Subject: RE: Option B+ baseline data

As discussed, please find attached the requested baseline data. The multi-ministry deck and assumptions document (referred to in the excel file) is provided for additional context. Note that we continue to refine the input assumptions/outlook and some of this may evolve further depending on the outcome of the various pieces of work currently underway (on OFHP, imports, etc).

Subject: Option B+ baseline data

Hi there,

At a briefing this morning, ministry requested that the IESO provide the updated baseline data in Excel (demand, emissions and costs). They're referring to the updated 2017 analysis, or "option B+" as it has been referred to. Ministry is using this information to update their modelling on fuels.

Can you please provide this?

Thanks,
Anthony
