Some minor edits, Regards:

Revolving Line of Credit

The IESO has a \$975 million Ontario Financing Authority (OFA) credit facility, which is used to fund market liquidity and programs for the Ontario Fair Hydro Plan at a variable interest rate of the Province of Ontario's cost of borrowing for a 30 day term plus 0.25% per annum.

Subject: RE: market line of credit

Is this right?

1) Revolving Line of Credit

The IESO has a \$975 million Ontario Financing Authority (OFA) market facility, which it uses to fund variances within the Ontario Fair Hydro Plan at a variable interest rate equal to the Province of Ontario's cost of borrowing for a 30 day term plus 0.25% per annum.

No.

We have not yet signed the new \$2 billion or \$475 million agreements yet but expect too by sept 30.

The rate is to be variable = prov cost + 25bps.

The \$2B will be for fair hydro only whereas the \$475m will be for market activities.

Until these two new loans are signed, i am using the current \$975m facility to fund fair hydro at interest rate = prov cost plus 25bps.

Regards.

Subject: market line of credit

Is this correct?

1) Revolving Line of Credit

The IESO has a \$2 billion Ontario Financing Authority (OFA) market facility, which it uses to borrow loans and pay interest at a rate of 1.00%. Each month if needed a loan is taken out to fund variances within the Ontario Fair Hydro Plan. In addition, the IESO has a \$475 million facility also with OFA for the ongoing needs of the market.
