Hi Cindy and Mark,

Karen has requested we further simplify the issue in the implementation note. I've taken a go at it, and tried to position it better having the GA piece as a separate section. (and got it down to 2 pages!)

Please let me know your thoughts – if you're ok with this I can send it up so Karen can have it with her at her meeting with the deputy at 4:30 that was just booked.

Thanks,
Sarah

Hi Sarah –

Karen had the change to look at this and had the following feedback:

- Does not want the Audit Committee proposal referenced in the attached and has removed it. Rationale being, it's not appropriate to put forward to this audience at this time.
- With respect to the rest of the note, she'd like it to be further streamlined and simplified for the audience. Can you please take another run at this to 'plain language' and simplify concepts where possible? For example, she's not sure we need to get into whole "qualified" vs. "adverse" opinions piece up top, we could just say the AG has two primary issues with the provincial books. The implementation plan section could be similarly simplified as it's still pretty technical and will be hard to follow for someone who doesn't have the background on the issues.

There is talk of the DM coming over here to look at this and other transition stuff at 430 today, if possible it would be great to have another turn of the note by then. Can you also let me know how the draft of the deck is coming along? There will be interest in seeing that too in whatever state it's in.

Sorry about all the asks/pressure, unfortunately people are starting to get anxious.

Thanks for all you hard work.

P.

Hi, I think we probably need to change this a bit. Not sure it quite works yet – we can discuss.

Thanks

Karen
