I believe article 6 of bill 229 should be removed. Issuing mzo to push ahead development doesn't create more jobs, it takes away jobs from those who would do the environmental assessment. Politicians are not scientists

and should not be able to make decisions which could have serious ramification without scientific information backing those decisions. Furthermore this article goes against canada's climate change goals and only benefits the developers how funded fords campaign. keeping conservation intact benefits a far more majority of Ontario population because they protect us from flooding and provide clean air and water it also create spaces for people to enjoy activities outside which promotes a healthy lifestyle.
