Subject: Annual report title suggestions
Attachments: AR Master Draft copy 20170313.docx

Terry – we need to revisit what title we will use on the 2016 annual report.

A reminder that last year's title was "Powering a connected world."

These were the suggestions that Tim had proposed with the outline some weeks ago, which you indicated you didn't like:

- ☐ Harnessing change to enhance future reliability
- ☐ Lighting the path to tomorrow
- ☐ Powering the pace of change
- ☐ Reliable transformation

Here are some new suggestions for your consideration – let me know if you like any of these or if they spark another idea for you. I've attached the latest version of the copy for reference.

- Driving the pace of change in Ontario's electricity future
- Framing Ontario's electricity future
- Delivering a brighter future
- Planning reliable electricity for Ontario -- today and tomorrow
- Securing reliability in a changing sector
- Navigating change in Ontario's transforming electricity future

Happy to discuss.

Thanks.

Mary
