WHITE PAPER

How Hydro One Improved Planning and Investment Optimization Processes With Decision Analytics

Many utilities are looking to improve their asset investment planning and portfolio optimization processes in response to requirements from regulators and other stakeholders. Hydro One responded to this challenge by implementing the Copperleaf C55 Decision Analytics solution which helped them:

- consider the risk and financial impacts of investments
- evaluate investments based on their value and alignment to strategic objectives
- analyze competing investment options to optimize a long-term plan that meets all constraints
