	FHP – what would the impact be of removing sooner than expected? **Reduce electricity prices (general) –** what are other ways overall costs can be reduced? Could cap and trade fund a reduced rate, or a reduced rate for certain customer classes (i.e. industrial)? Can it be reduced another 12 percent for residential, small business, and farmer? Shift program and other costs from rate- to taxbase (e.g. conservation, SME charge, reliability initiatives, etc.)?	design of future rate structures **Background:** *Regulated Price Plan* - IESO is funding 5 RPP pilots (selected by OEB) to examine alternatives to TOU pricing to inform OEB's redesign of the RPP - Final results for all pilots are expected between August and November 2019 *Pricing and innovation* - Some of the most productive economies have higher electricity prices (Japan, California, Scandinavia)
