ENERGY will return to LRC/Cabinet in for an additional regulatory amendment related to the operation and oversight of the Financial Services Manager for GA refinancing (Summer 2017) and a proclamation OIC to transition the OESP program to government funding once the IESO variance account is depleted.

Current Status

- Ongoing work with agencies, LDCs and partners on implementation requirements, including:

Key Risks

- Ability to keep rates in line with CPI over the next 4 years as committed to by the government, which could increase fiscal pressure.
- The structure is unique which increases the risk of unknown factors impacting its performance.
- According to a legal opinion by former Supreme Court Justice Binnie, there is a moderately high risk that the proposed change would be characterized as an unconstitutional tax because future consumers are being required to subsidize current consumers.

- Potential need for additional investment in new initiatives proposed by ministries, and the release of a new Strategy will raise stakeholder expectations for new investments (e.g. in home and community care, in long-term care).
