TCM & acupunctrist is the highest professinal health care which practised over thousands years due to effectiveness.

I came from a doctore family.My dad is a brain surgeon and my mom is Dr.Traditional Chinese Medicine.

My mom born 1945 ,she is an amazing excellent doctor of TCM.She studied 6 years pluse another 2 years for the entrance TCM which is very serious profession medical health study

instead of ear piercing or tattoo.

Without regulation, that will expose the public health with the highest risk. She has been practising TCM entire her life. She helps lots of chronic diseases patients with various diseases till now.

Even My mom's health director family 3 generations take the professional medical care from her.

She did lots of amazing treatments such like very difficult chronic disease, even in western medical book showing NO CURE, but she cured her patients with Hepatitis B and neurodermatitis. She helped a lot of infertility patients with very low cost and arthritis and diabetes patients etc.. she performed very great treatment for her treatments.

I have been seen those happened in my real life.

I admire those wonderful person of TCM.

Chinese medicine is being recognised as a very effective part to orthodox healthy care and is being integrated into clinics and hospitals. Ontario government should consider TCM together to treat public and reduce the federal government cost and tax payer's money instead of repealing the regulation of TCM.

Professional regulation is necessary to maintain the highest standard of public safety and effective practise.

Deregulate TCM act and allow anyone with the fast training to practise means the professional medicine is a disaster to the public safety!

Please reconsider & remove the schedule 5 of Bill 88!
