Role of the OEB?

Supports some form of consumer protection?

Would have 2 roles

Oversee OPG and ensure trust doesn't co-mingle with other OPG assets

IESO and regulatory asset

To have regulatory asset, need to have a regulator, if OEB feels they don't have a role, then that means IESO can't have regulatory asset and then OPG trust can't take it on and debt is held at IESO

Given all changes being made, could we look at making leg changes to ensure OEB does have a role

Need to flag all risks, where we can say it we can flag what we are working on for mitigation but mitigation isn't a solution yet

Binney

Eurig

Regulatory asset

While we are working, the mitigation won't address the risk yet

e.g., leg change could help

Keep "complete" in minute and have PO/cabinet take it out

Would be good if this week is a must - have policy at Cabinet, then allow a TB on Thursday, do announcement on Friday
