Please remove schedule 6 and schedule 8 from Bill 229. I know the Covid recovery act seems important right now, but for the long term health and well being of our planet and children, the health of waters and wetlands is much more important. Please consider the long term implications of your actions, because soon it will be irreversible and we will regret our reckless decisions of today. This is the time to stop pretending we are taking action and actually make the decisions that need to be made! Let's be leaders for other countries around the world. Sustainability has to be one of the very top priorities throughout all our decisions from now on, or we are in big trouble. Please consider the importance of this!
