**Subject:** Wynne spin and the "Fair Hydro Plan"

To all, The announcement back on March 2nd of the Fair Hydro Plan by Premier Wynne and Energy Minister Glenn Thibeault was full of what I will simply label as "spin". That spin led me to try, as best I could, to look behind the words and try to really disclose what the "Plan" would do, particularly when it became a platform in the Finance Minister's budget. Once again the budget document and the specifics in it related to the "Plan" forced me to dig deeper. What finally developed is the captioned and due to the information that was hidden and the flowery words my dissertation encompasses three (3) parts.

Part 1 is posted in the link below and Part 2 will be posted early tomorrow and Part 3 will be posted tomorrow afternoon. Interestingly enough my articles coincide with Minister Glenn Thibeault's announcement that the legislation that would formalize the "Fair Hydro Plan" has today been introduced in the Legislature.

Find the article and the two that will follow here:
