Subject: RE: Rate Mitigation: Final Presentation

Key point is that we should not look at the 2016 actual compared to the 2017 OPO Outlook B as adjusted and assume that we are really going to see a 9% decrease in residential bills in 2017.

Please find attached an updated Table with the data associated with slide 3 to include the forecast value of 2016 for the OPO – Outlook B. The OPO Outlooks are developed prior to the availability of 2016 actual data.

**Typical Residential Electricity Bill Forecast includes taxes,
Assumes 800 KWh/Mth - (\$Nominal /Mth)**

	2014	2015	2016	2017	2018	2019	2020
2013 LTEP	\$ 137.00	\$ 145.00	\$ 167.00	\$ 170.00	\$ 178.00	\$ 177.00	\$ 181.00
Actuals	\$ 137.55	\$ 146.05	\$ 172.65				
OPO - Outlook B			\$ 160.24	\$ 168.06	\$ 171.27	\$ 174.45	\$ 185.66
OPO - Outlook B with 8% rebate, ICI, and RRRP			\$ 160.24	\$ 157.27	\$ 160.27	\$ 163.24	\$ 173.67

The OPO Outlook was based on a trajectory from the 2015 actual.

Importance: High

Hi,

We have another last minute follow-up request from the Ministry. They would like the values for the graph on slide 3, including for the black line that has been removed. This information is for back pocket purposes.

Joyce/George – is this something that you can quickly provide?

Good morning,

Please find attached the final presentation that was shared with the Premier. You'll notice that the "black line" representing the 2015-2016 actuals for Toronto Hydro customers has been removed at the request of the Ministry.

Regards,

Jordan
