Subject: Re: OFHP

How will this be settled. We have always said we have two participants eligible for OFHP. Do we have this set up in our tool for station service of generating stations? Are they getting OREC too?

I asked Shirley to double check and it looks like they are eligible. electricity cost goes down to \$92.90 from \$124.

They are class B but they need to be eligible for OFHP similar to ORECA (8%). Unlucky they would be eligible.

Sorry to bug you but can you confirm that station service (generators as class B load when consuming) will receive the global adjustment reduction from the fair hydro plan? Just want to make sure I'm using the right numbers for the GCG calculation. Shirley has told me this is the case. I'm just looking for independent confirmation.
