Subject: RE: Getting a Better Understanding of Conservation

Hi Jeannette,

Thanks for the head's up. You should receive (or have received) some meeting invites from Phil or Kausar (copied) who are managing this RFP.

Thanks.

Katherine

Will you be populating our calendars with meetings to discuss RFP candidates soon. It is just that I am in the throes of implementation of Ontario's Fair Hydro Plan and I am "running away" to Barbados with Katie from April 21 – April 26 and I do not want to disappoint you, after committing some of my attention to the RFP review. I did notice that the close date is April 6 and want to give you some of my time before leaving for my sojourn ☺

Regards,

Subject: RE: Getting a Better Understanding of Conservation

Hi Jeannette,

Would you be interested in supporting the non-energy benefits study that we're doing as part of the Conservation mid-term review?

As part of the mid-term review, we're required by direction of the minister to re-assess the non-energy benefits adder (15%) that we apply to the cost-effectiveness tests we use for Conservation. We're coordinating with the OEB on the study (because they use the adder for gas programs as well and are also undertaking a mid-term review).

The study may also be used by MOECC to assess their GHG reduction programs.

Here is how you could be involved:

- Participate in the committee to select the vendor to do the study (the RFP was posted last Friday and can be found here: <http://www.ieso.ca/corporate-ieso/corporate-procurement/non-energy-benefit-study> (I'll participate as well + some members of my team from our EMV group)
- Review and provide comments on the draft study (your financial background will provide a valuable perspective)

We need to complete the study in June and the draft and final results will be reviewed with the external Conservation Framework Mid-Term Review Advisory Group.

Please let me know if the above is of interest to you.

Thanks,

Katherine

Subject: Getting a Better Understanding of Conservation

Katherine,

As part of my development, I have been asked to better understand Conservation (from soup to nuts) – the successes, issues/challenges, risks, politics etc. Are there any teams to potential join, or other ways to involve myself in your “world” so it becomes a learning by doing exercise. Thoughts?

Regards,
