Subject: RE: Rate Mitigation Announcement

It is, although I'm not sure where Geoff Zochodone heard that the GA will be given to OPG as an "asset". He tweeted it though, so I suppose its public information now.

This looks good – can you confirm that the information below is already public?

Subject: Rate Mitigation Announcement

Hi Jordan – how's this for a summary?

The government announced its rate mitigation plan today – *Ontario's Fair Hydro Plan* – and the IESO (Kim Marshall) participated in today's technical briefing for media.

Here's how the plan impacts the IESO:

- The IESO will work with OPG to facilitate the refinancing of global adjustment over a 30-year term.
 - This will involve the IESO collecting less money from LDCs and transferring the outstanding amount to OPG as an "asset" they will manage
 - Current Ministry of Energy forecasts indicate this will be about \$2.5B per year over the first ten years, with annual interest costs not exceeding \$1.4B
 - Legislation will be introduced that will enable IESO and OPG to refinance GA
 - IESO contracts holders will not be affected
- The Industrial Conservation Initiative is being expanded by reducing the threshold from 1MW to 500kW and targeting more small manufacturing and industrial customers
- The Rural or Remote Rate Protection will be broadened to cover more customers and its costs will be now be recovered through the tax base
- Market Renewal was cited by the Minister during this morning's press conference and in a media backgrounder as another measure solution to mitigate rates
 - The backgrounder saying it is "estimated to save at least \$200M per year, starting in 2021"

Further information can be found in the government's media materials, attached.

Andrew
