Hi Jill

A few follow ups from our discussion today.

The first deck is the most recent example of his Transforming Public Services for the Future. This version was more education focussed given the audience but you get the idea. You can see that many of the core components of your file align with this presentation.

The second deck is a confidential copy of the governance model Karen and the Advisory Committee are contemplating. I understand the advisory committee would like changes but this gives you a sense. Please don't share this.

Thanks
Boafoa
