Subject: FW: Inquiry on GA Modifier

Proposed response to Parker's Q:

We don't forecast GA costs and can't comment on the validity of the FAO's forecast, but we are expecting to see an adjustment in August numbers to account for consumption not yet billed by LDCs.

Could we say something like:

We don't forecast GA costs and can't comment on the validity of the FAO's forecast, but we are expecting to see an adjustment in August numbers to account for the time (one month starting July 1) it is taking LDCs to set up their billing accordingly.

Put time in our calendar today – truthfully I would let Parker's comment rest and not respond; the first part of the sentence is true and the "ducks in order" is a throw away comment that the IESO does not need to 'wade in to" (like the water reference ducks, water....)

Thanks, Jeannette.

Did you have any bandwidth today for a chat about this? Is there a time that works best for you?

John

Well no – their ducks are in order but their billing date for July is likely to include both partial June and July consumption in the commodity calculation and it would be assessed at different rates (pre and post July 1). Only those rate payers with billing dates close to the end of July would feel the full FHP reduction as their bills would have primarily be based July consumption values for the full commodity calculation reduction on their bills.

Hi Jeannette,

Can you please confirm if his interpretation of our response is correct.

Thanks.

John, Thanks for this. I suspected it was due to the partial reductions from the OEB in May & June. I think what your are suggesting is that the August numbers should reflect numbers that are closer to those touted by others such as the FAO as some of the LDC are still getting their ducks in order..

Parker

Hi Parker,

Under the Fair Hydro Plan ([Bill 132](#)), eligible customers are being provided relief from paying the full cost of electricity through a number of reductions, including lowered Global Adjustment (GA). As a result, the IESO only collects a portion of the full GA from local distribution companies. During May and June, a partial reduction was granted by the OEB to eligible customers, with the full implementation taking effect on July 1, 2017. The deferred GA amount under the Fair Hydro Plan is recorded in a variance account and published to the IESO's website.

The monthly breakdown of deferred GA amounts (in millions) under the Fair Hydro Plan are as follows:

May*: \$ 110.2

June*: \$ 136.6

July: \$ 147.9

**Partial implementation of Fair Hydro Plan*

The full implementation of the Fair Hydro Plan took effect on July 1 but will take a full month for LDCs to implement the change in their billing cycles, which will be reflected in their August 2017 submission to the IESO.

Regards,

John Cannella
