Subject: Re: Inaccurate Chart

After the leak, the Minister was very clear that the analysis was old and that LTEP would have the updated numbers. LTEP was planned for release in the summer but was pushed out for a number of reasons. Today, we announced at the OFHP technical briefing that LTEP would come out on October 26. Suggest this would be the best opportunity to correct the record. I could ask MO if they want us to reach out to CBC to let them know that they are linking to an outdated and inaccurate chart.

What have we done to correct for it?

FYI this is from May so has probably been somewhere on the CBC website for five months.

Subject: Inaccurate Chart

The chart below is not a reflection of the current plan.

Either we wait until the LTEP or try to correct the error now.

Can you check with your MO to see how to proceed.

How your hydro bill will rise over the next

Leaked cabinet document suggests steepest rise in electricity prices will come in the 2020s

By Mike Crawley, CBC News | Posted: May 11, 2017 2:31 PM ET | Last Updated: May 11, 2017 5:14 PM ET

Source: "Confidential cabinet document" leaked by PCs

Made with Chartbuilder

The document shows the average household monthly electricity bill in Ontario rising from \$123 in 2017, to \$195 in 2027, then \$222 in 2037 and \$231 in 2047.
