Subject: RE: OEB Data Request for Total \$ and Total kWh - RPP Residential - 2016_

Miriam,

I want to also clarify that with the implementation of Ontario Fair Hydro Plan, reporting of these numbers will be based on the OFHP RPP customer claims and OFHP non-RPP customer claims. Therefore as it relates to RPP, 2016 will be the last reporting year.

Let me know if you have any question or wish to discuss further.

Thanks!

Thanks so much Idalin. I will prepare either an email or a letter to the OEB to provide this information, in Adrian's absence.

Miriam

Subject: FW: OEB Data Request for Total \$ and Total kWh - RPP Residential - 2016_

Adrian,

The RPP load for 2016 was 59,240,763,218 kWh and the revenue collected by LDCs was \$6.547B. The net revenue claimed from IESO by LDCs in 2016 was \$159.57M which is the shortfall between what they paid the IESO based on the HOEP and GA versus RPP collected from the LDCs RPP customers.

Let me know if you have any question.

Thanks,

Subject: OEB Data Request for Total \$ and Total kWh - RPP Residential - 2016_

Jeannette,

The OEB had requested this data last year, so we should expect this to be an annual request going forward. I have attached the response we provided them last year. As I will be out of the office for a few weeks after this Friday Miriam will provide our response to the OEB.

Subject: Data Request for Total \$ and Total kWh - RPP Residential - 2016

Hi Adrian,

I hope all is well with you.

I am writing to you in regards to the information we requested from the IESO last October with respect to Total revenue (\$) (RPP – Residential - Commodity portion only) and total electricity delivered (kWh) to the distributors for the Residential rate class (RPP) in 2015.

With your help and support, we received the following data from the IESO last year (for 2015):

“RPP load for 2015 was 59,156,277,131 kWh and the revenue collected by LDCs was \$5.929 Billion. The net revenue claimed from IESO by LDCs in 2015 was \$142.48 million which is the shortfall between what they paid the IESO which is based on the HOEP and GA (class B) versus RPP collected from the LDCs RPP customers.”

It would be great if we could get the same data for 2016. In summary, we're looking for two data points:

1. **Total revenue (\$)** for the Commodity portion for the Residential rate class (RPP) in **2016** in Ontario
2. **Total electricity delivered (kWh)** to distributors for the Residential rate class (RPP) in **2016** in Ontario

Thank you very much!

Best regards,
Saleh
