Perfect. Sounds like a good coordinated approach on our part.

Were you aware of the LTEP meeting that Andrew P is referencing below?

We met with them on Friday on subject of LTEP analysis and this came up. Will get an estimate of time involved asap. The idea is to incorporate ICI, LRP and HQ. No specific intent to do anything on the load side beyond ICI.

In other news, we're already working with them on the rate mitigation options. Joyce is lead on this overall, David is the main man from my shop on this. For details, I suggest touching base with Joyce. In meantime, i'll work on estimate re: update work timing which may or may not be moot, depending on the turnaround expectation, which I understand is being discussed as we type/read.

Subject: Updated cost forecasts

Hi Bashir, Andrew—

The Ministry is conducting some analysis to look at rate mitigation options, but would like to assess them against updated residential and industrial forecasts. They would like to get OPO forecasts updated for initiatives that have been

announced since the OPO release (ICI expansion, LRP suspension, 8% rebate, etc.). Are you able to help with this? And any idea how long this would take?

Thanks,
Andrew
