Importance: High

Since this is a discussion/planning meeting ahead of the LTEP Demand focused meeting with PO on June 26th, I suggest using these slides from the June 15 Minister's Briefing as the foundation: 3, 4, 5, 6, 8, 9, 10. These can be supplemented with a slide that has added details on the modelling assumptions along with a "purpose slide at the outset.

Hey there,

Are we referring to the same product? This is the demand deck for the PO briefing next week, that was due last Friday end of day. We'll be walking through the product with DM/CoS tomorrow morning at 10:30.

I know there are a few under development, so I wanted to clarify timing/products.

Andrew and Rebecca are preparing a draft which I'll review tomorrow. Focus is on before, today and future. Copying them here. They've been invited to this afternoon's discussion. I am off site today at mrp.

Andrew, I understand from Bashir that your team is working on something for this? The IESO focus is on the demand outlook only, a review of the LTEP modelling background assumptions for the demand outlook. It's likely we can draw heavily from prior materials i.e. the June 15 and to a lesser extent one for the multi ministry one today (which drew from June 15th). I'll review those and recommend some slides that we could use as a foundation. Can you advise on who on your team is looking at this? This needs to be delivered later today.

Hey there,

I have not yet seen a deck for tomorrow's meeting, but imagine that a lot of it can be pulled from some of the other/existing modelling decks.

Let me know if any help is required on my end.

Anthony

Having briefing and deck overload. I understand that we are supposed to be briefing DM and COS tomorrow on demand in preparation for a briefing of the PO on the 26th. Has that deck gone to the Ministry yet?

Mike, Terry,

Below is the most recent LTEP briefing schedule. Note, we have been asked to lead a few of these briefings and details on those are also included below.

The first is a Minister's briefing on the current modelling for Thursday next week. Ministry has asked that IESO develop a deck that is a cross between the initial deck submitted, and the one from last week that included options for reducing system costs. We have been asked to submit a final deck by end of day **Monday, June 12**.

The next product is for the June 20 briefing with MO. In preparation for the June 26 briefing for PO, MO is hoping to have a product that outlines modelling and background assumptions on the demand outlook – because conversations are ongoing on supply, ministry intends to focus on demand only. We have been asked to submit a final deck by end of day **Friday, June 16**.

Separately, there is a market reform briefing scheduled for PO on June 20. A product for that is tracking for **June 14**.

DM/CoS Briefings

DM June 8, 1:30-2:15pm

- Multi-Ministry Brainstorming Session

June 20, 10:30-11:30am

- 10:30-11:00 – Communications Plan Discussion
- 11:00-11:30 – Demand Update from IESO

June 22, 3:30-4:30pm

- Overview of all LTEP initiatives

Minister's Briefings

June 15, 10:00-11:30am

- IESO Modelling Update

PO Briefings

June 20, 2:00-3:00pm

- Market Reform

June 26, 3:00-4:00pm

- Demand Update
