

Register an Organization

The first step in the registration process is to complete this online form.

Register an Organization

There are four main parts to this initial registration. All mandatory fields on the form are noted with an asterisk(*).

Part 1 requires the organization's name, address and HST number.

Part 2 requires the business entity type and intent of registration. This information is required as the IESO will conduct a business registry search on the organization.

Part 3 indicates the organization's mandatory contacts—these individuals will be responsible for certain tasks throughout the registration process.

Part 4 requires the contact information of the individual submitting the initial registration. If this individual is not identified as a mandatory contact, they will not receive communications once the registration process is complete.

During this process a Participation Agreement will be sent, through [Online IESO](#), to one of the mandatory contacts established above.
