Subject: RE: Outline for council presentation to Dutton Dunwich

This looks good. Some feedback and suggestions below. Reminder that we need to keep the text light and the content slides to about 10-12.

Subject: Outline for council presentation to Dutton Dunwich

Jordan – as requested, here is an outline for Terry’s council presentation to Dutton Dunwich. The information I was given does not include how long he has so when we find that out, we may have to adjust. This is based on the last municipal council ppt he did back in Dec.

Intro

- Who we are and what we do
- Electricity sector players

Electricity sector

- Ontario at a glance
- Ontario demand
- Electricity production

Electricity pricing

- Electricity pricing trends [We will probably need to speak to the Fair Hydro Plan, I don’t think we can ignore. Do we have any]
- Global adjustment

Conservation

- IESO’s role in conservation
- Conservation opportunities for municipalities
- Municipal energy profile research

Generation [this section should speak to Market Renewal, or at least moving to more efficient process in future)

- Large renewable procurement (probably want to keep this high level)
- Other generation in the area

Regional planning

- Regional planning update
- Regional forums

IESO resources – keep in touch final slide
