Okay but what does Terry know about the LDC relationship as it relates to this work – amazing actually since ELT has no sense as to what we are asking of the LDCs.

Regards,

Terry advocated the change be made to both risks and the ELT concurred.

Okay and thanks – who changed the risk ranking though?

The LDC risk got reduced as did the change in government policy.

The only risk in the orange is the risk around the accounting treatment being disputed.

I will send the deck that was sent to the board post ELT tomorrow morning to all of you.

Alexander

Kim

Please see below from Glenn. Can you ensure his points are addressed at the meeting?

Subject: Special Board Meeting

Tim, Peter ...

I am planning to participate in the IESO special board meeting on November 22 by telephone. I will be stepping away from other meetings in Ottawa that day to do so.

Clearly, the agenda and sought board approvals are significant. The material provided by management in preparation is very thorough and covers important and complex arrangements enabling the IESO's participation in the mechanisms for implementation of the Fair Hydro Plan.

A couple of items for consideration in advance of the meeting.

2. Regarding the request for approval on the three agreements I am supportive. However, I would like to understand the scope/magnitude/implications of "potential issues" that could occur as a result of the rating agencies processes (see references on pp 17, 20, 21 ...). This would be helpful in allowing me to consider setting boundaries for the delegations sought for approval. I do not like to grant delegated authority without some definition of the boundaries for such authority. Recall the board granting authority within specific boundaries for settling the recent labour agreement. I believe this is prudent practice.

Perhaps both of these matters may be addressed by management in their presentations at the meeting.

I trust this is of assistance.

... Glenn

H. Glenn Rainbird, O.C.
