CONFIDENTIAL - ONTARIO'S FAIR HYDRO PLAN IMPACT SUMMARY

COMMITMENT

- A 25% reduction in the after-tax monthly residential electricity bill in 2017 relative to what the bill would have been without Ontario's Fair Hydro Plan (OFHP)[1].
- The after-tax monthly residential electricity bill will increase annually at the rate of inflation in the years 2018-2021 (projections assume an increase of 2% per year).
- Savings for all RPP-eligible electricity consumers are due to three different initiatives:
    - Global Adjustment (GA) Financing – lower residential bills in the short term by borrowing money to partially pay for the total GA cost; increase residential bills in the long term to pay back GA financing debt (including accrued interest),
    - Tax-Basing Social Programs – shifting the cost of the Rural or Remote Rate Protection (RRRP) and Ontario Electricity Support Program (OESP) from ratepayers to taxpayers,
    - 8% Rebate – an 8% reduction in the total pre-tax residential electricity bill.
- Precise amounts borrowed to finance the GA are expected to be determined so as to achieve the goals stated above.

Average Monthly Residential Bill (750 kWh/month)	Actual 2016	2017	2018	2019	2020	2021
Total Bill (includes HST)	**158**	**164**	**167**	**170**	**181**	**178**
Total Bill (excludes HST)	140	145	148	150	160	158
Impact of GA Financing		-26	-26	-26	-32	-28
Impact of Tax-Basing Social Programs		-2	-2	-2	-3	-3
Subtotal		117	120	122	125	127
8% rebate		-9	-10	-10	-10	-10
HST		15	16	16	16	17
Revised Bill (includes HST)	**158**	**123**	**126**	**128**	**131**	**133**
Year-over-Year Change		-22%	2%	2%	2%	2%
Change from Forecast		**-25%**	**-25%**	**-25%**	**-28%**	**-25%**

Table 1: Projected average residential bill.

FURTHER OFHP ASSUMPTIONS

- The tax-basing of social programs and the 8% rebate are assumed to continue indefinitely.
- In the years beyond 2021, the after-tax monthly residential electricity bill will increase annually at the slowest constant rate possible (6.5% per year) such that the total accumulated GA financing debt does not exceed the total amount OPG has stated they are able to borrow ($28 billion).
- The total amount paid to service the debt in any given year is capped at a maximum amount ($2.2 billion) determined such that the total accumulated debt is fully paid by the end of 2047.
- An interest rate of 5% was assumed in the GA financing analysis, compounded monthly but only accrued at year end (i.e. intra-year interest accrual was not accounted for, equivalent to an effective interest rate of 5.116% accrued annually assuming uniform GA cost in each year).
- Further detail on the estimated GA financing forecast is available upon request.

[1] All statements of ratepayer impact strictly apply only to a typical Toronto Hydro customer consuming 750 kWh/month. Similar savings will accrue to all RPP-eligible customers but the precise savings will differ depending on the distributor and specific consumption profile.

Table 2: Projected GA Financing Impact and Associated Debt

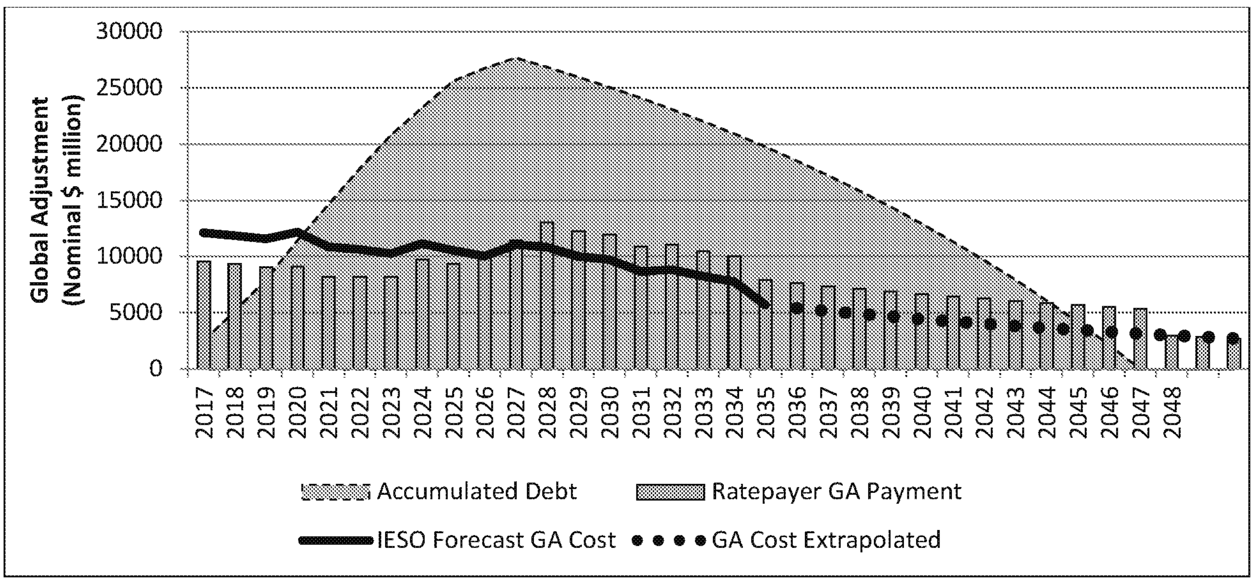

Figure 1: GA Cost, Payment and Associated Debt

---

[2] Although it is intended that RRRP and OESP will continue to be funded by the tax base indefinitely, the savings due to tax-basing these social programs were not included in the years 2022-2050 in the estimated residential bill forecast presented in Table 1. The OFHP is assumed to have been implemented January 1, 2017 for the purposes of this analysis.
