Ive reviewed -- 2 places where Ive provided comment...

In particular re COO in headcount...and one of the focus statements...

I dont love all of the new wording..in particular around AMR...but it has to go...so I will leave with it....

One overriding concern re the Outcomes statements..is they do not really describe an end state objective...when we get to the nex phase..actual program targets and measures..we need to make sure that they are "SMART"

Not sure if we still need to talk about this..or with my comments, and your revisions, its good to go
