Sarah and Jim:

Please find below a table with GDP forecasts (item #3 in the list).

Canadian Forecasts of GDP (% change)									
Economic Variable	2011	2012	2013	2014	2015	2016	2011-16	2016-21	2021-26
Real GDP	2.2%	2.0%	2.0%	2.8%	2.6%	2.3%	2.3%	2.1%	1.9%
Source: Transport Canada Assumptions Report, December 2012									

The Transport Canada Assumptions Report for 2012 does not seem to be available online (only up to 2009: <http://goo.gl/QFkWn>). If you need the full document, let me know and I will ask GTAA to provide it.

I'm hoping to have the rest of the information later today.

Alex

Hello Sarah and Jim:

Please find attached two passenger profiles from GTAA for 2010 and 2012 respectively, regarding item #4 in your data request email. When I compared this 2010 file to the one you provided on April 4, I found many discrepancies between the two.

For example:

- the magnitude of the numbers between the two files is very different
- the new file has very high traffic at 5am, which is quite counter-intuitive

I have asked the GTAA for clarification but am sending you the files anyways so you can make your own analysis. In the meantime, let me know what your thoughts are.

I will email again as soon as I get more from the GTAA.

Sincerely,

Alex
