short-term liquidity would not obligate a Regulatory Asset Owner to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

b. the basis upon which the Administrative Agent will select the term to maturity of any other Funding Obligations; provided that any Repayments required to be made under the terms of such Funding Obligations shall not obligate a Regulatory Asset Owner to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

c. the basis upon which the interest rates applicable to such Funding Obligations would be determined;

d. the reference capital or finance market in which such Funding Obligation would be incurred, including markets outside of Canada if considered by the Administrative Agent to be appropriate in the circumstances;

e. the currency of payments under such Funding Obligations and, if the Funding Obligations are denominated in a currency other than Canadian dollars, the basis upon which the Administrative Agent shall cause the [applicable] Regulatory Asset Owner to enter into hedging transactions to mitigate currency risk, including acceptable minimum and maximum coverage levels, having regard to the availability of related derivatives having notional amounts corresponding to the repayment and maturity profile of such Funding Obligations;

f. the basis upon which the Administrative Agent will select counterparties under any transaction to be entered into by a Regulatory Asset Owner, including any paying agent, servicer, cash manager, liquidity provider, hedge counterparty, account bank, lender, note trustee, security trustee, paying agent, registrar/transfer agent, financial services agent, arranger or manager;

g. the basis upon which the Administrative Agent will manage counterparty risk, including by providing for maximum counterparty exposure limits having regard to concentration, credit and other identified risks with respect to individual counterparties or countries;

h. the basis upon which the Administrative Agent will negotiate and settle Finance Amounts, including the amount of any Redemption Amounts, Finance Reserve Deposits and Additional Funding Charges;

(7) the basis upon which Funding Obligations may be redeemed, prepaid, repurchased or otherwise affected, having regard for the need to minimize debt service charges and other Funding Costs, and the need to maintain a stable funding platform to finance the Funding Shortfall from time to time on a basis that is consistent with the allocations of

Unrecovered Transition Costs to applicable Reference Groups under the Fair Allocation Plan;

(8) the basis upon which any Repayments, Funding Costs and Redemption Amounts will be paid, including any defeasance, sinking fund or through other reserves or liquidity facilities;

(9) the basis upon which fees, charges, expenses, costs, indemnities, reimbursements and other amounts payable to or for the benefit of the Administrative Agent and other agents and service providers to the Regulatory Asset Owner[s] may be determined, allocated and paid;

(10) the timing and basis upon which Finance Reserve Deposits and Finance Reserve Withdrawals may be made;

(11) the basis upon which any obligations for any other Additional Funding Charges may be incurred and paid;

(12) the basis upon which the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied, including in relation to any counterparty enforcement and realization scenario;

(13) the transmittal to [the IESO] of information related to the amounts to be included in the determination of the Period Transition Charge for a Reference Period;

(14) the basis upon which any Disposition may be made or effected by a Regulatory Asset Owner, including parameters for determining the purchase price for the interest in the Regulatory Asset that is the subject matter of such Disposition, and any consents and releases that may be usefully obtained in connection with such Disposition;

(15) a description of each special purchase entity that will purchase the Regulatory Asset from the IESO, including proposed capitalization, governance, and restrictions on their powers and activities having regard to the parameters in Schedule 4; and

(16) the basis on which any Pledge may be given or effected.

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

Schedule 4

Creation of any Special Purpose Entity to become a Regulatory Asset Owner]

(1) Powers and Abilities:

a. No part of the revenue or assets of a Regulatory Asset Owner shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. Each Regulatory Asset Owner shall be authorized to:

i. incur the Funding Obligations contemplated by a Financing Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Financing Plan and for administrative services; and

iii. pledge the Regulatory Asset to secure the Funding Obligations incurred by the Regulatory Asset Owner;

c. So long as any Funding Obligations contemplated under a Financing Plan are outstanding, the Regulatory Asset Owner shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity;

d. the Regulatory Asset Owner shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Financing Plan;

e. the Regulatory Asset Owner shall cause the proceeds obtained by incurring any Funding Obligation to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Financing Plan; and

f. so long as the Regulatory Asset is pledged to secure Funding Obligations, the Regulatory Asset Owner must apply revenues from the collection of Transition Charges only to repay such Funding Obligations and other costs as provided for in a Financing Plan.

(2) Governance of Regulatory Asset Owner – The Regulatory Asset Owner shall shall be created having regard to the following principles:[***OPG to confirm if SPE will be a trust or another type of entity.***]

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

h. **[Delegation of powers and duties to administrative agents]**

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be

required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

"Absolute Assignee" means a person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset.

"Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.

"Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Treasury Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, the Regulatory Asset Owner under the Treasury Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Regulatory Asset Owner or incurred by on behalf of the

Regulatory Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Treasury Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Invoicing Agent, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Treasury Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Treasury Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owner.

"Alternative Invoicing Agent" means a person appointed under Section 4(8) to assume the invoicing and other activities of any Electricity Distributor under Article 4, as agent for and on behalf of the Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group.

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period.[2]

---

[1] A key question will be how the overall costs will be spread across the rate base. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [30th] day immediately preceding the first day of the Reference Period.]

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Invoicing Agent) in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of a residence located in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund,

collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Treasury Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Treasury Plan.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies) incurred by or on behalf of the Regulatory Asset Owner under the Treasury Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment attributable to the Power Contracts in accordance with the Fair Allocation Plan.

"Generator" means a generator of electricity that is subject to this Act.

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods,

exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge, right of set-off or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom [or for whose benefit] a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3]

---

[3] Should this contemplate the possibility of additional or amended power contracts?

"Province" means the Province of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in the Province] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected to the transmission and distribution system assets located in the Province and who are taking electric delivery service within the Province, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Regulated Asset Owner by applying the net proceeds obtained by the Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1).

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; (b) for IESO, any bank account into which IESO deposits or receives Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits or receives Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means, collectively, (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

---

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act.

"Settlement Date" means the [last Business Day of any month].

"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Transition Charge" means, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

---

[5] See footnote 1, above.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the related True-Up Period, minus (b) the Actual Finance Amount for such related True-Up Period, plus (c) the Collected Amount Adjustment.

"True-Up Period" means, in relation to a Reference Period, the period from and including the [30th] day immediately preceding the first day of the Reference Period, to but excluding the [30th] day immediately preceding the last day of the Reference Period.

"Undertaking of the Lieutenant Governor in Council" means the undertaking of the Lieutenant Governor in Council given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge attributed to it and specified as such in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Invoicing Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer and recorded in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute indebtedness of the Ratepayer to the Regulatory Asset Owner. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deemed to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred under the Treasury Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Treasury Plan or as a result of amendments to the Treasury Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without

any further action. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was properly incurred under the Treasury Plan. In no case shall a Funding Obligation incurred under the Treasury Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Invoicing Agent shall, as an agent of the Regulatory Asset Owner, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Invoicing Agent to the Ratepayer in respect of such Reference Period. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be deemed to have been imposed on and billed to the applicable Ratepayer.

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][6] or if applicable the [Alternative Collection Agent][7] shall calculate the Period Transition Charge applicable to the Reference Period.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Invoicing Agent of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by [IESO] and specified as such in an Electricity Invoice shall be determinative of the

---

[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today- ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[7] Should this be a designated government official, rather than an agent appointed by investors?

amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, bill and invoice the Transition Charges.

(7) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Invoicing Agent** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Invoicing Agent to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Invoicing Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Invoicing Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Invoicing Agent to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Invoicing Agent or any [Alternative Collection Agent] to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge

Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to accept and collect Electricity Distributor Remittances.

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(6) **IESO Remittances** – On each [Settlement Date], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province[8], then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collect of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on

[8] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to and over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owner.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.]

(13) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with

respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]

(14) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute a property right and interest of the Regulatory Asset Owner in the following:

a. the present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

b. the present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and invoice the Transition Charges in accordance with Article 4;

c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

e. all Transition Charge Collections;

f. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

g. all Related Rights; and

h. all proceeds of or derived from the foregoing.

The Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected

and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset Owner made under the Treasury Plan shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition [, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.] Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of Transition Charge Collections or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.

(3) **Deemed Perfection and Priority of Dispositions** – At the time a Disposition is made, the absolute assignment of the property rights and interest in the Regulatory Asset subject to the Disposition shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall have priority over any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the

terms of the Pledge[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in respect of a Funding Obligation incurred under the Treasury Plan shall be deemed to have been and shall be perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act. A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in Transition Charge Collections or other related proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge for informational purposes only under the [PPSA].

(6) Enforcement of Property Rights – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) Collective Action Required – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.

Article 7 – Establishment of the Fair Allocation Plan

(1) Adoption of the Fair Allocation Plan – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) Principles and Parameters – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the

Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[9]:

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][10].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.

---

[9] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

[10] Consider if a quantitative limit needs to be included in the legislation.

(3) **Attribution Methodology** – The Fair Allocation Plan shall specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. [may have regard to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*

(4) **[Confirmation][Review] of the Fair Allocation Plan** – [OEB?]

Article 8 – The Treasury Plan

(1) **Power to Prepare and Implement the Treasury Plan** – In compliance with a [written order][***MOE to confirm process.***] of the Minister of Energy, the Administrative Agent shall prepare and propose the adoption of a Treasury Plan. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Treasury Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Treasury Plan.

(2) **Required Terms and Conditions of the Treasury Plan** – The Treasury Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Treasury Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule 3 and such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation].

(3) **Power to Review and Approve the Treasury Plan** – The Minister of Energy may, by written order, designate one or more persons to review the Treasury Plan and to review and assess the consistency of the Funding Obligations incurred with such Treasury Plan, and the Minister of Energy may specify requirements in respect of such review in such written order. The Administrative Agent, or such other person(s) as may be designated by written order of the Minister of Energy made pursuant to Section 8(1), shall make any such amendments to the Treasury Plan, and submit a revised Treasury Plan to the **[OEB]** for approval within [the time period specified in such written order]/[[•] days of such written order].[***Consider periodic amendments to the Treasury Plan following an annual review; provided that amendments cannot affect the existing Funding Obligations. Consider the level of oversight the MoE/OEB will have over this process?***]

(4) **Approval of Treasury Plan –** The **[OEB]** shall have the power to and shall approve or disapprove of the Treasury Plan based solely on whether the Treasury Plan is consistent with (i) the principles, parameters, requirements and conditions set forth in Schedule 3, (ii) such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation] [and (iii) the Fair Allocation Plan]. If the **[OEB]** approves the Treasury Plan, then such Treasury Plan shall be implemented by the Administrative Agent. If the OEB disapproves of the Treasury Plan or otherwise fails to approve the Treasury Plan, then the Administrative Agent shall re-

submit the Treasury Plan with such amendments as the Administrative Agent shall consider necessary for the Treasury Plan to be approved by the OEB.

(5) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Treasury Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Treasury Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(6) **Establishment of Special Purpose Entities** – If the implementation of the Treasury Plan contemplates the establishment of one or more special purpose finance entities to incur Funding Obligations under the Treasury Plan, as an Absolute Assignee and on a basis that limits the recourse for the payment of such Funding Obligations to such Absolute Assignee's interest in, to and under the Regulatory Asset, the Administrative Agent shall have regard to the characteristics specified in Schedule 4 in establishing such special purpose entity.]

(7) **Obligation to Apply IESO Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[11]

(8) **Non-Recourse** – The Treasury Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Invoicing Agent, and Alternative Collection Agent, the Administrative Agent, the OEB, the Province or the Lieutenant Governor in Council, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part or expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing

[11] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(9) **Incurrences are Binding** – Despite any failure to adhere to the Treasury Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Lieutenant Governor in Council, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part.

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of the actual incremental costs incurred by such person of providing administrative or servicing services.]

Article 10 – Undertaking of the Lieutenant Governor in Council

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The Lieutenant Governor in Council may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly. The Lieutenant Governor in Council undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Lieutenant Governor in Council.

(2) **Undertaking and Agreement** – The Lieutenant Governor in Council undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Lieutenant Governor in Council will not in any way take or permit any action that limits, alters or impairs the value of the

Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Lieutenant Governor in Council, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Treasury Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Treasury Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Treasury Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Treasury Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Treasury Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Treasury Plan

The Treasury Plan shall have regard to the following principles, parameters, requirements and conditions:[***Consider others.***]

(1) the Treasury Plan shall, in respect of each Reference Period, describe the allocations of Unrecovered Transition Costs to each Reference Group as contemplated by the Fair Allocation Plan;

(2) the Administrative Agent shall make a good faith estimate of the Funding Shortfalls for each Reference Period, based on the terms of the Power Contracts and assumptions considered to be reasonable respecting forward market prices for electricity;

(3) the Administrative Agent shall describe alternative funding arrangements considered to be suitable for the purpose of funding the estimated Funding Shortfalls, including by reference to short term and/or long term Funding Obligations that could reasonably be incurred by Regulatory Asset Owner for such purpose;

(4) such Funding Obligations shall reflect quantities, maturities, payment obligations, prepayment or redemption rights and such other features so that the effect of incurring such Funding Obligations would be that the payments made thereunder in respect of each Reference Period (including the anticipated Finance Amounts becoming payable in relation to such Funding Obligations) would reasonably correspond to the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

(5) the Treasury Plan shall reflect the outcome of a financial model that incorporates the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges attributed to a hypothetical Ratepayer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation having regard to the application of the Allocation Methodology); [***Consider what outputs from OPG will be tested by the OEB and when. The modelling in the Treasury Plan may permit the OEB to check progress against the model from time to time, which may provide a basis for the MoE/OEB to require a review/amendment to the Treasury Plan if the ongoing operation of the program results in significant deviation from the model. Consider whether this flexibility is desirable.***]

(6) the Administrative Agent, for and on behalf of each Regulatory Asset Owner, shall seek to incur Funding Obligations from time to time on the best terms available at such time for a financing transaction of the size and type contemplated, and having regarding to the following parameters:

a. whether the Regulatory Asset Owner[s] will require committed access to short term liquidity to cover estimated Funding Shortfalls prior to incurring fixed term Funding Obligations, and the amount and repayment terms of any such required liquidity; provided that any Repayment required to be made under the terms of such short-term liquidity would not obligate a Regulatory Asset Owner to repay an amount in relation to a Reference Period that would have the effect of the

Treasury Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

b. the basis upon which the Administrative Agent will select the term to maturity of any other Funding Obligations; provided that any Repayments required to be made under the terms of such Funding Obligations shall not obligate a Regulatory Asset Owner to repay an amount in relation to a Reference Period that would have the effect of the Treasury Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

c. the basis upon which the interest rates applicable to such Funding Obligations would be determined;

d. the reference capital or finance market in which such Funding Obligation would be incurred, including markets outside of Canada if considered by the Administrative Agent to be appropriate in the circumstances;

e. the currency of payments under such Funding Obligations and, if the Funding Obligations are denominated in a currency other than Canadian dollars, the basis upon which the Administrative Agent shall cause the [applicable] Regulatory Asset Owner to enter into hedging transactions to mitigate currency risk, including acceptable minimum and maximum coverage levels, having regard to the availability of related derivatives having notional amounts corresponding to the repayment and maturity profile of such Funding Obligations;

f. the basis upon which the Administrative Agent will select counterparties under any transaction to be entered into by a Regulatory Asset Owner, including any paying agent, servicer, cash manager, liquidity provider, hedge counterparty, account bank, lender, note trustee, security trustee, paying agent, registrar/transfer agent, financial services agent, arranger or manager;

g. the basis upon which the Administrative Agent will manage counterparty risk, including by providing for maximum counterparty exposure limits having regard to concentration, credit and other identified risks with respect to individual counterparties or countries;

h. the basis upon which the Administrative Agent will negotiate and settle Finance Amounts, including the amount of any Redemption Amounts, Finance Reserve Deposits and Additional Funding Charges;

(7) the basis upon which Funding Obligations may be redeemed, prepaid, repurchased or otherwise affected, having regard for the need to minimize debt service charges and other Funding Costs, and the need to maintain a stable funding platform to finance the Funding Shortfall from time to time on a basis that is consistent with the allocations of Unrecovered Transition Costs to applicable Reference Groups under the Fair Allocation Plan;

(8) the basis upon which any Repayments, Funding Costs and Redemption Amounts will be paid, including any defeasance, sinking fund or through other reserves or liquidity facilities;

(9) the basis upon which fees, charges, expenses, costs, indemnities, reimbursements and other amounts payable to or for the benefit of the Administrative Agent and other agents and service providers to the Regulatory Asset Owner[s] may be determined, allocated and paid;

(10) the timing and basis upon which Finance Reserve Deposits and Finance Reserve Withdrawals may be made;

(11) the basis upon which any obligations for any other Additional Funding Charges may be incurred and paid;

(12) the basis upon which the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied, including in relation to any counterparty enforcement and realization scenario;

(13) the transmittal to [the IESO] of information related to the amounts to be included in the determination of the Period Transition Charge for a Reference Period;

(14) the basis upon which any Disposition may be made or effected by a Regulatory Asset Owner, including parameters for determining the purchase price for the interest in the Regulatory Asset that is the subject matter of such Disposition, and any consents and releases that may be usefully obtained in connection with such Disposition;

(15) a description of each special purchase entity that will purchase the Regulatory Asset from the IESO, including proposed capitalization, governance, and restrictions on their powers and activities having regard to the parameters in Schedule 4; and

(16) the basis on which any Pledge may be given or effected.

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

Schedule 4

Creation of any Special Purpose Entity to become a Regulatory Asset Owner]

(1) Powers and Abilities:

a. No part of the revenue or assets of a Regulatory Asset Owner shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. Each Regulatory Asset Owner shall be authorized to:

i. incur the Funding Obligations contemplated by a Treasury Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Treasury Plan and for administrative services; and

iii. pledge the Regulatory Asset to secure the Funding Obligations incurred by the Regulatory Asset Owner;

c. So long as any Funding Obligations contemplated under a Treasury Plan are outstanding, the Regulatory Asset Owner shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity;

d. the Regulatory Asset Owner shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Treasury Plan;

e. the Regulatory Asset Owner shall cause the proceeds obtained by incurring any Funding Obligation to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Treasury Plan; and

f. so long as the Regulatory Asset is pledged to secure Funding Obligations, the Regulatory Asset Owner must apply revenues from the collection of Transition Charges only to repay such Funding Obligations and other costs as provided for in a Treasury Plan.

(2) Governance of Regulatory Asset Owner – The Regulatory Asset Owner shall shall be created having regard to the following principles:[***OPG to confirm if SPE will be a trust or another type of entity.***]

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

h. **[Delegation of powers and duties to administrative agents]**

BLACKLINE VERSION. (TREASURY PLAN edits from Matt)

"Fair Hydro" – Part V.2

Article 1 – Purpose

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and future quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the long-term construction and development of facilities for the purpose of generating electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ratepayers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall. In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be

required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable. Such financial obligations will constitute property rights and interests, which will take the form of the Regulatory Asset contemplated in this Part. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Treasury Plan contemplated in this Part. The Treasury Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative attributed to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by attributing the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

"Absolute Assignee" means a person to whom a Regulatory Asset Owner assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset.

"Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.

"Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by the Regulated Asset Owner during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Treasury Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, the Regulatory Asset Owner under the Treasury Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Regulatory Asset Owner or incurred by on behalf of the

Regulatory Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Treasury Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Invoicing Agent, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any placement fees, underwriting fees, fees and related issuing expenses; (m) any rating agency fees; and (n) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Treasury Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Treasury Plan in compliance with the requirements set out in Schedule 2.

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owner.

"Alternative Invoicing Agent" means a person appointed under Section 4(8) to assume the invoicing and other activities of any Electricity Distributor under Article 4, as agent for and on behalf of the Regulatory Asset Owner.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group.

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the ~~Reference~~True-Up Period, minus (b) the sum of all Transition Charge Collections for the ~~Reference~~True-Up Period.[2]

["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [~~third] Business Day~~30th] day immediately preceding the first day of the Reference Period.]

[1] A key question will be how the overall costs will be spread across the rate base. For simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified.

[2] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor of electricity to residences located in such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Invoicing Agent) in respect of electricity charges and related services and amounts incurred, assessed or attributed in respect of a residence located in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owner under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Treasury Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Treasury Plan.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies) incurred by or on behalf of the Regulatory Asset Owner under the Treasury Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment attributable to the Power Contracts in accordance with the Fair Allocation Plan.

"Generator" means a generator of electricity that is subject to this Act.

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owner in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge, right of set-off or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom [or for whose benefit] a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[3]

"Province" means ~~Her Majesty~~ the ~~Queen in right~~Province of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in ~~Ontario~~the Province] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected to the transmission and distribution system assets located in ~~Ontario~~the Province and who are taking electric delivery service within

[3] Should this contemplate the possibility of additional or amended power contracts?

~~Ontario~~the Province, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or IESO.[4]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [July 1st and January 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Regulated Asset Owner by applying the net proceeds obtained by the Regulated Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1).

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the ~~an~~ Electricity Distributor deposits or receives Transition Charge Collections; (b) for IESO, any bank account into which IESO deposits or receives Electricity Distributor Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits or receives Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means, collectively, (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, which together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) of the Regulatory Asset Owner that attach or are attendant or incidental to any of the other property rights or interests that comprise the Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such

[4] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk.

day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is [permitted] to distribute electricity to residences in accordance with this Act.

"Settlement Date" means the [last Business Day of any month].

"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Transition Charge" means, in respect of a Reference Period, [one-sixth] of the Period Transition Charge, [divided by the Consumer Base[5]].

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the ~~Reference~~related True-Up Period, minus (b) the Actual Finance Amount for ~~the Reference~~such related True-Up Period, plus (c) the Collected Amount Adjustment.

"True-Up Period" means, in relation to a Reference Period, the period from and including the [30th] day immediately preceding the first day of the Reference Period, to but excluding the [30th] day immediately preceding the last day of the Reference Period.

[5] See footnote 1, above.

"Undertaking of the ~~Province~~Lieutenant Governor in Council" means the undertaking of the ~~Province~~Lieutenant Governor in Council given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge attributed to it and specified as such in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Invoicing Agent under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge attributed to a Ratepayer and recorded in an Electricity Invoice shall~~,~~, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge,~~]~~ constitute indebtedness of the Ratepayer to the Regulatory Asset Owner. Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, the Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be ~~deeded~~deemed to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred ~~in compliance with~~under the Treasury Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Treasury Plan or as a result of amendments to the Treasury Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was properly incurred ~~in accordance with~~under the Treasury Plan. In no case shall a Funding Obligation incurred under the Treasury Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges attributed to a Ratepayer in respect of any Finance Amount incurred under with the Treasury Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Invoicing Agent shall, as an agent of the Regulatory Asset Owner, specify the Transition Charge to be attributed to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Invoicing Agent to the Ratepayer in respect of such Reference Period. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be deemed to have been imposed on and billed to the applicable Ratepayer.

(2) **Calculation of the Period Transition Charge** – Not later than one month prior to the first day of a Reference Period, [IESO][6] or if applicable the [Alternative Collection Agent][7] shall calculate the Period Transition Charge applicable to the Reference Period.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall apply the Attribution Methodology to determine the Transition Charges to be attributed to the Ratepayers of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, [IESO] or if applicable the [Alternative Collection Agent] shall inform each Electricity Distributor and if applicable any Alternative Invoicing Agent of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge attributed to a Ratepayer by [IESO] and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, bill and invoice the Transition Charges.

(7) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4

[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today- ie., it would be a separate line item). This section will also need to catch "bypass" customers.

[7] Should this be a designated government official, rather than an agent appointed by investors?

in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Invoicing Agent** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Invoicing Agent to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Invoicing Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Invoicing Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Invoicing Agent to perform such obligations and duties on behalf of the Regulatory Asset Owner.

(9) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Invoicing Agent or any [Alternative Collection Agent] to ensure that Transition Charges are properly attributed to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges attributed to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall [promptly] segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owner, undertake [diligent efforts] to accept and collect Electricity Distributor Remittances.

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall be deemed to hold such amounts in trust for the Regulatory Asset Owner.

(6) **IESO Remittances** – On each [Settlement Date], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in ~~Ontario~~the Province or invoices or collects electricity distribution rates in ~~Ontario~~the Province[8], then such person shall, if requested by the Regulatory Asset Owner, be obligated to act diligently to (a) facilitate the invoicing and collect of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owner or Pledgee for the benefit of the Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable.

(10) **Regulatory Asset Owner has Standing** – The Regulatory Asset Owner and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Invoicing Agent, any owner of electricity distribution system assets in ~~Ontario~~the Province or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by a Regulatory Asset Owner in relation to any such failure.

[8] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owner shall be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to ~~an~~and over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owner.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of the Regulatory Asset Owner, any Absolute Assignee and any Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense~~0~~ by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province [or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.]

(13) **[Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in ~~Ontario~~the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]

(14) Regulations – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) Composition – The Regulatory Asset shall constitute a property right and interest of the Regulatory Asset Owner in the following:

a. the present and future obligations and indebtedness of each Ratepayer to pay Transition Charges attributed to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

b. the present and future obligations of each Electricity Distributor and if applicable the Alternative Invoicing Agent to impose, attribute, bill and invoice the Transition Charges in accordance with Article 4;

c. the present and future obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

d. the present and future obligations of IESO and if applicable the Alternative Collection Agent to accept Electricity Distributor Remittances and to remit IESO Remittances to or to the account of the Regulatory Asset Owner, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

e. all Transition Charge Collections;

f. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

g. all Related Rights; and

h. all proceeds of or derived from the foregoing.

The Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, attributed, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset Owner made under the Treasury Plan shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition [, provided that the description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.] Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of

the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of ~~revenues~~Transition Charge Collections or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.

(3) **Deemed Perfection and Priority of Dispositions** – At the time a Disposition is made, the absolute assignment of the property rights and interest in the Regulatory Asset subject to the Disposition shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall have priority over any liens in favour of such other persons.

(4) Validity of Pledges – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]. Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Deemed Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in ~~accordance with~~respect of a Funding Obligation incurred under the Treasury Plan shall be deemed to have been and shall be perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and such proceeds shall be perfected, without any physical delivery

thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act. A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in ~~revenues~~Transition Charge Collections or other related proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such ~~revenues or~~Transition Charge Collections or such other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.

Article 7 – Establishment of the Fair Allocation Plan

(1) **Adoption of the Fair Allocation Plan** – The Minister of Energy may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy [in compliance with Section •].

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[9]:

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and

[9] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal basis for the program. These examples are not meant to suggest the appropriate balance – just illu strative to advance a discussion among the stakeholders.

allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][10].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs.

(3) Attribution Methodology – The Fair Allocation Plan shall specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. [may have regard to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*

(4) [Confirmation][Review] of the Fair Allocation Plan – [OEB?]

Article 8 – The Treasury Plan

(1) Power to Prepare and Implement the Treasury Plan – ~~The~~In compliance with a [written order][***MOE to confirm process.***] of the Minister of Energy, the Administrative Agent shall prepare and propose the adoption of a Treasury Plan ~~that is consistent with the principles, parameters, requirements and conditions set forth in Schedule 3,~~

[10] Consider if a quantitative limit needs to be included in the legislation.

~~together with and subject to such conditions and requirements as may be specified in a further written order of the Minister of Energy or in accordance with the Regulation.~~ If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Treasury Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Treasury Plan.

(2) **Required Terms and Conditions of the Treasury Plan** – The Treasury Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Treasury Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule ~~C~~3 and such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation].

(3) **Power to Review and Approve the Treasury Plan** – The Minister of Energy may, by written order, designate one or more persons to review ~~and, if considered necessary, require and prescribe amendments of~~ the Treasury Plan and to review and assess the consistency of the Funding Obligations incurred with such Treasury Plan, and the Minister of Energy may specify ~~conditions and~~ requirements in respect of such review ~~and prescriptions as may be~~ in such written order. The Administrative Agent, or such other person(s) as may be designated by written order of the Minister of Energy made pursuant to Section 8(1), shall make any such amendments to the Treasury Plan, and submit a revised Treasury Plan to the **[OEB]** for approval within [the time period specified in such written order.]/[[•] days of such written order].[***Consider periodic amendments to the Treasury Plan following an annual review; provided that amendments cannot affect the existing Funding Obligations. Consider the level of oversight the MoE/OEB will have over this process?***]

(4) Approval of Treasury Plan – The **[OEB]** shall have the power to and shall approve or disapprove of the Treasury Plan based solely on whether the Treasury Plan is consistent with (i) the principles, parameters, requirements and conditions set forth in Schedule 3, (ii) such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation] [and (iii) the Fair Allocation Plan]. If the **[OEB]** approves the Treasury Plan, then such Treasury Plan shall be implemented by the Administrative Agent. If the OEB disapproves of the Treasury Plan or otherwise fails to approve the Treasury Plan, then the Administrative Agent shall re-submit the Treasury Plan with such amendments as the Administrative Agent shall consider necessary for the Treasury Plan to be approved by the OEB.

(5) ~~(4)~~ **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the

allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Treasury Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Treasury Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(6) **Establishment of Special Purpose Entities** – If the implementation of the Treasury Plan contemplates the establishment of one or more special purpose finance entities to incur Funding Obligations under the Treasury Plan, as an Absolute Assignee and on a basis that limits the recourse for the payment of such Funding Obligations to such Absolute Assignee's interest in, to and under the Regulatory Asset, the Administrative Agent shall have regard to the characteristics specified in Schedule 4 in establishing such special purpose entity.]

(7) ~~(5)~~ **Obligation to Apply IESO Remittances** – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owner, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[11]

(8) ~~(6)~~ **Non-Recourse** – The Treasury Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Invoicing Agent, and Alternative Collection Agent, the Administrative Agent, the OEB ~~or~~, the Province or the Lieutenant Governor in Council, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part or expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(9) ~~(7)~~ **Incurrences are Binding** – Despite any failure to adhere to the Treasury Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of the Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be deemed to be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

[11] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the ~~Province~~Lieutenant Governor in Council, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the authority or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part.

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of the actual incremental costs incurred by such person of providing administrative or servicing services.]

Article 10 – Undertaking of the ~~Province~~Lieutenant Governor in Council

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The ~~Province~~Lieutenant Governor in Council may not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly. The ~~Province~~Lieutenant Governor in Council undertakes that the amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the ~~Province~~Lieutenant Governor in Council.

(2) **Undertaking and Agreement** – The ~~Province~~Lieutenant Governor in Council undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the ~~Province~~Lieutenant Governor in Council will not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time.

(3) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the ~~Province~~Lieutenant Governor in Council, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable expectations of the Province associated with any Regulated Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Treasury Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable expectations regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by the Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Treasury Plan.

Article 12- Miscellaneous

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of ~~Ontario~~the Province.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Treasury Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Treasury Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Treasury Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is

held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part [or under any Funding Obligation] and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.
