It would be faster to rent a car.....

AT is joining the mMin.

EPC: the Lynne thing on NG expansion is likely the most important but there are no materials.

Yes, I spoke with Lynne about RPP.

Not sure about Viive and EPC but probably no harm in her staying for entire meeting. I haven't read any of the materials ... do I need to?

Re minister lunch... I had originally thought it was a one on one but seems not. I normally go on my own but I haven't objection if you or Andrew think it's beneficial.

We can go over agenda and oea call tomorrow.

My flight to Toronto was diverted to Windsor... I've been sitting on a tarmac for more than 4 hours after circling for an hour ... and we still have no idea when we are getting cleared back in to TO. Needless to say .. I am in no mood....!

There is an RPP panel meeting in the calendar for tomorrow. Lynne says it's required

Viive is coming to the EDA portion of EPC. There are other agenda items including RPP pilots and NG expansion. She wanted to know if she stays for that?

Andrew asked if I was attending lunch with you and the Minister?

I spoke to Vince at the OEA today. Your call will likely be cancelled. Will know more first thing tomorrow. We have just been having a hard time scheduling the LTEP meeting with their org. I think it is nailed down now.

The agenda for our regular meeting (thursday) with AT is:

Disconnection ban

FN Rate

Dubreuiel Lumber

Enbridge geotherm

NG expansion

DSM mid-term review

September appointments

Exec compensation
