

Agenda Item - Summary

Date of Meeting: October 25, 2017

Agenda Item: #XX – 2017 Long-Term Energy Plan Update

Nature of Issue: To provide an overview of the IESO's plan for the development of its Implementation Plan due to the Minister by January 31, 2018.

Executive Summary: The next Long-Term Energy Plan is expected to be released on October 26; the IESO's Implementation Directive will be issued concurrently, which will formally kick-off the development of the IESO's Implementation Plan.

A work plan has been developed for the IESO's Implementation Plan, which includes engagement considerations and target dates, updates to the Ministry, and communications milestones.

The IESO has also begun discussions with partners (OEB and Hydro One) on opportunities for coordination on directive items, where appropriate.

Significant Issues:

- Expectations on when directive items will be completed and on the level of engagement.
- Coordination with key partners.
- Defining the scope of the engagement that will take place this year on the IESO's Implementation Plan.

Decision Being Sought: None
