Here you go – the last I have on record. Please note that in a follow-up e-mail (also attached), Aleck suggested adding:

* Innovation in the electricity sector is paralleled by innovation in the natural gas sector, such as hydraulic fracking which has enabled the supply of gas from Marcellus and other basins, the use of natural gas as a transportation fuel, and the use of renewable natural gas as a source of supply

Subject: good morning

Hi Lisa. Can you do me a favour and flip me the latest and greatest version of the blueprint?
Thanks.
