The Standing Committee on Finance and Economic Affairs

January 24, 2022

Ontario Catholic School
Trustees' Association

Ontario Catholic School Trustees' Association

Mission Statement

Inspired by the Gospel, the Ontario Catholic School Trustees' Association provides the provincial voice, leadership and service for elected Catholic school trustees to promote and protect publicly funded Catholic education in Ontario.

Vision Statement

Ontario is enriched by a publicly funded Catholic education system, governed by locally elected Catholic school trustees who serve with faith, commitment and compassion.

Introduction

The Ontario Catholic School Trustees' Association (OCSTA) was founded in 1930. It represents 237 elected Catholic trustees who collectively represent 29 English-language Catholic district school boards. Together, these school boards educate approximately 545,000 students from junior kindergarten to grade 12 and adults in continuing education programs province-wide.

Inspired by the Gospel, the Mission of the Ontario Catholic School Trustees' Association is to provide leadership, service and a provincial voice for Catholic school boards in promoting and protecting Catholic education.

Annually, OCSTA submits a brief to the government with recommendations for improvements to the funding of education. Recommendations are made on the basis that the education funding system in Ontario must respond to four essential principles:

Equity: A funding formula must distribute education dollars equitably among all Ontario school boards and their students;

Adequacy: The level of funding for education must be adequate to ensure quality education for today's students;

Autonomy/Flexibility: The model must allow school boards the autonomy and flexibility in the spending they require to achieve the distinctive goals of their system, and to meet local needs; and

Accountability: The educational funding model must include mechanisms that ensure the appropriate degree of accountability for all parties and transparent processes and reporting mechanisms to support efficient and effective use of educational resources for students.

The recommendations contained in this brief are important issues to the 29 Catholic District School Boards in our province. In some cases, they represent long standing concerns and in others describe recent priorities. We trust that, particularly in light of the government's commitment to consultation, our recommendations will be thoughtfully considered. As always, we would be pleased to meet with the Minister or representatives of the Ministry to discuss any of the following items in more detail.

Catholic School Boards As Partners in Service Delivery

The OCSTA, on behalf of Catholic school boards, makes every effort to work closely with the Ministry of Education and other provincial education partners to develop education programs, levels of funding and curriculum that supports the legislative and regulatory requirements spelled out in the *Education Act*. We have enjoyed a positive working relationship for many years with all stakeholders in the education sector, including all Ontario political parties. Catholic school trustees are the democratically elected representatives of the Catholic community. The boards they serve on are responsible for:

- Establishing the Christ centered mission of their school systems;
- Developing school board policies that promote and protect Catholic education;
- Provide excellence in academics and faith formation opportunities for students;
- Establishing the Annual Budget;
- Hiring Director of Education and other staff consistent with preferential hiring rights;
- Promoting the constitutional right of Catholic school ratepayers to govern, manage and control publicly funded Catholic schools.

Our member school boards design and deliver Christ centered education programs to students. These boards are directly supported by 2.4 million Catholic ratepayers and have been an integral part of the history and fabric of our province for over 175 years.

Efficiencies at Catholic School Boards

OCSTA supports the government's objective of providing public services as efficiently and effectively as possible. Throughout their history, Catholic school boards have been good stewards of the resources available to them. They continue to seek cost efficiencies in a number of areas including;

1. Student transportation;
2. Purchasing consortia;
3. Curriculum co-operatives including membership in the Institute for Catholic Education;
4. Ontario Education Services Corporation (OESC) provides a central repository for resources and provides a host of services for school boards;
5. Ontario School Boards' Insurance Exchange (OSBIE) is a school board owned, non-profit insurance program, representing 78 school boards/school authorities.

These partnerships save Ontario taxpayers millions of dollars each year. The Auditor General states that "school boards have been increasing their use of group purchasing arrangements to acquire goods and services. We noted that the value of school board purchases acquired through supplier agreements negotiated by the Ontario Education Collaborative Marketplace increased from \$10 million in 2010 to \$112 million in 2016". (2017 Annual Report, Chapter 3, section 3.12 p.615-616).

Financial Impacts on Boards Related to School Reopening - COVID-19

The OCSTA acknowledges and appreciates the funding provided to date by the Provincial Government with regard to the many and complex issues associated with operating schools throughout the pandemic. Saying that, the financial impacts on Catholic boards in the current context of reopening and keeping schools open have been significant and will remain an ongoing challenge. In response to the guidance from the Ministry of Education and public health authorities, boards have established numerous protocols and practices to ensure a safe return to school for students and staff. Boards have also established virtual schools for those students that choose to learn remotely. With enhanced health and safety protocols including reducing class size where possible, enhanced cleaning, co-horting of students, providing digital devices and expanding broadband access and the requirements for virtual schools, boards have used significant financial resources. Even with the additional investments from the province and federal government as well as the use of reserve funds, boards will face enormous challenges in the near term in meeting the ongoing program and service requirements for students, while maintaining balanced budgets. Throughout the planning of and re-opening of their schools, the health and safety and well-being of students and staff has been and will remain the number one priority of Catholic school boards.

Key areas of board operations impacted by the re-opening and keeping schools open requirements during a pandemic include (but are not limited to) the following:

- Purchasing digital and information technology resources for students and staff;
- Creating virtual elementary and high schools and the costs of hiring, training and scheduling of teachers;
- HVAC and capital repairs to aging school infrastructure;
- Student transportation costs;
- Staff accommodation, sick leave and related human resource costs;
- Purchase of personal protective equipment for staff and students;
- Increasing social distancing by reducing class size;
- Human Resources and planning costs associated with the almost constant need to re-organize schools;
- Increased utility costs associated with the operation of HVAC systems;
- Additional Corporate Services administrative costs associated with increased reporting, distribution of PPE, facilities and procurement to name only a few.

OCSTA Recommendations:

- **That the Ministry of Education provide any and all additional required investments to assist school boards in managing the extraordinary costs associated with school reopening and pandemic response;**
- **That the Ministry of Education restore school board reserve funds for expenditures related to pandemic planning/response;**
- **That the Ministry of Education conduct a review of the education funding formula for its adequacy and (equity) in managing the costs associated with the pandemic response.**

Executive Compensation

OCSTA values the faith-filled service Senior Administrative Leaders provide to Ontario's 29 Catholic District School Boards. We have and continue to advocate for adequacy, fairness and equity in compensation for all staff working in Catholic school boards including the dedicated system leaders.

OCSTA and other education stakeholders met for over 1 year with the previous government (Ministry of Education) to create a framework that would lead to a fair and stable Executive Compensation program over a 3-year phase-in period. However, the implementation of the program did not rollout in a fair, equitable or consistent manner.

Compensation compression with the current salary freeze makes it less attractive to seek positions of responsibility within the publicly-funded education system (e.g. Principal to Superintendent/Superintendent to Director). This compensation compression also negatively impacts attracting and retaining Senior Staff.

OCSTA Recommendations:

- **That the Ministry of Education implement a one-time salary correction on behalf of those boards who do not meet the bottom threshold of salary at the level their board is designated within the current regulatory structure. This would allow Superintendents and Directors of Education and other Executives included in the framework, to be paid at the minimum of their board level.**
- **That the Ministry of Education review and make compensation adjustments for Senior System Executives and Administrative Leaders consistent with those provided to other union and non-union school board staff.**

Funding for Anti-Black and Indigenous Racism Programs

OCSTA commends the government for its commitment to removing systemic barriers including those related to race. Ontario's 29 Catholic school boards share this commitment and continue to place priority on ensuring that system, school and classroom practices reflect the diversity of students and staff. Anti-Black and Indigenous racism and discrimination are contrary to Catholic social teaching. In this regard, we fully support the Ministry of Education's stated priority of developing and implementing an Anti-Black racism strategy and addressing discrimination against Indigenous peoples.

We believe that addressing Anti-Black and Indigenous forms of racism requires specific, targeted and sustainable efforts at all levels of our publicly funded education system. We know as well that such crucially important efforts require adequate, equitable and long-term funding. This funding would, among other programs/initiatives be used to support the regular collection and analysis of student and staff demographic data, community consultations as well as the development of appropriate professional learning and mentoring resources.

OCSTA Recommendations:

- **That the Ministry of Education provide sufficient funding/resources so boards can develop targeted and comprehensive Anti-Black and Indigenous racism programs and services.**

Ontario Regulation 191/11 Accessibility for Ontarians with Disability Act (AODA)

All school boards in Ontario have obligations to ensure their programs, services and infrastructure meet the requirements under the AODA and its various regulations and standards. Boards must develop multi-year accessibility plans in order to ensure compliance with the AODA and its regulations. Recently the Ministry of Seniors and Accessibility released draft recommendations on developing an Education Accessibility Standard that will affect technology, curriculum, school architecture, organizational barriers and other key program areas. These ongoing and new regulatory requirements will place significant cost pressures on boards as they strive to meet the 2025 timeline for implementing these requirements.

OCSTA Recommendations:

- **That the Ministry of Education provide specific and systematic funding necessary to meet AODA requirements in all areas covered by the regulations and standards until the year 2025.**

Cybersecurity in School Boards

OCSTA acknowledges the recent announcement by the Ministry of Government and Consumer Services in establishing its Cybersecurity Modernization Strategy and its expert panel on cybersecurity to provide advice on cybersecurity threats to organizations in the public sector, including school boards. We look forward to our continued participation in the consultations the government has in this area.

School boards throughout North America are facing increased threats from cybercriminals. With the increased use of digital resources in response to COVID-19, boards expect significantly more challenges in this area. According to Statistics Canada, incidents of cybercrime in Canada is increasing on average 23% each year and have almost doubled since 2014. (<https://www150.statcan.gc.ca/t1/tbl1/en/tv.action?pid=3510000101>)

In the Auditor General's 2018 Annual Report, cyberattacks are identified as a growing threat to the security of Ontario's school boards' IT systems and related infrastructure. The report identifies cyberattacks as those security breaches

“.... both intentional and unintentional unauthorized access, use, manipulation, interruption or destruction of electronic information and/or the electronic and physical infrastructure used to process, communicate and/or store that information. The biggest potential consequences of cyberattacks are disruption of operations and compromise of sensitive data. In extreme circumstances, cyberattacks can lead to damage to physical property and harm to human life.”¹

School boards host large amounts of personal information about students and board staff that can make them vulnerable to cyberattacks. This information could be used for identity theft or other forms of criminal activity that pose a significant risk for student and staff safety. It is paramount then that school boards have the resources, training and support required to develop cybersecurity systems to prevent cyberattacks. While our school boards support the general recommendations of the Auditor General in refining existing cybersecurity and risk management frameworks to reduce the school boards' risks, including cybersecurity awareness training to teachers and staff who have access to information technology, additional funding and support resources are necessary.

OCSTA Recommendations:

- **That the Ministry of Education ensure that boards have sufficient resources to develop and implement new cybersecurity policies and risk management frameworks;**
- **That the Ministry of Education expand the work of the Educational Computing Network of Ontario (ECNO) in building a shared service capacity for cybersecurity analysis and a shared security service for boards in Ontario;**

¹ See chapter 3.12 p. 555 (http://www.auditor.on.ca/en/content/annualreports/arreports/en18/v1_312en18.pdf)

-
- That the Ministry of Education expand the mandate of the Ministry's Broadband Modernization Initiative to fund and support cybersecurity training and awareness programs;
 - That the Ministry of Education facilitate coordinated consultations with the Ministry of Government and Consumer Services and its expert panel on cybersecurity matters impacting boards.

Economic Realities with Capital Projects/Funding for Retrofitting/Renovating Schools

Capital Costs Regarding School Construction

Several factors are increasing the capital costs related to school construction in Ontario. They include:

- Increased tariffs on steel and aluminum;
- COVID-19 safety requirements;
- Increasing labour costs;
- Current construction tendering environment.

The current Ministry of Education Capital Priorities Funding Benchmark ("benchmark") does not recognize these increasing cost factors and is currently not an adequate standard for determining construction costs. The last formal review of the benchmark was in 2010 based on the analysis provided by the Expert Panel on Capital Standards. There is an urgent need to increase this benchmark to better align with current economic realities in the construction sector.

Recently, however, the Ministry announced a review of the Design and Benchmark Standards as part of the launch of the Capital Priorities Program (July 22, 2019 B17). OCSTA welcomes this review and believes addressing the increased costs associated with school construction is overdue.

In addition, in the context of retrofitting and renovating schools to improve HVAC and ventilation issues for health and safety, OCSTA acknowledges the recent funding provided through the COVID-19 Resilience Infrastructure Stream – Education Related Projects (CVRIS-EDU) as part of Investing in Canada Infrastructure Program (ICIP). This \$656 million fund will help support boards in making the necessary capital changes to their infrastructure to improve the health and safety of their operations. As noted, however, within the May 7, 2021 B-Memo 2021 12, the timelines for project completion remain an issue for boards. Additional flexibility in these project timelines is required.

In the area of deferred maintenance, funding has not been adequate to reduce the overall deferred maintenance backlog or provide sufficient funds for schools to replace or renew energy efficient building components or meet the heating, ventilation and cooling costs of schools. The loss of the Greenhouse Gas Reduction Fund, for example, has compromised many energy efficiency retrofit projects in our schools. The review panel represents an opportunity to address this issue of deferred maintenance.

Capital Program Planning

We recognize and appreciate the Ministry of Education and Government's commitment to allocate capital funding equitably/fairly amongst the four publicly funded school systems. School boards benefitted from previous capital allocation programs in a number of ways. Paramount among these were the predictability and flexibility afforded to school boards to plan, on a district-wide basis, for the most effective and efficient means of addressing their various capital requirements.

The continuing needs of school boards include the following:

1. Old schools need to be re-built;
2. Some schools need to be consolidated due to declining enrolment and this often requires some capital upgrades;
3. Ultimately all schools will need to meet AODA accessibility standards, but there are no funds earmarked to address these needs; and
4. Even with overall decreases in enrolment, new schools need to be built in boards' growth areas that are sometimes far from existing schools.

The Ministry of Education now issues calls for applications for capital projects. Each of these calls gives the appearance of being a one-off call, with no certainty about whether or when there will be another. As a consequence, many boards have treated these calls as though there will be no other. A multiplicity of different projects, which under the previous system were streamed into specific capital programs, is now herded into a single funding stream. This makes it difficult for boards to assign priorities and difficult for Ministry officials to make decisions that are fair and equitable.

In addition, the current approvals process under this single funding stream for capital projects is administratively burdensome and causes significant delay in design, planning and construction schedules. Streamlining this process will go some distance to increasing efficiency and lessening the administrative burdens for school boards. While acknowledging the good work of Ministry staff, the delays in the various required approval processes is causing increases in tender results as well as exacerbating the challenges associated with enrolment pressures. Particularly when Corporate Services board staff are focussed on the health and safety of students and staff and the good stewardship of resources, we would urge a freeze and where possible relaxation of capital reporting requirements.

The current situation would also benefit from the creation of a multi-year program to address capital needs. This would add an element of predictability to the system and would make it possible for school boards to plan and clearly articulate those plans to the Ministry. It would also make it easier for the Ministry to review applications and make allocations in an orderly and transparent manner that reflect the priorities of both the Ministry and school boards.

OCSTA Recommendations:

- **That the Ministry of Education include the OCSTA and other Trustee Associations, in the review panel regarding school construction capital benchmarks;**

-
- That the Ministry of Education establish a multi-year capital funding process in order to restore the ability of both the Ministry of Education and school boards to plan for future capital needs;
 - That the Ministry of Education streamline and provide increased local autonomy with regard to the capital approvals process for school boards to reduce administrative costs;
 - That the Ministry of Education continue to advocate with the federal government for extended timelines for the completion of the capital projects related to the COVID-19 Resilience Infrastructure Stream.

Student Transportation

OCSTA acknowledges the government's ongoing review of the existing student transportation funding formula and looks forward to continuing to participate in that process.

As OCSTA has noted on numerous occasions, the structure and funding of student transportation is not based on the needs of a school board. The funding model is based on a "historical amount"— each boards' 1997 spending level with annual adjustments for enrollment and inflation, and other minor adjustments. Catholic school boards ran extremely efficient transportation operations and have been disadvantaged as a result in the prolonged delay (since 1997) of the review of transportation funding. The most important influences on a school board's student transportation costs are not factored into the model such as enrollment density, geography, the number of special needs students and safety hazards.

In addition, the current competitive procurement process that school boards must follow in securing transportation has resulted in significant cost increases. In one case of a large urban transportation consortium, costs increased by roughly 20% and had to be absorbed by the affected school boards. It has as well reduced the number of bus operators and caused greater uncertainty with regard to the level of service.

OCSTA Recommendations:

- That the student transportation funding formula be restructured to reflect the actual needs of school boards;
- That the competitive procurement process restore school board autonomy and flexibility in negotiating school bus operator contracts;
- That the Ministry of Education consult with OCSTA and other education partners in its on-going review of the student transportation funding formula.

Transportation Funding for French Immersion Programs

Major inequities exist between Catholic and Public school boards across Ontario related to the funding that they receive for important regional and language programs such as French Immersion. These inequities have existed since the Ministry set an arbitrary base for board

transportation funding in the late 1990's. Boards, mostly Public boards, who were operating French Immersion programs prior to that date had those costs included as part of that arbitrary base. Other boards, who have initiated and/or added to their French Immersion programs since that time have never received funding to do so. Funds have had to be allocated from other parts of their budgets and thus have negatively impacted other programs. With the exception of large urban areas that have adequate public transit, students are unable to access French Immersion programs without board transportation services.

OCSTA Recommendation:

- **That the Ministry of Education reform the student transportation funding model to address the inequities between boards that negatively impact French Immersion and other important regional programs.**

School Bus Driver Retention

School boards across Ontario are facing a significant shortage of qualified school bus operators. In the current COVID-19 context, this shortage has been considerably exacerbated. Health and safety concerns as well as the demographics of bus drivers have driven the numbers of qualified drivers so low, that boards have been forced to cancel transportation routes. This has caused much disruption to students and families and also impacting the learning experiences of children. Although not limited to, the reality of bus driver shortages is particularly acute for rural and remote of Ontario. As well as additional funding in transportation, the reality of the bus driver shortage requires creative and sustainable solutions.

The government's continuation of the "School Bus Driver Retention Pilot Program" where eligible school bus drivers could receive up to two separate retention bonuses of up to \$1,000 each, based on continuous employment over two periods between September to December 2021 and January to June 2022, is welcomed. Saying that, an increase in the amount of funding provided and a review of all strategies to increase the number of drivers is urgently required.

OCSTA Recommendations:

- **That the Ministry of Education enhance, with additional investments, the School Bus Driver Retention Program;**
- **That the Ministry of Education continue to review the results of this program in the broader context of restructuring the student transportation funding formula to meet the needs of school boards.**

21st Century Programs and Services for Students with Differing Abilities Including Diverse Learning Needs

Student Mental Health

OCSTA acknowledges and welcomes the government's commitment to increase funding to address student mental health and well-being, given how students have suffered significantly in the context of the extended school closure in response to COVID-19. With the prolonged absence from school, the virtual learning context and limited social interactions due to health and safety concerns, boards anticipate a significant increase in demand for their supports and services in this area.² Catholic school boards appreciate recent enhancements in funding in the 2020-21 school year, but urge that continued attention to and priority be placed on this important area.

In addition, recent research from Centre for Addiction and Mental Health shows that roughly 328,000 children in grades 7-12 report moderate to serious psychological distress (2016). The Provincial Centre for Excellence in Children and Youth Mental Health state that schools need to develop comprehensive mental health supports and strategies to address the growing challenge. In addition, with the legalization of the recreational use of cannabis, many school boards anticipate greater demands on mental health resources and supports, with the potential increased use of cannabis products and accompanying impacts on student mental health and well-being.

Out of a commitment to the mind, body and soul of their students, Catholic school boards have developed comprehensive mental health strategies to build awareness/organizational capacity, reduce stigma, use evidence based best practices for promotion and prevention strategies and partner with community organizations.

Rural and northern school boards face unique issues with often far fewer professional resources to support student mental health services. Boards need more resources to expand promotion and prevention programs at the elementary and secondary school level. Key program areas include suicide prevention, anxiety issues, behaviour problems and addictions.

OCSTA Recommendations:

- **That the Ministry of Education continue to review funding for student mental health needs is adequate in the current pandemic response context and is equitable and sustainable for all students over time;**
- **That the Ministry of Education continue to support funding of a board level “Mental Health Lead” into the Grants for Student Needs structure. We also encourage the government to monitor and update the financial supports to boards to support local mental health initiatives;**

² The recent report from the Hospital for Sick Children indicates that students and youth have experienced significant increases in anxiety, depression and other mental health challenges due to the extended lockdown of schools and virtual learning. According to the report “over half of 758 children aged eight to 12 years old and 70 per cent of 520 adolescents reported clinically significant depressive symptoms during the second wave (February to March 2021)” (for further details see: <https://www.sickkids.ca/en/news/archive/2021/research-covid-19-pandemic-impact-child-youth-mental-physical-health/>)

-
- **That the Ministry of Education continue to address the changing nature of student mental health needs as evidenced in the need for on-going enhanced prevention/intervention and aligned staff professional development supports for students with mental health challenges in transition.**

Special Education and Students with Autism Spectrum Disorder

In the context of the COVID-19 pandemic, Catholic school boards remain committed to and are working hard to ensure the needs of their students with special education requirements are supported. However, providing the necessary level of support while ensuring health and safety presents unique challenges. For example, the need for specialized personal protective equipment for students and staff. Virtual learning for students with special education needs also presents particular issues for staff to ensure quality learning.

OCSTA acknowledges and welcomes recently announced changes to the Special Education Grant that moves funding to support programs for northern and rural children from the Priorities and Partnership Funding (PPF) into the GSN. This \$1.44 million in funding supports the coordinated assessment, consultation and treatment services to children and youth with physical, psychological and educational challenges in underserved rural and remote communities in Northern Ontario. Further the transfer of \$6.1 million After School Skills Development Program that assists students with Autism from the PPF into the GSN is also welcome. These changes will provide boards more certainty for planning for the special education needs of their students.

However, the vast majority of Ontario's Catholic school boards continue to run deficits in meeting the educational, psychological and support needs of their exceptional students. More sophisticated diagnostic techniques related to Autism Spectrum Disorder (ASD), have resulted in a significant increase in identifying this segment of the student population and have led to increases in demand on special education services in boards.

Further, school boards are anticipating a significant increase in the number of ASD students entering the elementary grades over the course of the next year as the government's new autism program is fully implemented. The Ministry of Education has recognized this issue and provided boards some increased funding to assist program planning, professional development and enhanced funding to hire applied behavior analysis therapists.³ However, it is unlikely that these enhancements will be sufficient to meet the financial challenges boards face with students with ASD.

Additionally, with the introduction of full-day kindergarten and various social factors, school boards must reallocate funding between different program areas to ensure students receive the educational services and supports they require. In many cases, school boards are having their special education grant reduced due to phased in changes to a key part of the grant structure. The "high needs" amount of the grant is being replaced by the Differentiated Special Education Needs Amount (DSENA). This new model is composed of the Special Education Statistical Prediction Model (SESPM), Measures of Variability Amount (MOV) and Base Amount for

³ These supports and resources were outlined in the March 11, 2019 Memorandum from the Deputy Minister of Education to Directors of Education. For details on OCSTA's concerns and recommendations, see the May 2019 submission to the Autism Consultation.

Collaboration and Integration. This new grant structure has redistributive funding impacts across all boards, some gaining and some losing funding.

School boards also face a range of other funding and program challenges in meeting the needs of special education students. For example, boards struggle to fund the specialized staff required to support students with complex behavioural needs. This may include staff support for student transportation to treatment programs and other support services. Another example is the operational costs associated with classroom design to accommodate students that require quiet spaces for learning and behavioural management interventions.

A current issue is also the challenges associated with timely psychoeducational assessments for students with various disabilities such as Fetal Alcohol Spectrum Disorder. Boards require more support to ensure they have sufficient human resources with the relevant training to conduct these assessments to ensure adequate programming for students.

OCSTA Recommendations:

- **That the Ministry of Education establish a Special Education Working group, including OCSTA, to review the adequacy and flexibility of special education funding, including the structure of the DSENA;**
- **That the Ministry of Education review “needs based” funding models for high needs special education students to supplement the overall Special Education Grant structure;**
- **That the Ministry of Education continue to survey and monitor the current pandemic situation with boards and provide program/financial support as required to ensure students with special education needs can be provided psychoeducational assessments in a timely manner so boards can make the necessary accommodations.**

Parent Reaching Out Grants

The Parent Reaching Out (PRO) Grants program provides funding to district school boards to lead projects with a focus on the identification and removal of barriers that prevent parents and families from participating and engaging fully in their children's learning.

In 2019-20 the Ministry of Education invested \$1.25M in PRO Grants through the new Priorities and Partnerships Fund (PPF). School boards will receive a predetermined funding amount for parent engagement projects.

Changes to the program were made for the 2019-20 school year from an application-based funding model to an allocation-based grant provided to each district school board. OCSTA supports this change in the manner in which the funds are allocated. This funding is intended to help district school boards address local needs and priorities connected to enhancing parent engagement.

Catholic school boards rely on these PRO Grants to offset the costs of parent engagement events, programs and related initiatives. These are critically important for our Catholic educational

community to foster parent engagement with our schools and to assist in our students' faith formation activities. OCSTA applauds the Ministry of Education in continuing to fund these PRO Grants, while examining alternative funding options for boards to support parent engagement within the school community.

OCSTA Recommendations:

- **That the Ministry of Education continue to fund PRO Grants and share examples of innovative initiatives;**
- **That the Ministry of Education consider increasing funding for PRO Grants to offset costs for parent engagement events.**

Information Technology and Digital Resources

Remote learning and the creation of virtual schools in response to the current COVID-19 pandemic has highlighted the challenges boards face in securing adequate information technology and digital resources. To promote equitable access to learning for students, boards are spending significant amounts to acquire digital resources, and as well providing the IT technical support for staff conducting virtual learning. Catholic school boards have purchased tens of thousands of laptops, iPads and other devices in support of those students who are learning virtually. We believe this trend will continue and place increased financial pressures on school boards.

Funding in this area is of paramount importance for school boards as technology is increasingly prevalent in curriculum delivery and linked to equity of access and student engagement. The Ministry of Education provided Technology Learning Funds (TLF) to school boards that was discontinued, leaving boards with infrastructure sustainability concerns. Over the last several years, school boards have made large-scale investments in their information technology due to aging hardware. In addition, boards are required to support maintaining and updating their suite of devices, including software, programs, and infrastructure.

The Grants for Student Needs (GSN) funding does not address technology needs for corporate functions, including financial, plant and maintenance work order systems, payroll systems, student information systems and human resource and employee relations reporting. Aligned to the province's focus on modernizing learning and modernizing classrooms, and with plans moving forward to mandate e-learning opportunities for secondary students, school boards would benefit from increased and stable funding to support the technology priorities of the government.

OCSTA Recommendations:

- **That the Ministry of Education provide boards with sustainable funding for information technology infrastructure through the GSN especially in light of the pressures faced in response to the pandemic;**

-
- **That the Ministry of Education provide school boards with the funding associated with the cost of replacing devices that were transferred from schools to students (at home) learning remotely;**
 - **That the Ministry of Education continue to consult with boards and OCSTA in respect of its Broadband Modernization strategy to ensure the IT needs of boards are factored into the strategy, especially northern and remote boards.**

School Board Flexibility and Autonomy

Catholic district school boards in Ontario face increased budget pressures in the delivery of educational programs and services required by the Ministry of Education. Over the past number of years, successive governments have introduced regulations/legislation that have significantly reduced school board flexibility. This loss in local autonomy and flexibility is of particular concern to Catholic school boards. We could cite numerous examples where Ministry of Education actions have reduced the flexibility Catholic school boards require to realize their distinct mission. Proposed revisions to the Pupil Accommodation Review Guideline is one such example. We would as well call for a review of the *School Boards Collective Bargaining Act* to ensure school boards maintain the level of flexibility and autonomy they require.

The Ministry has also placed increased restrictions on how school boards spend their capital and operating funds. For example, the increased number of areas in the GSN that are “enveloped” reduces school boards’ budget flexibility along with more targeted Program Priorities Funding (PPF). These restrictions on school boards have reduced their capacity to plan for, fund and operate specific education programs that serve the unique needs of their local constituents.

We cannot stress enough that Ontario’s publicly funded school boards require sufficient flexibility and autonomy to realize their distinct missions and unique local needs.

OCSTA Recommendations:

- **That the Ministry of Education review regulations/policies with a goal of increasing school board autonomy and flexibility:**
 - 1. In overall school board planning/program design and the implementation of Ministry policy directives;**
 - 2. Reduce restrictions (enveloping) on operating funds that decrease school board flexibility.**

Science, Technology, Engineering and Mathematics (STEM) Funding

The government has recognized the impact of science, technology, engineering and mathematics (STEM) education is of growing importance to provide students with the skills and competencies required for careers and vocations in the 21st century. OCSTA also acknowledges recent incremental increases in funding in this area from the 2021-2022 GSN. However, our boards struggle to consistently meet the demands related to STEM programming due to the financial challenges related to the development of STEM programs.

OCSTA Recommendations:

- **That the Ministry of Education increase targeted STEM funding through the GSN and the funding tied to ensuring equitable access to the technology required in these programs.**

Summary of Recommendations

Financial Impacts on Boards Related to School Reopening – COVID-19

- That the Ministry of Education provide any and all additional required investments to assist school boards in managing the extraordinary costs associated with school reopening and pandemic response;
- That the Ministry of Education restore school board reserve funds for expenditures related to pandemic planning/response;
- That the Ministry of Education conduct a review of the education funding formula for its adequacy in (and equity) in managing the costs associated with pandemic response.

Executive Compensation

- That the Ministry of Education implement a one-time salary correction on behalf of those boards who do not meet the bottom threshold of salary at the level their board is designated within the current regulatory structure. This would allow Superintendents and Directors of Education and other Executives included in the framework, to be paid at the minimum of their board level.
- That the Ministry of Education review and make compensation adjustments for Senior System Executives and Administrative Leaders consistent with those provided to other union and non-union school board staff.

Funding for Anti-Black and Indigenous Racism Programs

- That the Ministry of Education provide sufficient funding/resources so boards can develop targeted and comprehensive Anti-Black and Indigenous racism programs and services.

Ontario Regulation 191/11 Accessibility for Ontarians with Disability Act (AODA)

- That the Ministry of Education provide specific and systematic funding necessary to meet AODA requirements in all areas covered by the regulations and standards until the year 2025.

Cybersecurity in School Boards

- That the Ministry of Education ensure that boards have sufficient resources to develop and implement new cybersecurity policies and risk management frameworks;
- That the Ministry of Education expand the work of the Educational Computing Network of Ontario (ECNO) in building a shared service capacity for cybersecurity analysis and a shared security service for boards in Ontario;
- That the Ministry of Education expand the mandate of the Ministry's Broadband Modernization Initiative to fund and support cybersecurity training and awareness programs;

-
- That the Ministry of Education facilitate coordinated consultations with the Ministry of Government and Consumer Services and its expert panel on cybersecurity matters impacting boards.

Economic Realities with Capital Projects/ Funding for Retrofitting/Renovating schools

- That the Ministry of Education include the OCSTA and other Trustee Associations, in the review panel regarding school construction capital benchmarks;
- That the Ministry of Education establish a multi-year capital funding process in order to restore the ability of both the Ministry of Education and school boards to plan for future capital needs;
- That the Ministry of Education streamline and provide increased local autonomy with regard to the capital approvals process for school boards to reduce administrative costs.
- The Ministry of Education continue to advocate with the federal government for extended timelines for the completion of the capital projects related to the COVID-19 Resilience Infrastructure Stream.

Student Transportation

- That the student transportation funding formula be restructured to reflect the actual needs of school boards;
- That the competitive procurement process restores school board autonomy and flexibility in negotiating school bus operator contracts;
- That the Ministry of Education consult with OCSTA and other education partners in its on-going review of the student transportation funding formula.
- That the Ministry of Education reform the student transportation funding model to address the inequities between boards that negatively impact French immersion and other important regional programs.

School Bus Driver Retention

- That the Ministry of Education enhance, with additional investments, the School Bus Driver Retention Program;
- That the Ministry of Education continue to review the results of this program in the broader context of restructuring the student transportation funding formula to meet the needs of school boards.

21st Century Programs and Services for Students with Differing Abilities Including Diverse Learning Needs

Student Mental Health

- That the Ministry of Education continue to review that the funding for student mental health needs is adequate in the current pandemic response context and is equitable and sustainable for all students over time;
- That the Ministry of Education continue to support funding of a board level “Mental Health Lead” into the Grants for Student Needs structure. We also encourage the government to monitor and update the financial supports to boards to support local mental health initiatives;
- That the Ministry of Education continue to address the changing nature of student mental health needs as evidenced in the need for on-going enhanced prevention/intervention and aligned staff professional development supports for students with mental health challenges in transition.

Special Education and Students with Autism Spectrum Disorder

- That the Minister of Education establish a Special Education Working group, including OCSTA, to review the adequacy and flexibility of special education funding, including the structure of the DSENA;
- That the Ministry of Education continue to survey and monitor the current pandemic situation with boards and provide program/financial support as required to ensure students with special education needs can be provided psychoeducational assessments in a timely manner so boards can make the necessary accommodations.
- That the Ministry of Education continue to survey and monitor the current pandemic situation with boards and provide program/financial support as required to ensure students with special education needs can be provided psychoeducational assessments in a timely manner so boards can make the necessary accommodations.

Parents Reaching Out (PRO) Grants

- That the Ministry of Education continue to fund PRO Grants and share examples of innovative initiatives;
- That the Ministry of Education consider increasing funding for PRO Grants to offset costs for parent engagement events.

Information Technology and Digital Resources

- That the Ministry of Education provide boards with sustainable funding for information technology infrastructure through the GSN especially in light of the pressures faced in response to the pandemic;
- That the Ministry of Education provide school boards with the funding associated with the cost of replacing devices that were transferred from schools to students (at home) learning remotely;
- That the Ministry of Education continue to consult with boards and OCSTA in respect of its' Broadband Modernization strategy to ensure the IT needs of boards are factored into the strategy, especially northern and remote boards.

School Board Flexibility and Autonomy

- That the Ministry of Education review regulations/policies with a goal of increasing school board autonomy and flexibility:
 1. In overall school board planning/program design and the implementation of Ministry policy directives;
 2. Reduce restrictions (enveloping) on operating funds that decrease school board flexibility.

Science, Technology, Engineering and Mathematics (STEM) Funding

- That the Ministry of Education increase targeted STEM funding through the GSN and the funding tied to ensuring equitable access to the technology required in these programs.
