I've sent out an email to canvas the VP's

I have standing items: FN rates, mergeco, natural gas expansion, OPS audit. Also, Minister and MO briefings (cap and trade, one-on-one, communications plan)

Andrus is pushing a cyber-security centre of excellence to be housed at IESO since they are the intermediary between smart meters and the distributors and the grid.

Can you start putting topic item list together

Add ...

- RNG
- gasoline price review
- Coms strategy
- MSP report
- board members

Check with Mary Anne, Lynne, Martine to see if anything on their end....

Anything else on your list?

Let's have a final draft that I can review by Wed
