

ED Interrogatory #041

Issue Number: 6.5

Issue: Are the test period expenditures related to extended operations for Pickering appropriate?

Interrogatory

Reference:

Reference: Ex. F2-2-3, Attachment 1

The IESO's recent *Ontario Planning Outlook* states as follows: "To facilitate any potential large firm import capacity arrangement from Quebec/Newfoundland, major system reinforcements in eastern Ontario would be required – a new high-voltage direct current (HVDC) intertie to Lennox would be an example. The incorporation of new resources in Southwestern Ontario would require reinforcement of the transmission system, such as in the West of London area, as well as additional enabling facilities. Similarly, investments in new resources in the Greater Toronto Area might also trigger the need to reinforce the bulk transmission system."

(a) In relation to the jurisdictions referred to in the above quote please provide the import capacity from the jurisdiction without making the system reinforcements referred to above; and

(b) In relation to the projects referred to in the above quote, please provide a list of each of the reinforcement projects indicating (i) the approximate cost, (ii) the location of the project, (iii) the import capacity that it would enable, and (iv) the approximate time required to undertake the project.
