Please remove conservation / environmental actions from this bill. It's misleading to include non-COVID related items in this bill. They should be introduced under a separate bill, to ensure transparency and adequate time for review and debate.

By including conservation related material, which is not in the best interest of the environment or the general population, in a bill with the politically charged name "Protect, Support and Recover from COVID", you are discouraging members from opposing the bill, as it's not palatable to oppose a bill which appears to be supporting COVID recovery. This behaviour is misleading and has no place in Canadian politics.
