Steen

Not certain of the agenda for this afternoon call.

Can we also discuss the data request that have come up as a result of OPG discussion with the Bankers this morning. See note below

Thanks

John

Subject: IESO Data Needs

Based on the banks' advice that we will need data from the IESO as well as from OPG, we should ask the IESO for the following information for all of the parameters in the table below:

- As much historical forecast vs actual data as is available (minimum 10 years)
- Forward looking monthly forecasts out to 2049 (2 years after the financing ends)
- An explanation of all of the key drivers of the forecast (Gas prices, carbon prices, new generation, post-contract assumptions, etc)

Parameter	Breakdown
Consumption	By customer class (RPP Eligible, Class B, Class A)

Commodity Cost	HOEP / Market Revenue	By customer class By generation class (solar, wind, regulated hydro, nuclear, etc.)
	Export Revenue	Total
	Global Adjustment	By customer class By generation class (solar, wind, hydro, nuclear, etc.)
	Conservation	Total spend

Toronto Hydro Distribution Costs	Total Per kWh/avg customer bill
Transmission Charge	Total Per kWh/avg customer bill
Regulatory Charge	Total Per kWh/avg customer bill
