Notes

Next briefing: Market renewal (IESO)

Consultations went very smoothly, not a lot on pricing, most on supply, very engaged public sessions, much advanced from 2013

Issues:

Alignment to CCAP

Can plan for push on Evs but switch to electricity for things like home heating are not as likely

So what do you bake into plan now

Supply/demand

How do you take into account the variation that we just aren't sure of

Publish a range

Impact of fair hydro on rates/curve

How fuels fit in to plan
