Subject: Bill 229 Schedules 6 and 8

Hello,

I am deeply opposed to Schedules 6 and 8 of Bill 229 and want them removed.

With climate change and serious environmental degradation upon us, I can't for the life of me understand why stripping Conservation Authorities of their valuable service in watershed management and flood monitoring makes sense. Also, I'm sure you have been made aware of the importance of forests, the diversity that an old growth forest sustains....yet you choose to ignore these values and forge ahead with logging these unique old growth forests, destroying these disappearing habitats.

Please, Schedules 6 and 8 are steps backward. They need to be removed.

Sincerely

Lynn Smith
