Subject: Env Commissioner Request

The Environment Commissioner has made the following request:

3. More generally, as we discussed, I am considering producing a technical note or white paper for the Ontario public on the increases in electricity prices over the past decade. you kindly offered to provide us with your interpretation and supporting documentation that we could use for this purpose, once you have delivered your technical report to the Minister of Energy for the purpose of the Long Term Energy Plan. Please let us know what would be a reasonable target date for this information, and whether any further discussion of the topic is appropriate.

Have we got anything that fits the bill?

Bruce
