Subject: Wynne government hydro discount means larger costs looming

To all,

It appears that no one is taking advantage of the Wynne government's Fair Hydro Plan's 25% off discount. What that means is the "Variance Account" will be accumulating billions more dollars that will need to be financed. It doesn't bode well for the future of that basic commodity "electricity" and what it will mean to our children and grandchildren.

My latest takes a look at only the 2nd month (August) into the UnFair Hydro Plan and the amount to be refinanced is already over \$600 million and we are consuming less and less every month.

Find the bad news here: <https://parkergallantenergyperspectivesblog.wordpress.com/2017/10/02/wynne-government-hydro-discount-means-larger-costs-looming/>
