22393201 Georgetown Corridor Airport Rail Link Final Report Mar2012.pptx

Daniel

Please find attached our final version of the slide deck that incorporates the comments set out by Bert in his email of 8th March to you. Apologies for the size of the file. We will forward the tables and charts as requested by Bert separately in the very near future.

We believe that this now concludes this phase of work as discussed with you previously. We can also confirm that all invoices in relation to this work have been paid.

Kind regards

Jim

Jim,

I think we will do our own overview/key messages presentation and can wrapup your report.

Some minor revisions below on which we can conclude this assignments.

Many thanks.

Daniel

Daniel:

As discussed the report looks OK. Three relatively minor comments from me:

a) page 9 there should include a line or two that addresses the reaction from most people that August does not represent the business travel peak month. SDG did some analysis of this when the topic was raised last summer.

Exclusion per Committee Direction

Exclusion per Committee Direction

I assume the final "ppt based" report will be accompanied by a complete set of data files.

Stephan:

See attached. I believe this covers the high level summary thta you were talking about when we last met.
