Subject: OPG's rate application - Final submission

Today, OPG submitted its *Reply Argument* to the Ontario Energy Board (OEB) for our 2017-2021 rate application. OPG's request, if approved, would result in an average residential customer bill increase of **Redacted - Commercially Sensitive** per month in OPG's original submission as a result of a regulation change that enabled us to level our rate increase out more favourably. Due to the government's Fair Hydro Plan and the resulting decrease in electricity bills, OPG's requested rate increase would not be visible to residential customers. **Redacted - Commercially Sensitive**

Redacted - Commercially Sensitive

Redacted - Commercially Sensitive

In total, the documents submitted in support of our application totalled approximately 30,000 pages. It was an unprecedented undertaking and an enormous amount of work. Thank you to the many staff across OPG who worked very hard and contributed to our application. I sincerely appreciate your efforts and am confident we have put OPG's best foot forward.

Chris Fralick
VP, Regulatory Affairs
