Message Body:

I have to write to congratulate you for bringing up the private members' bill to make daylight saving time year round.

It does not make sense to change the time twice a year.

One important reason, apart from affecting our health and sleep etc., is the fact that in the winter, working people hardly see the sun.

People are more prone to having car accidents at the end of a work day, when they are tired and are anxious to get home,

and then they often face the challenge of navigating bad weather in the dark.

Delaying darkness by an hour in the winter would no doubt reduce the number of accidents.

Many people share that concern, but few actually want to do something about it!
An Ottawa MPP had proposed it a few years ago, but nothing came of it.
I hope at this time, it will bring about effective change with your effort!
Thank you in advance for this important endeavor!
