I was advised yesterday from a friend that public input for the subject Bill has been scheduled for only 3 days, June 15th-17th. With the ongoing COVID-19 crisis I was surprised that your Government has chosen to proceed with this legislation. There has been little coverage of the matter.

This legislation will make a significant change to the delivery of Home Care in Ontario and requires more time for public input. Also, given the current abysmal performance of the "private sector" handling of COVID in the Long Term Care sector, there is a definite need to understand all of the risks of such transformative changes. Therefore, I am asking that there be additional time provided for public input in to Bill 175.

Thank you.
