

Agenda Item - Summary

Date of Meeting: Thursday, June 16, 2011

Agenda Item: Alternative Rate Designs for Future Business Plans

Strategic Priority: 3,4,5 ¹

Executive Summary:

The IESO's business is facing increasing challenges from government and public scrutiny of electricity costs at the same time that sector changes are imposing upwards pressure on the IESO's usage fee.

This paper highlights the key challenges that the IESO faces when seeking approval of its annual revenue requirement and fee. The paper discusses potential solutions to these challenges in the form of alternative rate designs and fees case strategies. A recommended course of action is provided.

Significant Issues:² None

Decision being Sought: None

Attachments: Yes

-
- ¹
1. Delivering reliable electricity supply on demand.
 2. Developing Ontario's electricity market through evolution of the IESO-administered markets.
 3. Providing value in all our services and products.
 4. Responding to the needs and concerns of our stakeholders.
 5. Earning the trust of stakeholders as a just administrator and capable advisor.

- ² Consider contentious issues and significant risks.
