---

Hi folks - here's where we are at with as of now - James has added our stuff, but if you guys want to add yours to this version, that would be great. Let us know if you have any questions.

Thank you  
Felix

Will be interesting to see if they have revised or refined the costings for the other initiatives as well.

Yes – higher (of course!) – about \$300M per year.

Getting a copy of the revised deck with the new numbers would be great, as I suspect the revised numbers (including all eligible RPP customers) will be higher.

Look forward to receiving the revised deck.

Energy re-ran the models to include all RPP eligible customers. Patrick – there was a deck handed out at SOC meeting this morning. If you don't have Karen's copy to scan, let us know and Sarah can scan my copy and send it around.

Hi Didem –

On your points:

- Please update summary of issues doc, it's less dense/easier to follow than the TB note
- I have not received updated materials
- While I haven't had a thorough debrief, the discussion yesterday was primarily focused on accounting and Cindy was present so think we can leave those pieces to her/Helen to feed in

Hope this helps.

P.

Patrick – wanted to double check two things:

- I would like to confirm that you would like us to update the summary of issues doc (the one called Energy Notes) and not the TB Notes
- I wanted to double check if Energy or CO have shared any updated materials, decks or costings.

Also – is there any feedback from yesterday evening briefing that should be worked into this. Given we were not there, wanted to make sure we don't miss anything Karen or Mike would be expecting to see as an issue and risk.

Thank you,  
Didem

**Subject:** RE: Electricity Risks - COE Thoughts and Feedback

Hi everyone –

Mike Jancik has asked that we pull together a list of risks/issues we have with electricity mitigation and Kyle has indicated that he'd like to receive today (my guess is this is back pocket document to help inform discussions at Major Projects tomorrow)

Can you please work to update the attached document to reflect all the risks we are tracking against this item? I think that that much of this can be pulled from the draft AN but I know there were a few placeholders in the note I saw that needed updating.

Felix has agreed to coordinate but will need Cindy/Helen and Didem/Sophie to update for their content as needed.

Many thanks,

P.

**Subject:** COE Thoughts and Feedback

Karen and Felix,

Please find attached the notes Sophie and I put together, that is intended to summarize the key issues and questions. In a number of instances (OESP Enhancement and Affordability Fund), it makes a number of observations and recommends alternative courses of action. These are our staff level thoughts and we would fully understand if that is not the feedback/recommendation carried in the note. We wanted to highlight these areas, as we think BIU can help support improvements that are no or low cost in these areas, rather than allocating significant new resources.

Felix, as promised, we will take this feedback/observations and work them into the draft note you kindly shared with us. Should have that over to you in the next hour or so. In the meantime, we thought you may want to see this.

Thank you,  
Didem
