Hi Ken,

We replaced the paragraph that discussed the Trust's income with the following, which directly highlights the lower cost to ratepayers.

Based on the term debt issuances to-date, OPG secured two of the lowest structured financing costs in the Canadian energy sector. Management estimates lower interest costs to ratepayers of about \$250 million over the ~17-year average term of the debt issuances.

The lower interest costs are a result of achieving better credit ratings.
