Enhancing Commitment to Conservation				Ministry Deck
	2. Pursuing Expanded Conservation Opportunities and Promoting Efficiencies a. In front of the meter conservation opportunities	- Highlight benefits of In Front of the Meter Conservation (IFMC) technologies and note successful results of IFMC pilots in Ontario through the Conservation Fund and the Smart Grid Fund. - Report on results of the Ministry’s study that explores the costs, benefits and potential of IFMC technologies in Ontario. - Exploratory: Direct OEB or IESO to report back with an IFMC implementation plan including achievable (cost-effective) potential and any regional considerations for implementation.	CoS agreed with these recommendations; asked that it be tied to “rate mitigation” and “innovation” themes
