I think you had some suggestions to rework this a bit... did you want to put them in so I can read it with them in ? Or pass on to Aleck to get his views...
 I want to try and get my edits in later today so I can get a clean final by end of tomorrow

Subject: OEN Speech

Here is a revised version of the OEN speech.

It reflects the feedback from the meeting this morning.

You will note in particular:

1. I have moved the reference to the OEA submission to the front
2. I reframed the public policy changes
- 3.. I have reordered the laundry list

You will also note that I have deleted the discussion about possible reform of the RRF - I would suggest that we save this for the OEN speech.

By my estimate, the speech is now at about 12 to 12 and a half minutes.

If we need to shorten further (by another minute, say) - I would suggest we take a scalpel to either: a) the discussion of public policy towards the front, or b) the "laundry list" of achievements.

See what you think.

Regards

Aleck
